Key Partners: Palm, Symbol, Oracle, CA, Aether

Key Customers: MCI, Sony, Oracle, AT&T, USPS, BD

Palm HotSync® Server

PalmSource 99

The Enterprise Opportunity

- Business Requirements
- Technical Requirements
- Market Perception and Support

Palm HotSync® Server

PalmSource 99

Business Requirements

- Scalable, concurrent user synchronization and management
- Administered by enterprise IT
- Extensible to enterprise applications
- Supports low TCO
- Multiple handheld platform support
- Proven platform with installed customer base equals short time to market

Palm HotSync® Server

PalmSource 99

Technical Requirements

- Conduit extensibility model
- Palm user is not the integrator
- Easy to install and manage
- OOB value
- Thousands of registered users

Palm HotSync® Server

PalmSource 99

Market Reception

- Press and analysts briefed - look for stories
- Palm is making commitment to enterprise market
- Solution driven by customer requests
- Support from Sybase, Tivoli, Computer Associates
- Working with other server vendors

Palm HotSync® Server

PalmSource 99

Release 3.5 Product Overview

- Wireline or wireless access
- Palm OS and Windows CE supported
- Install/remove device applications
- Administer individual users and groups
- Conduit API & SDK supports MS COM
- Standard and premium support
