Choosing the Right Tool…

PalmSource 99

- Tools Night!!!
  - Tonight—In the open labs beginning at 9:00 p.m., come see demos, ask questions, and get to know your developer tools developer
- Look for  that developer will be available for questions and demos at TOOLS NIGHT!!!

Overview

PalmSource 99

- Choosing the right tool
- What tools are out there?
  - Handheld development tools
  - Conduit development tools

How Do I Chose

- Decide what it is that you're trying to do
  - Simple one time application?
  - A long term solution?
  - What kind of features do you need to implement?
- Decide how much you are willing to invest
  - In money
  - In training
  - In development time

Handheld Development Tools

PalmSource 99

- CASL
- CodeWarrior® for the Palm Computing® platform
- HanDBase
- Pendragon Forms
- Pocket Smalltalk
- Satellite Forms
- VFDIDE

CASL

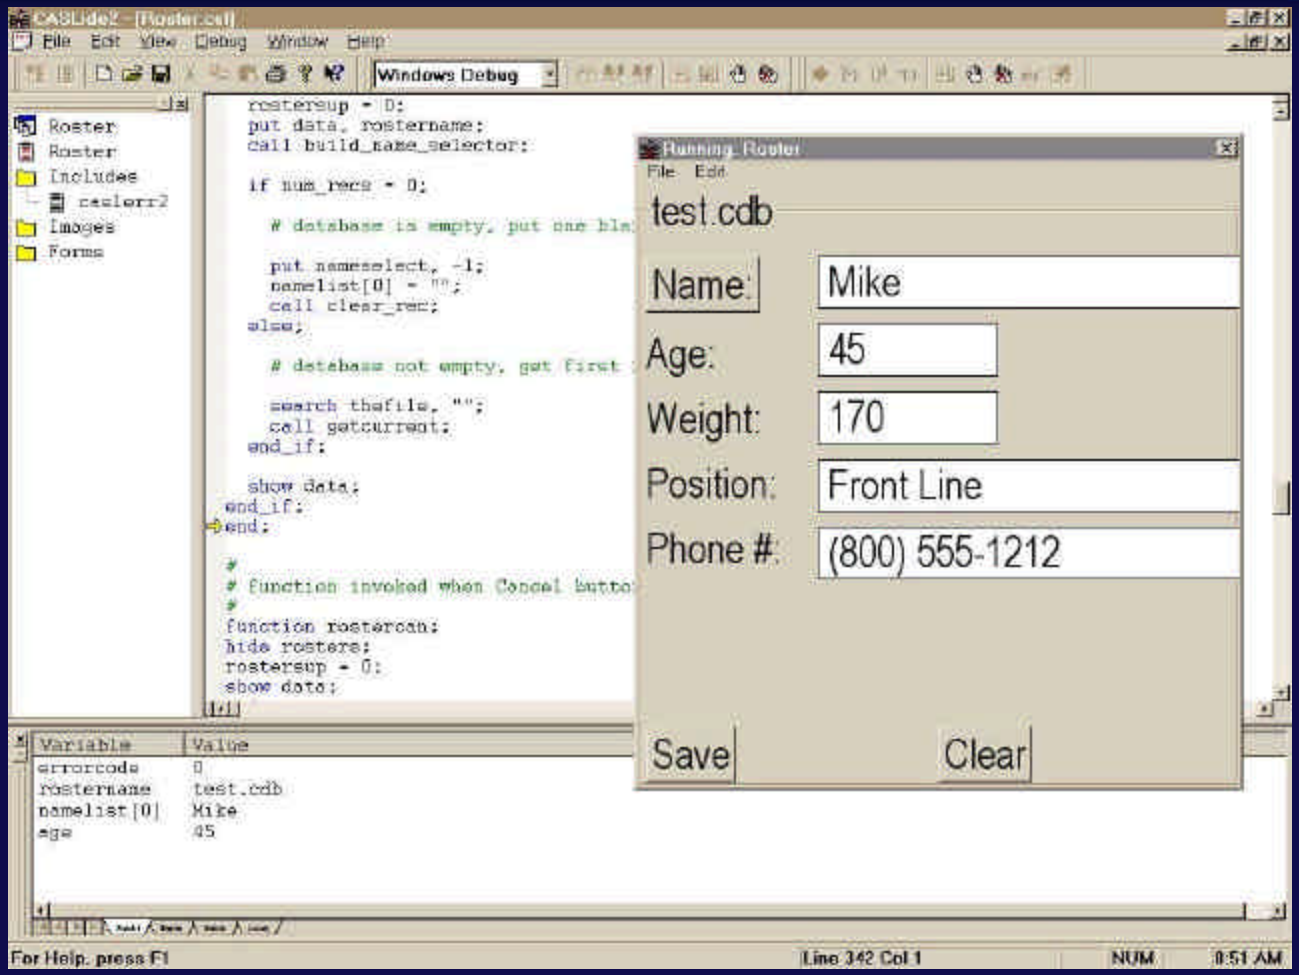

- Compact Application Solution Language: CASL
- Visual development tool
- Easy to learn, easy to use
- Low cost only $64.95
- Support via email, FAQs, and mailing list

CASL

- Features
  - Multi-Platform—Palm OS®, Windows, WinCE
  - Drag-n-Drop forms based development for UI design
  - Built-in database capabilities with a built in conduit
  - Supports C calls
  - Includes a Windows debugger
  - Access to Palm OS built in databases
  - Supports SMTP email, TCP/UDP network communications and serial communications
  - Support Symbol Palm-based barcode scanners
  - Next version—CASLpro—will no longer need runtime module!

CASL

- Get more information at http://www.caslsoft.com/

CodeWarrior® for the Palm Computing® Platform

PalmSource 99

- With CodeWarrior® for the Palm Computing® platform, create software programs that run directly on a Palm device from your Windows 95/98/NT or Mac OS computer using the award-winning CodeWarrior Integrated Development Environment (IDE)
- CodeWarrior offers the most complete set of development tools available, unified into a simple and intuitive development environment
- Requires knowledge of C/C++
- Cost—$369

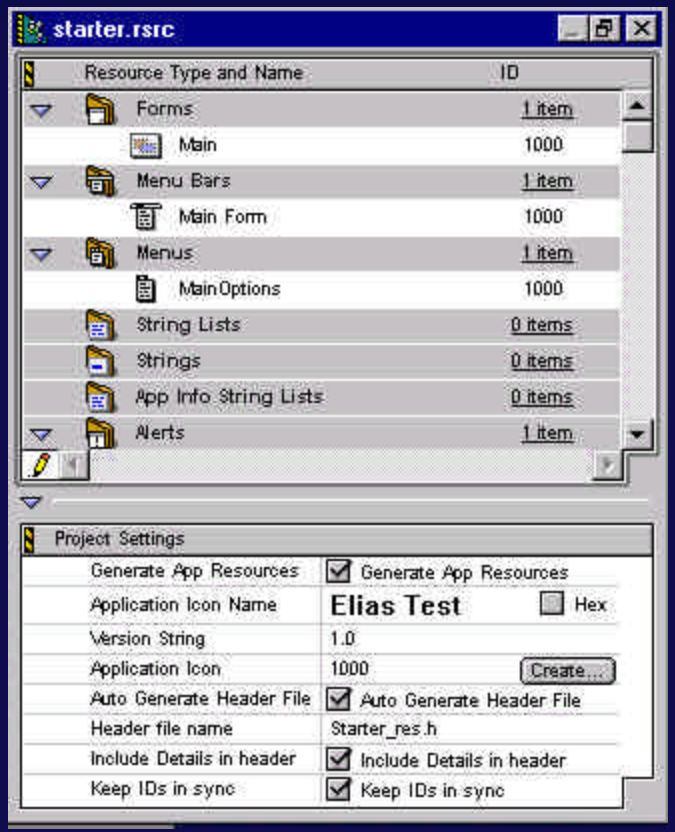

CodeWarrior® for the Palm Computing® Platform

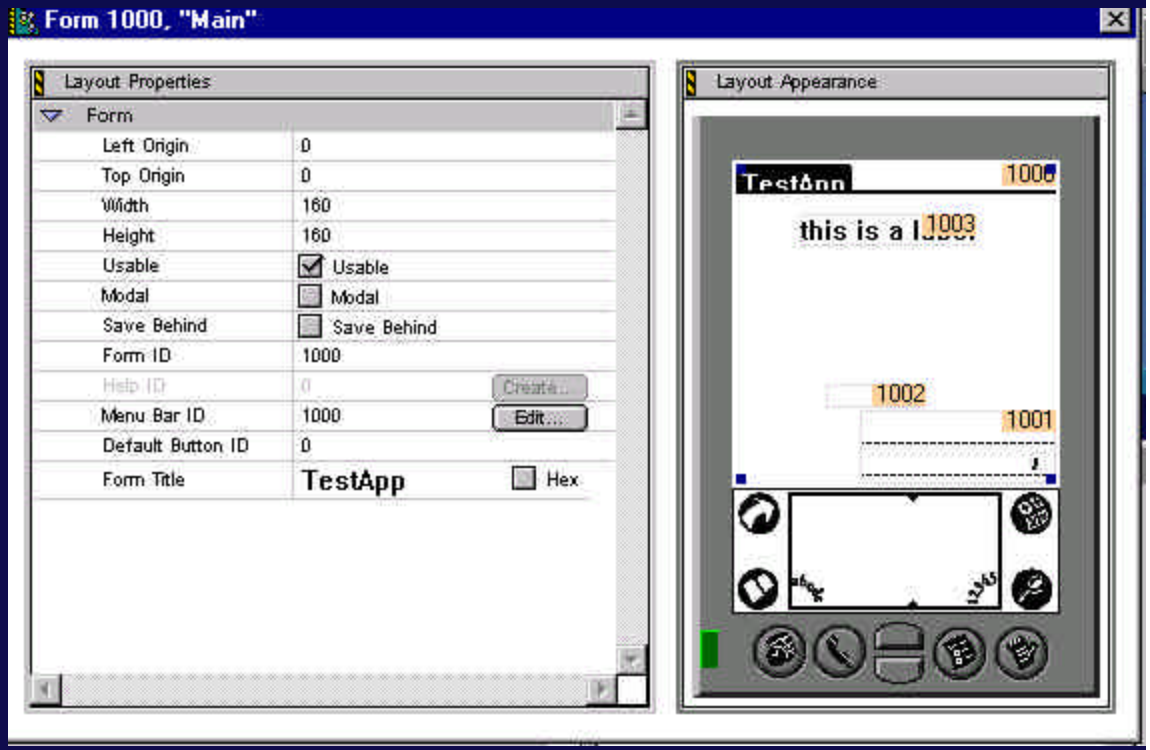

PalmSource 99

- Features
  - CodeWarrior IDE v3.1
  - Palm OS 3.0 SDK (available with product registration)
  - C / C++ compilers
  - Constructor for Palm Computing platform
  - Palm OS Emulator (Windows and Mac OS)
  - Palm OS Simulator (Mac OS only)
  - Symbol SPT family Scanner Library
  - CodeWarrior IDE documentation and viewing applications
  - Palm Computing® platform documentation and tutorials
  - Examples of Palm applications

CodeWarrior® for the Palm Computing® Platform

PalmSource 99

- Get more information at http://www.metrowerks.com/pda/palm/

HanDBase

- Create, View, and modify custom databases on your Palm Computing® Platform device
- Very easy development tool!
- Short design time
- Development done on the Palm device
- Low cost—only $19.99
- Toll free technical support
- Free marketing on DDH software website

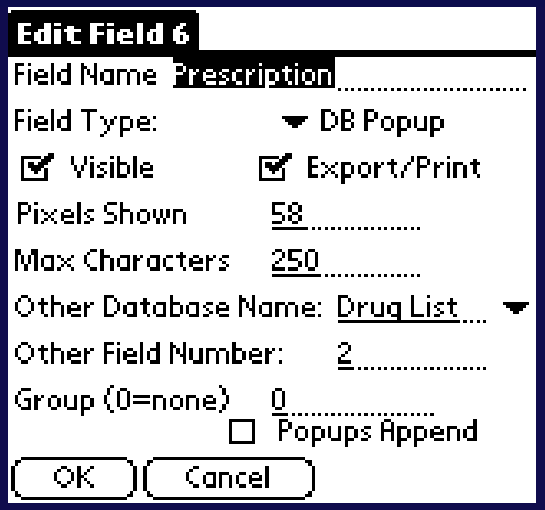

HanDBase

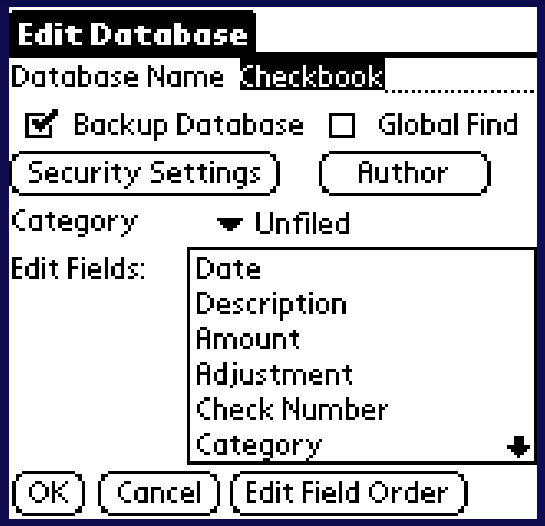

- Features
  - Very powerful engine allows for multiple relational databases to be linked in several ways
  - Supports up to 60 databases with 30 fields each, and each database can contain 65,000 records
  - Supports beaming, printing, exporting, importing, filtering, sorting, security and more
  - Desktop tools for Windows, Dos, OS/2, Mac, Unix/Linux

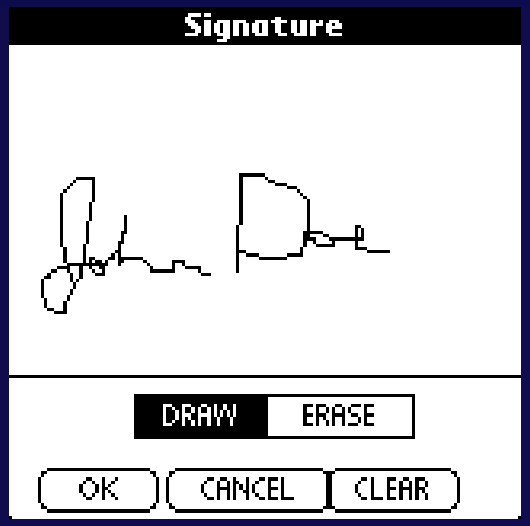

HanDBase

PalmSource 99

- Get more information at http://www.ddhsoftware.com/

Pendragon Forms

- Develop database/forms oriented applications very rapidly with out programming
- Easy enough for end-users to use. Flexible enough for VARs to build sophisticated applications for inventory, patient tracking, work orders etc.

- Cost
  - $149 per developer
  - $45 per user

pendragon SOFTWARE CORPORATION

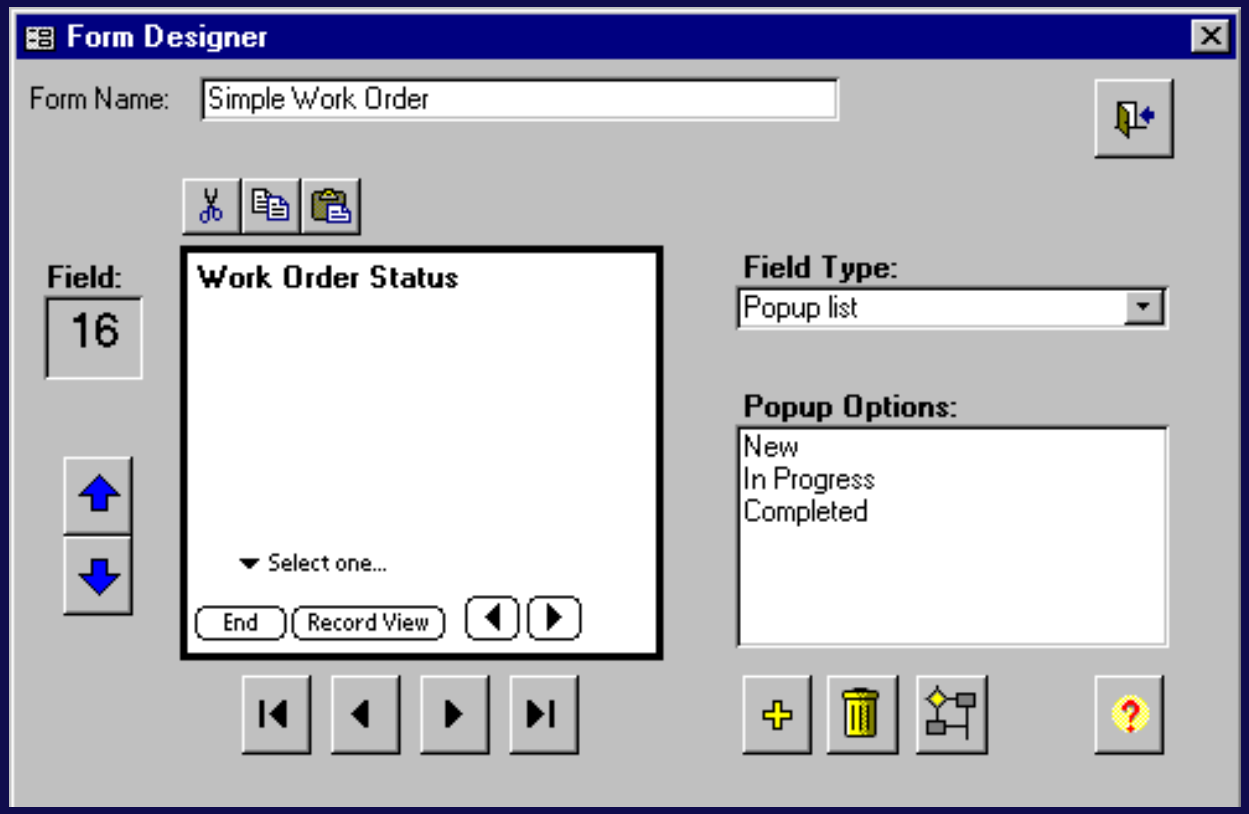

Pendragon Forms

- Features
  - Bi-directional synchronization with existing Access and ODBC databases
  - Rapid development without programming
  - Centralized management
  - Server synchronization via the WaveSync synchronization server
  - Excellent support for partial datasets
  - Automatically generate Access tables and forms based on your Palm database specification
  - Automatically generate Pendragon Form designs from existing tables
  - Field mapping tool to allow direct synchronization with existing tables and queries

Pendragon Forms

- Get more information at http://www.pendragon-software.com/

Pocket Smalltalk

- Implementation of Smalltalk-80 programming language for Palm OS®
- Easy development tool if you know Smalltalk or Java
- Open Source—FREE
  - Source for VM and IDE available

Pocket Smalltalk

Pocket SmallTalk

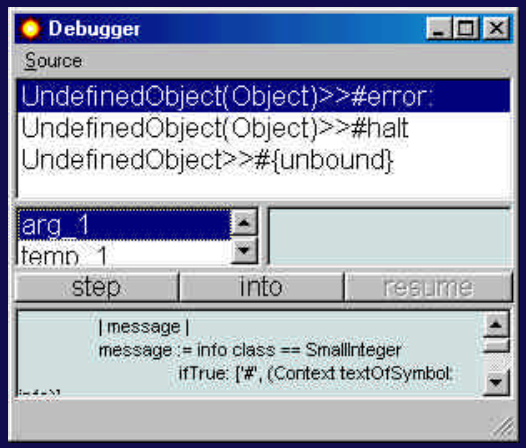

- Features
  - Full IDE running Windows 95/NT
  - Full support of Smalltalk—Generates .PRC files from Smalltalk source
  - True object-oriented language; everything is an Object
  - Garbage collector
  - Support for systraps
  - Can use MathLib
  - Add-on translates Java to Smalltalk
  - Combined VM allows for Smalltalk and Java code to co-exist
  - IDE has code browser, source debugger, search tools
  - Developer forum for support

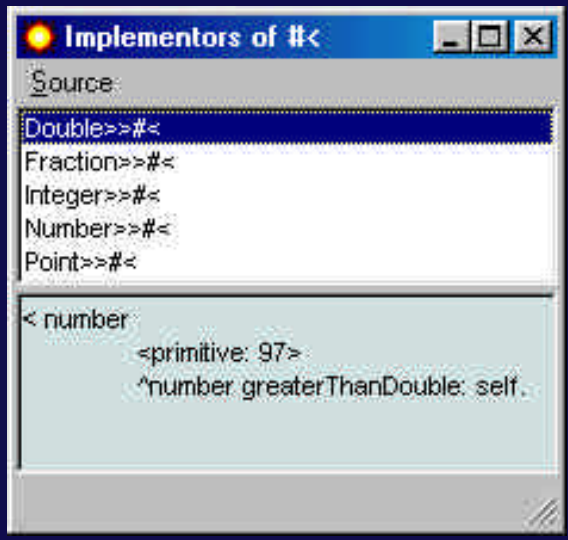

Pocket Smalltalk

- Future Features
  - Debugger that will support systraps and run on device and POSE
  - Support for commercial Smalltalk dialects
  - IDE ported to Macintosh, Linux, OS/2, Unix, BeOs
  - Improved Pocket Java www.PocketJava.com

- Get more information at http://www.pocketsmalltalk.com

Satellite Forms

- Satellite Forms™ Standard Edition software is the premier visual rapid application development tool for devices based on the Palm Computing® platform
- Satellite Forms is quick, easy, and cost-effective way to keep your mobile workforce connected
- Cost:
  - Standard Edition—$795
  - Enterprise Edition—$995 (includes 10 runtime licenses)

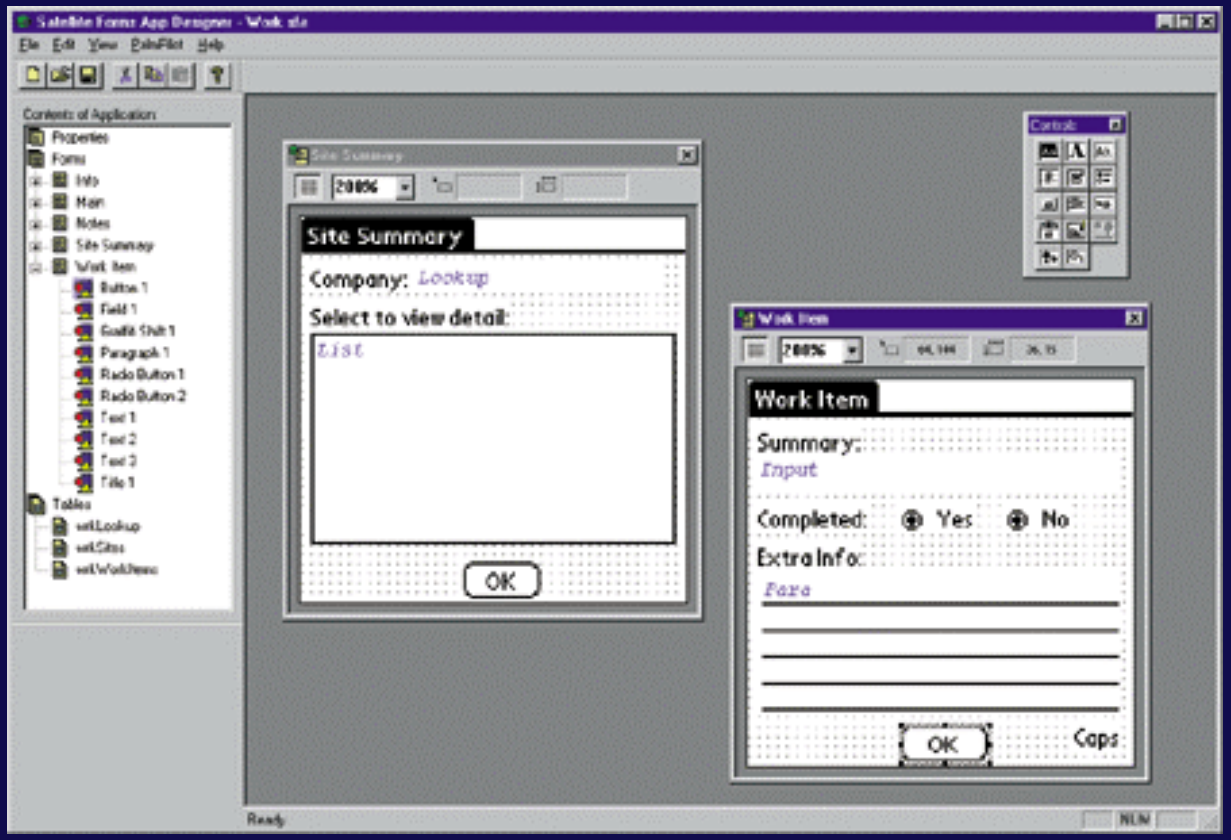

Satellite Forms

PalmSource 99

- Features
  - Create applications on the desktop with “drag-and-drop” ease
  - Develop multi-form applications with linked forms that share information
  - Add substantial functionality without programming.
  - Easily integrate with corporate data using the ActiveX control or server synchronization solutions
  - Add calculations, validation, conditional logic, looping, and sound, with event-driven scripts, in a
  - Syntax similar to Visual Basic
  - Extend Satellite Forms with “C” programs and take advantage of Satellite Forms and 3rd party controls and plug-ins

Satellite Forms

PalmSource 99

VFDIDE

- Visual Forms Designer and Integrated Development Environment
- VFDIDE—develop and view your forms right on the screen and to create complete Palm OS® applications
- Requires ANSI C skills
- Cost:
  - Form Designer (Level 1 Registration) = $25
  - Code Editor (Level 1 + 2) = $35
  - Full Version—Line level debugger (Level 1+2+3) = $55

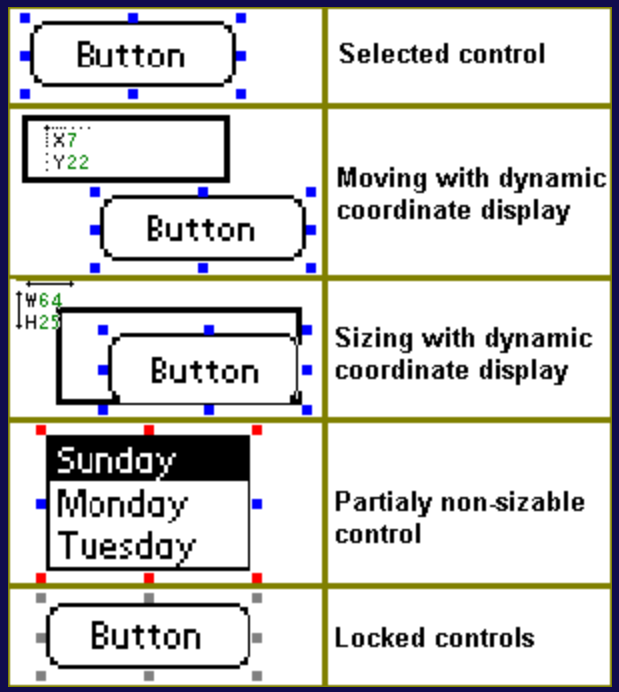

VFDIDE

- Features
  - WYSIWYG Multi-Form design with true on-screen view
  - Full drag&drop supported control placement
  - Integrated, multi file, syntax colorizing editor that colorizes C-syntax and Pilot API Functions
  - Fast, integrated compilation with error tracking
  - Full line level debugger
  - Modern, fully integrated development environment
  - Runs in all Windows environments
  - Multiple projects at the same time
  - Integrated Pilot API documentation
  - Sample applications with full sources included

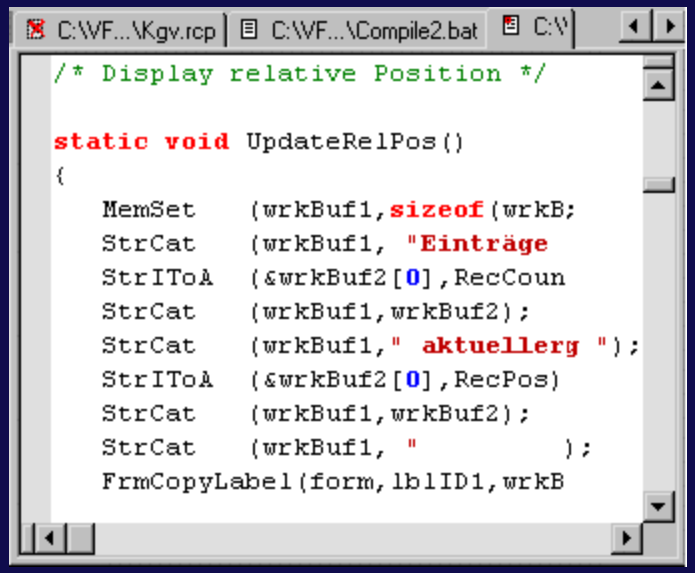

VFDIDE

PalmSource 99

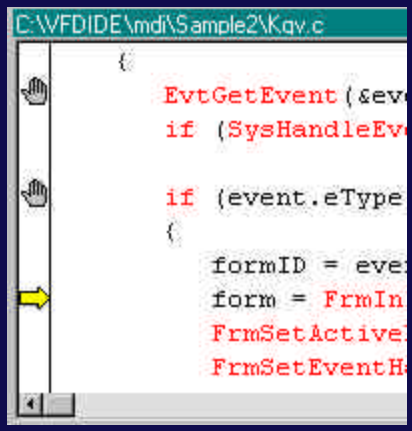

- **Level 1**

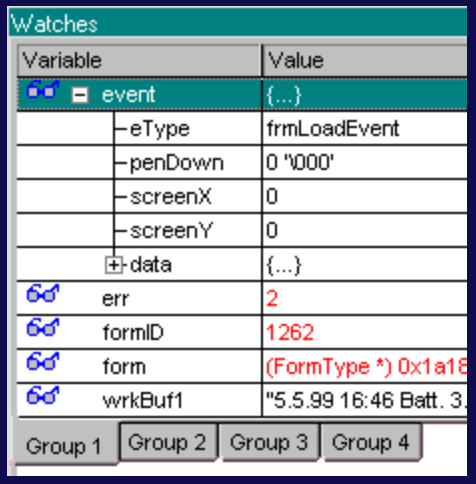

- **Level 2**

- **Level 3**

- Get more information at http://www.vfdide.com/

Conduit Development Tools

PalmSource 99

- ASL-Connect
- EHand Connect
- PylonPro/Pylon ServerSync

ASL-Connect

- ASL-Connect gives you direct server connectivity for large numbers of handheld devices, together with the Management, Synchronization, Connectivity and Development capabilities
- Very quick and easy to build synchronization— you worry about your application, we do the Sync!
- Windows NT-based
- Cost—currently under review

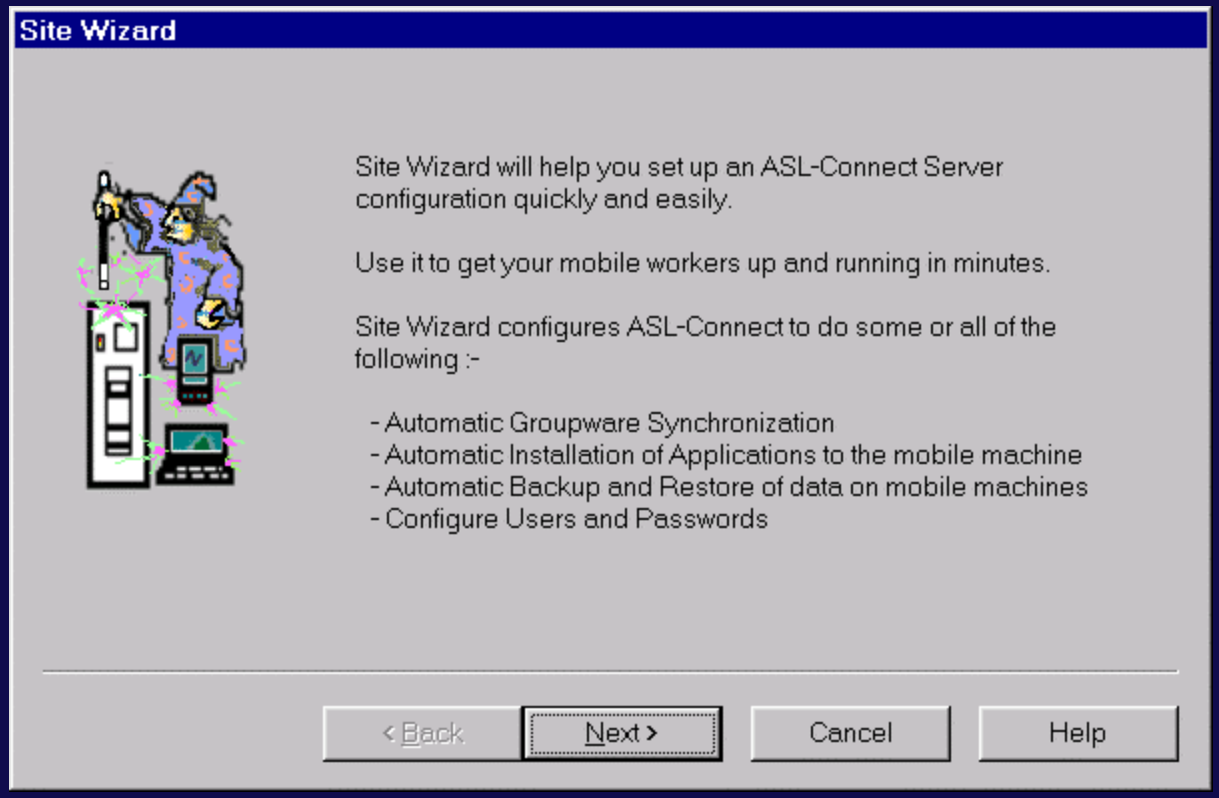

ASL-Connect

PalmSource 99

- Features
  - Server Based Synchronization—cut the PC out of the loop
  - Synchronization of handheld applications with Oracle, DB/2. Sybase + other leading relational database servers
  - Built in Microsoft VB Script Engine allows very flexible expandability
  - Security and Authentication utilizing Certicom technology
  - Mature proven product (>2years as live product)
  - No programming skills needed
  - Wireless Enabled
  - Scalability—a single processor Pentium II Server can support thousands of users

ASL-Connect

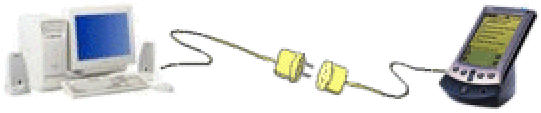

- Get more information at http://www.asl.com/ or http://www.extendsys.com/products/enterprise/#server

EHAND Connect

- Developer can easily write custom Palm conduit software using Visual Basic—or any other COM—enabled language such as Delphi or Java
- Easy to use, get a conduit running with less than 30 lines of code
- Cost—FREE (under 2 conditions) or $10 per end user

E|HAND Connect™

EHAND Connect

- Features
  - Use Visual Basic to create your conduits
  - Hides most of the low level complexity (byte ordering, calling conventions, etc.)
  - Easy integration with other Windows components via COM (ODBC databases, MS Access, Office Applications, Outlook, etc.)
  - Rich documentation and developer support via mailinglist, website etc.
  - Wizard conduit installation process
  - Easy debugging in Visual Basic IDE

EHAND Connect

- Future EHAND Connect compliant tools will provide Server sync over TCP/IP
- Get more information at http://www.ehand.com

PylonPro/Pylon ServerSync

- PylonPro automatically creates a custom Palm™ device application, just select a Notes database, form, and a view, and then perform a HotSync® function; it's really that easy

- Cost $145 per user—
  no development kit needed;
  it's done in Notes

PYLON
SERVERSYNC

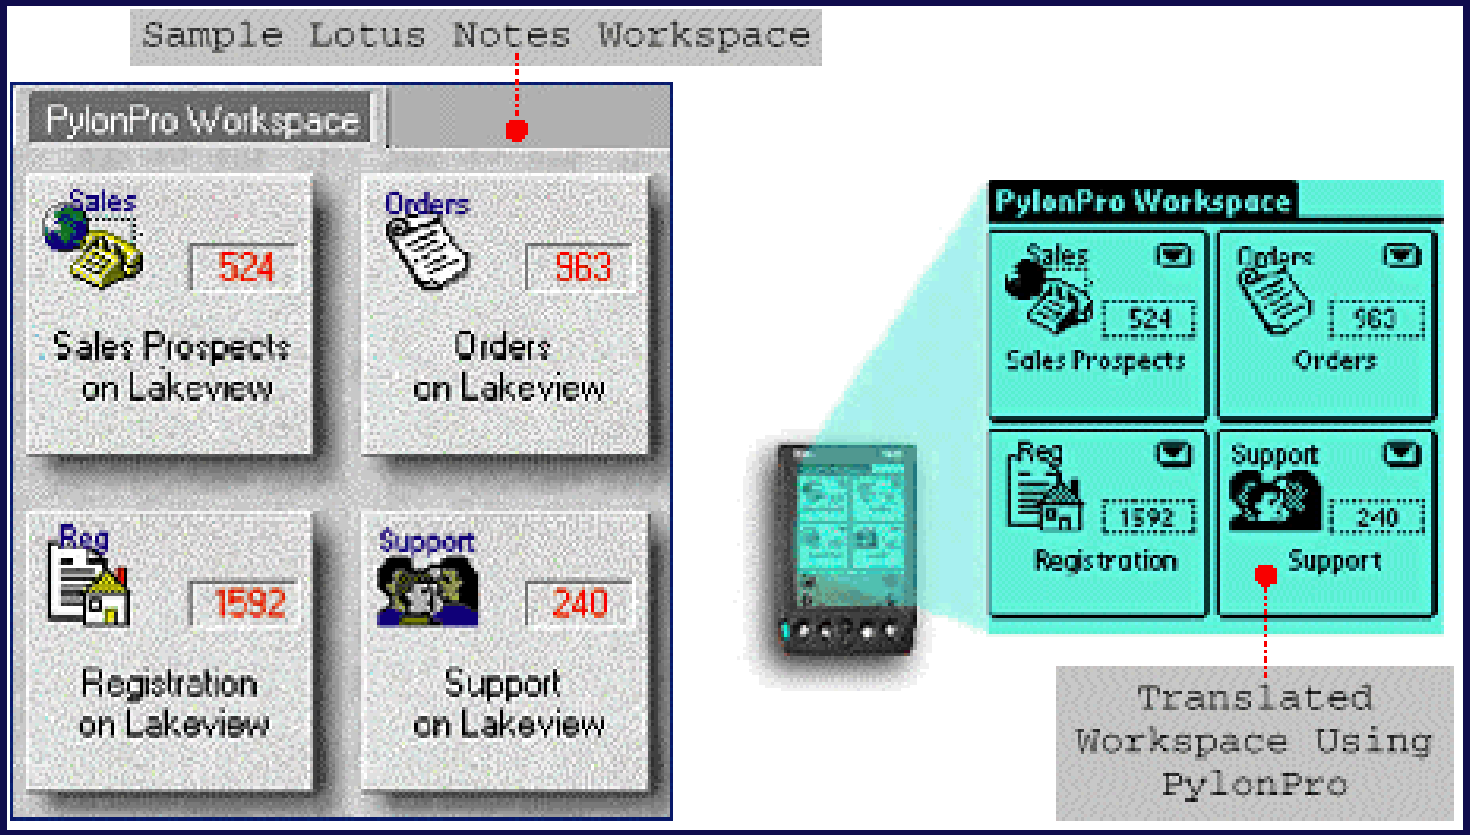

PylonPro/Pylon ServerSync

- Features
  - Tight integration with Lotus Notes/Domino and Palm OS®
  - Instant translations of Custom Forms/Applications without a development tool
  - Robust support for Notes Field Types
  - Cross Database Lookups to integrate multiple Databases
  - Full support of Palm OS Find feature
  - Change/Resize/Resort columns on the fly

PylonPro/Pylon ServerSync

PalmSource 99

- Get more information at http://www.globalware.com/
