Agenda

PalmSource 99

- IBM Pervasive Computing
- Relational Database Applications
- DB2 Everywhere for Windows CE and Palm OS® Software
- Application Development Tools
  - Satellite Forms from Puma Technology
  - Query By Example
- IBM Mobile Connect V2.2
- Reference URLs

Pervasive Computing

"e-business... anywhere, anytime"

Business Applications

PalmSource 99

- Cross Industry—Field Force Automation
  - Customer and product information
  - Barcode information from scanning devices
  - Insurance policy information
  - Auditing information for quality and safety apps
  - Monitoring of system information
- Industries
  - Insurance—policy information, pricing information
  - Healthcare—healthcare professionals
  - Education—student information for teachers
  - Distribution—inventory tracking
  - Retail—point-of-sale automation
  - Telecommunications—auditing equipment

Solutions for a Mobile Workforce

- DB2 Everywhere is for:
- Highly mobile workers that need a handheld, long battery power device for inventory, healthcare, shipping and other applications
- Professionals that need access to relational data as well as Lotus Notes or Microsoft Exchange
- Lightweight palmtop data applications that need:
  - A minimal relational database “fingerprint”
  - A persistent data store
  - A data store with SQL interface

Synchronization Architecture

PalmSource 99

DB2e

DB2e

Handheld devices:
Palm OS®
Windows CE

Synchronization:
IBM Mobile Connect V2.2

Windows NT Server

Any RDBMS

DB2 Family

Lotus Notes

MS Exchange

Database or other server on any platform

DB2 Everywhere Characteristics

- Small footprint relational database (~100K)
- Supports a subset of ODBC and DB2 CLI
  - JDBC coming soon!
- Designed for Palm OS® software, Windows CE devices
  - Other mobile devices coming soon (EPOC 32…)
- IBM Mobile Connect for data synchronization
  - Maps DB2 schema to DB2 Everywhere schema
  - Supports any DB2 in the enterprise (390, 400, NT..)
  - Other ODBC data sources, e.g., Oracle
  - E-mail and PIMS from Lotus Notes, Microsoft Exchange

Application Development

- Application Development with C/C++ tools
  - Metrowerks CodeWarrior
  - GNU C Compiler
- Graphical Rapid Application Development Tools
  - Satellite Forms from Puma Technology
- Sample applications available
- Query by Example app for ease of use
  - No programming required
- Simple Address book application
- Form-based healthcare application

Application Development

- Requirement: Rapid Application Development Tools
- Solution: Satellite Forms from Puma Technology support for DB2 Everywhere
  - Packaged with DB2 Everywhere beginning 12/99
- Satellite Forms provides:
  - Ease and speed of application development
  - Flexibility and power
  - Support for DB2 relational database model

Application Development: C/C++

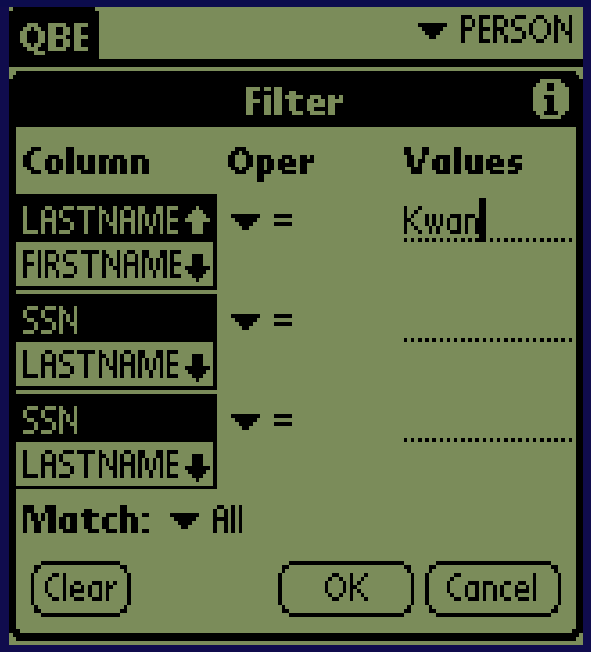

- Programming interfaces supported:
  - ODBC and DB2 CLI subset
  - JDBC is coming soon!
- C/C++ function calls can be embedded in programs to access the database
- SQL Subset designed for compact size
  - CREATE TABLE, DROP TABLE
  - INSERT, DELETE, UPDATE (records)
  - SELECT (records)
  - JOIN
  - GROUP BY, ORDER BY
  - PRIMARY KEY

Query by Example Application

- Included with DB2 Everywhere
- Select a table and view its data
- Scroll through data
  - Horizontal scroll bar
  - Vertical scroll bar
  - Scroll vertically by page
- Sort rows in ascending order
- Delete/insert/update rows and fields
- Filter data based on different criteria
- View data in new column order

Query by Example

IBM Mobile Connect V2.2

- A Sync Server: syncs palmtop applications to/from a Windows NT server
  - Lotus Notes, Personal Information Management applications, other applications, system software, system settings, Microsoft Exchange
  - Relational data apps
    - Standard .pdb apps to ODBC data sources
    - DB2 Everywhere apps to ODBC data sources
    - DB2 and Oracle server databases
  - Server Sync of many PDAs
  - Synchronizes subsets of data to individual devices
  - Performs data conflict detection and resolution specified in Visual Basic Script

IBM Mobile Connect V2.2

- Relational Database Synchronization
  - Synchronizes DB2 Everywhere palmtop applications
    - Built with Satellite Forms or other AD tools
  - Extends the power of the DB2 family of databases
  - DB2 Universal Database for AS/400
  - DB2 Universal Database for OS/390
  - DB2 Universal Database for UNIX, NT, etc.
  - Other ODBC Data sources as well
    - Oracle8i
