Preface

- You can start working on the exercises or your own work
  - WCA Builder
  - Palm OS® Emulator
  - CGIs available on the server
  - Where to find the exercises
- You can listen to the short presentation first

Agenda

- Goal
  - To show that developing web clipping applications is easy and fast
- Using the Tools
- Quick Overview of HTML
- Palm and Palmcall
- Development Resources
- Exercise / Q&A

Using the Tools

- Text editor
  - E.g., Notepad
- WCA Builder
  - Windows® or Macintosh® platform
- Palm OS® Emulator (POSE)
  - Palm OS 3.2 ROM file
- Palm™ Desktop S/W
- HotSync® cradle and Palm VII™ device

Quick Overview of HTML

PalmSource 99

- Meta tags
  - PalmComputingPlatform
  - PalmLauncherRevision
  - LocalIcon
  - HistoryListText
- Input element types
  - DatePicker
  - TimePicker
- Special strings
  - %deviceid
  - %zipcode
- <SmallScreenIgnore>
- Referencing
  - Button attribute
  - Relative referencing
  - Absolute referencing
- Graphics
  - gif, jpeg—156 pixels
  - bmp—32x22, 15x9
- Unsupported items
  - Java and JavaScript
  - Nested tables
  - Frames and image maps
  - Cookies
  - Animated gifs
  - <sub>, <sup>, <link>

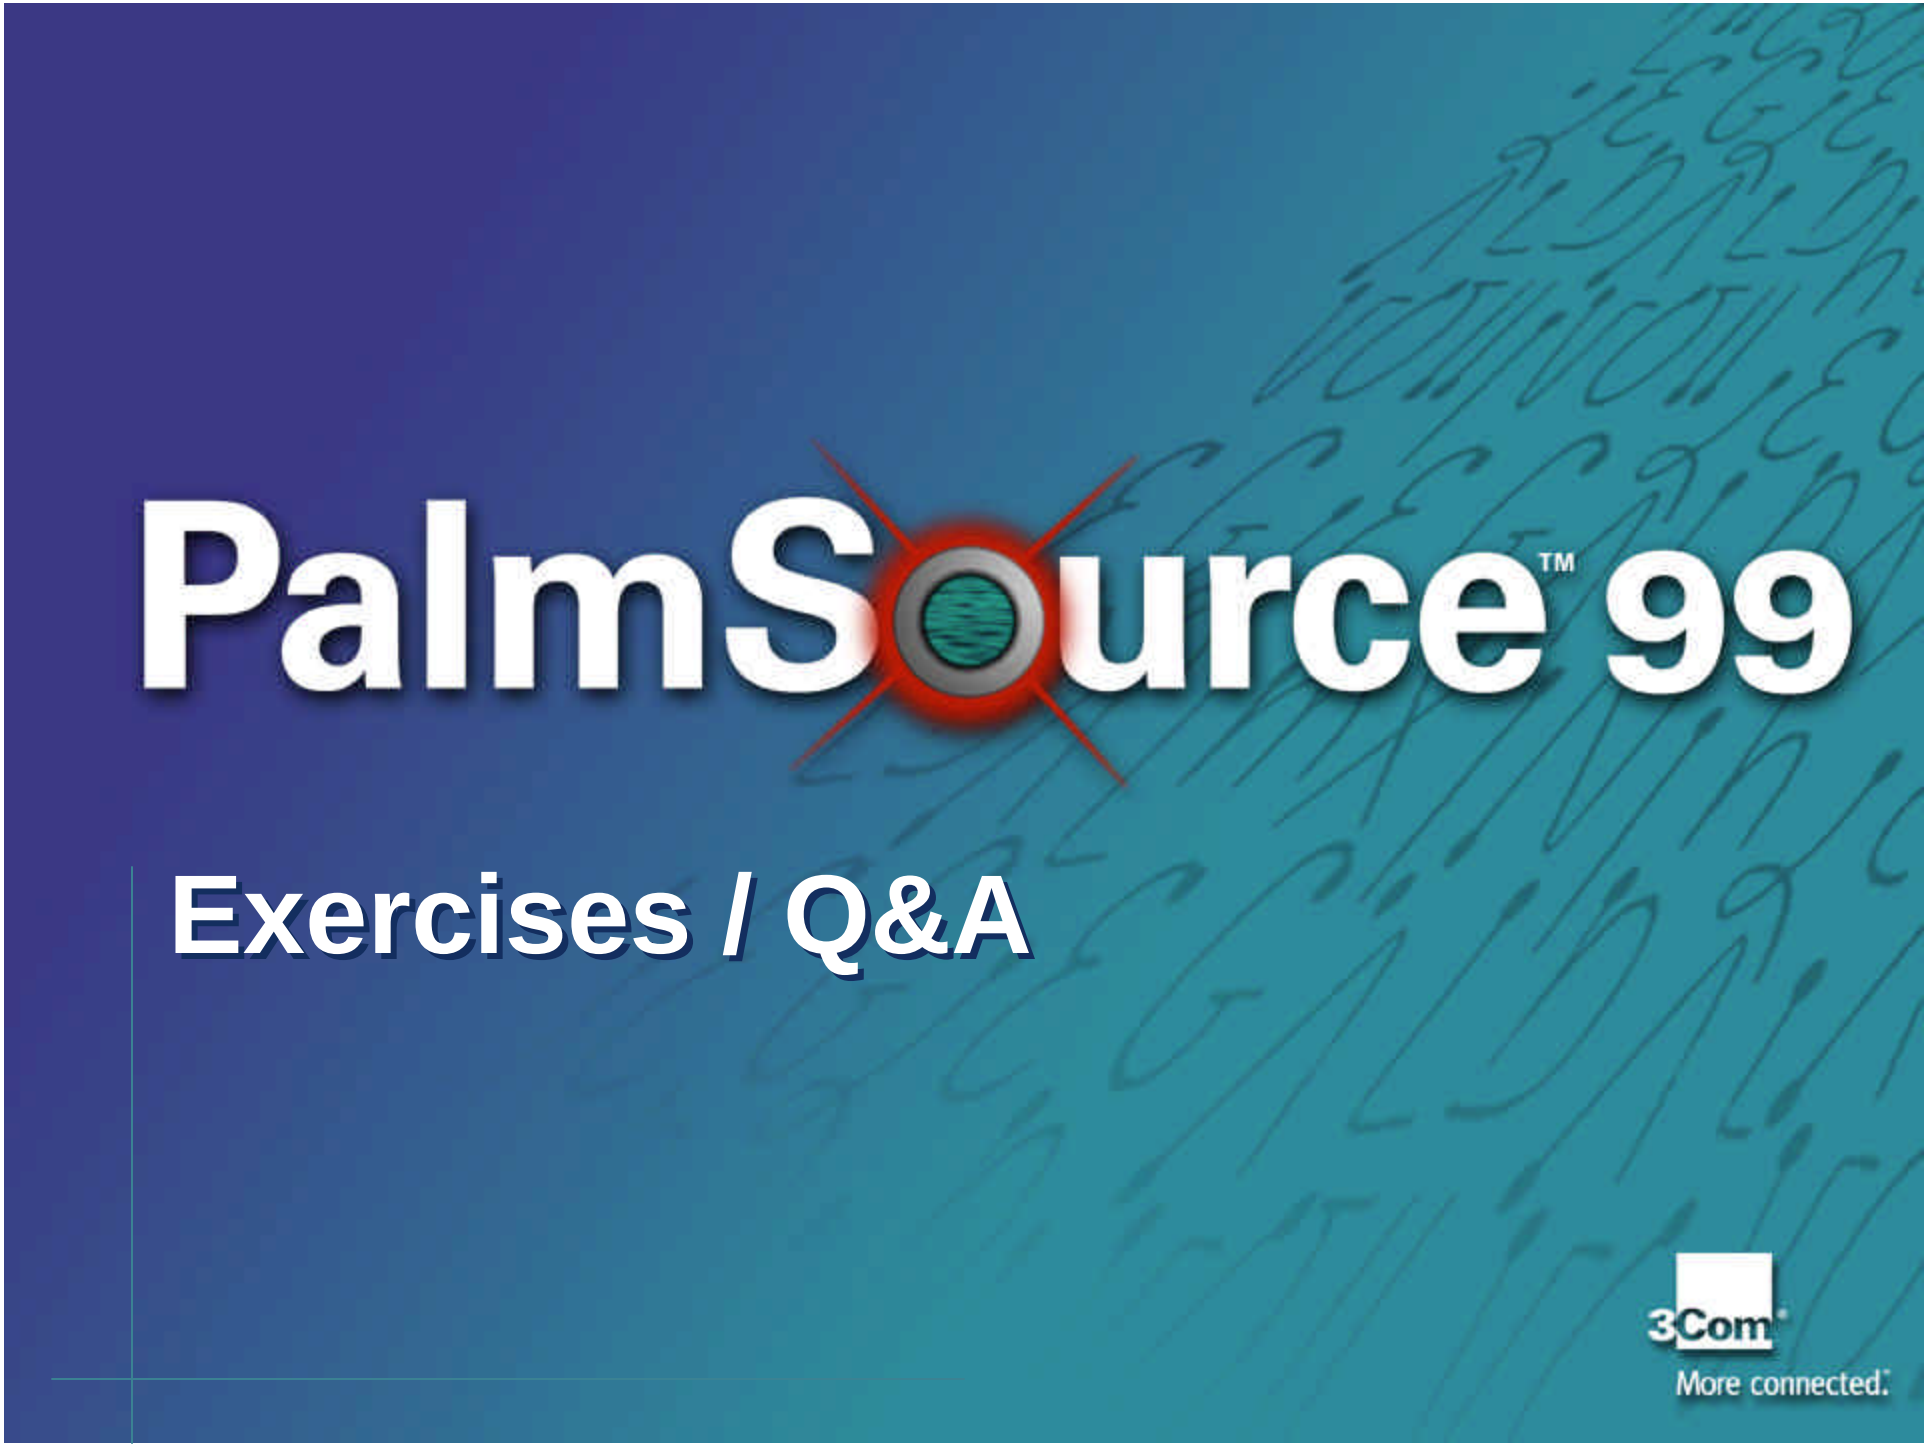

Palm and Palmcall

- Palm
  - Used to quit Clipper and call another application
    - E.g.: Memo Pad
- Palmcall
  - Similar to palm, but returns control to Clipper
    - E.g.: App
  - Application called needs to:
    - Parse arguments
    - Have means for user to quit
