Big Question:

PalmSource 99

Is IT Ready For The Handheld Invasion?

So What's the Big Deal?

PalmSource 99

"More than 50% of the calls we receive in the mobile area have to do with the IS organization's struggle to manage the explosion of consumer devices invading the enterprise… During the next five years, this invasion could represent one of the greatest threats to the IS organization's efforts to stabilize the enterprise".

Gartner Group, January 25, 1999

"Coping with the Mobile Device Invasion"

How to Cope?

PalmSource 99

LEARN FROM THE PC REVOLUTION…

PROACTIVELY AND ASSERTIVELY MANAGE THE HAND-HELD EVOLUTION!

Corporate Requirements

PalmSource 99

- End-User
  - Use technology to increase efficiency
  - Easy to learn/use
  - Reliable
  - Corporate support
- IS Manager
  - Support corporate growth initiatives
  - Maintain control of technology
- Functional Manager
  - Maintain competitive advantage
  - Provide linkage to business operations
  - Support highly portable, low-cost solutions

Handheld Deployment and Management 101

PalmSource 99

- Establish handheld standards
- Incorporate handheld mobility tools within corporate IT management infrastructure
- Implement “industrial-strength” data synchronization server technology
- Support wide range of connectivity options
- Implement rigorous security measures
- Provide on-going training and support for mobile users

Device Management

PalmSource 99

- Enterprise standards
  - Adding Palm devices to the “standards” list
  - Standardize on platform/OS, not device
- System management
  - Monitor free memory, battery level, etc
  - Centralized error tracking, activity monitoring
  - Extend existing enterprise management solutions
- Software distribution
  - Publish updated applications
  - Maintenance of conduits
- Consider device cost vs. management cost

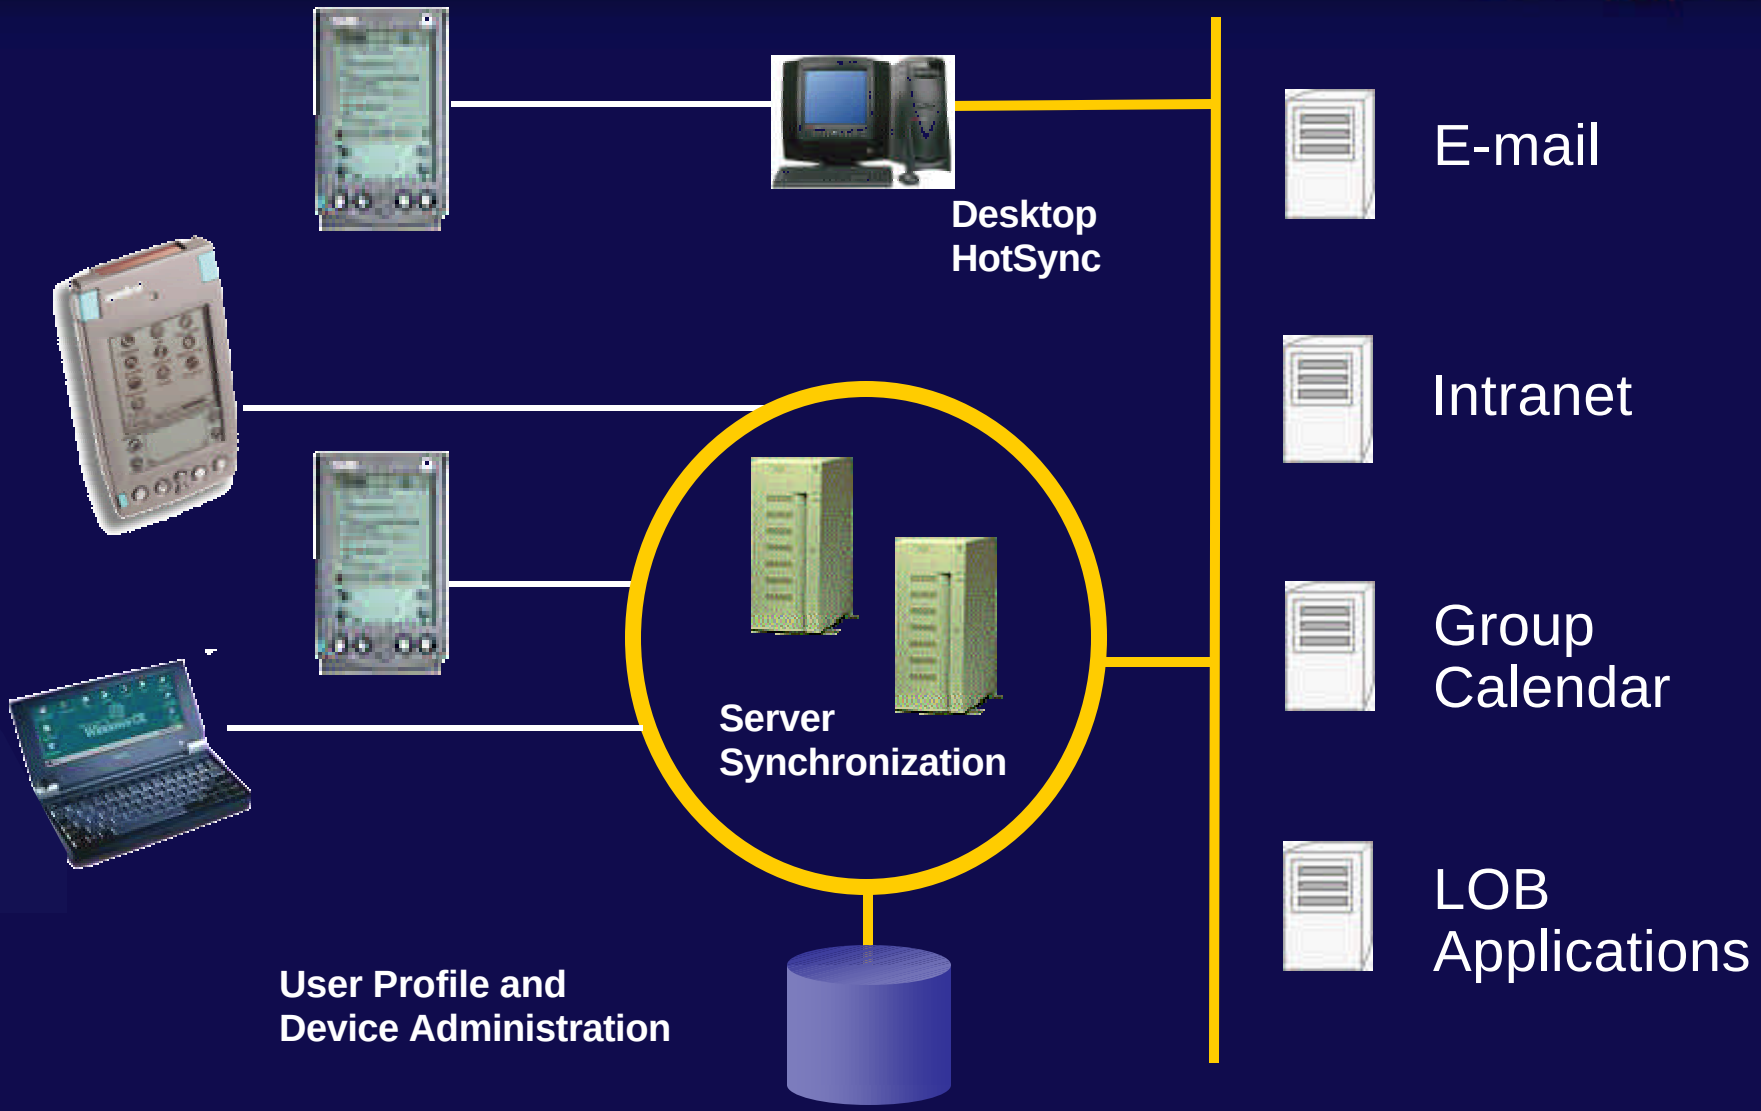

Palm Platform Products

PalmSource 99

- Palm™ Devices
  - Palm III / IIIe / IIIx
  - Palm V / Vx
  - Palm VII
- Licensee Devices
  - IBM Workpad
  - Franklin Covey PIM
  - Qualcomm PDQ
  - Symbol SPT 15XX / 17XX
  - Handspring Visor

Enterprise Synchronization

PalmSource 99

Data Synchronization

- Multi user environment
  - Standard HotSync uses the 1-user, own PC model
  - Replace with multi-user, central server model
- Users need to access data from any location
  - Remote workstations
  - Ethernet cradles
  - Wireless
  - Modem
- Integrate server-based data with user's own (local) PIM data

Server Synchronization

PalmSource 99

- Centralized management and administration of users, devices, applications
- Direct synchronization with server-based data
- Multiple concurrent users
- Unquestioned data security and integrity
- Scalable
- Open interface for application, device, and administration

Connectivity Options

PalmSource 99

- Mobile user access
  - Server sync removes requirement for “home” PC
  - Connect with TCP/IP client (replaces HotSync)
- TCP/IP allows numerous access options:
  - Local LAN-based access
  - Wireless LAN
  - Dial-in using modem, RAS, PPP
  - Wireless WAN access through proxy service
- Difference options have different features
  - Consider available bandwidth, various synchronization options

Connectivity Options

Security

- Device security
  - Password-protect Palm devices
- Data security
  - Smart-cards, tokens (Palm based or separate)
- Central administration
  - Monitor activity from server
  - Administrator control over user accounts
  - Account lock-out, password controls
- Security-related products
  - Secure Computing
  - Certicom

Some Enterprise Solutions

PalmSource 99

- Data access
  - IBM (DB2)
  - Sybase (Sybase)
  - Oracle (Oracle8)
- System/device mgmt
  - CA (TNG)
  - Puma (IntelliSync)
  - Riverbed (Scout/IT)
- Enterprise applications
  - Oracle (ERP, CRM)
  - Remedy (Helpdesk, CRM)
  - SAP (ERP)
  - PeopleSoft (ERP)
- E-mail, Groupware
  - Lotus (Notes, Organizer)
  - Novell (Groupwise)
  - Microsoft (Outlook)

Enterprise Service and Support Is Available

PalmSource 99

- Palm Computing formalizing its enterprise experience into expanded programs
- Formal program will include:
  - Help Desk training and certification
  - Support line
  - Support Web site, including knowledgebase and SRO (Service Repair Order) capability
  - “Hot swaps”
  - Extended warranty

Summary

PalmSource 99

Keys to success:

- Establish corporate handheld standards
- Incorporate handheld mobility tools within corporate IT management infrastructure
- Implement “industrial-strength” data synchronization server technology
- Support wide range of connectivity options
- Implement rigorous security measures
- Provide on-going training and support for mobile users
