401 Overview: Tools for Enterprise Development

Ezekiel Sanborn de Asis
Michael Knopp
DTS Engineer

PalmSource
Conference 2000

Overview

- Tools night tonight!
- Tools Round Table today at 3:30
- Platform Horizontal Tools tomorrow
- http://www.palmos.com/dev/tech/tools/

CodeWarrior + Constructor

Features

- Standard for Palm OS Development
- Metrowerks C/C++ Compiler
- Source- and Assembly-level Debugger
- Integration of Palm OS® Emulator (POSE)
- Code Templates for Standard and Multi-Seg App
- Drag and Drop Form Design w/ Constructor
- Version Control

$369

Lite Version Available FREE

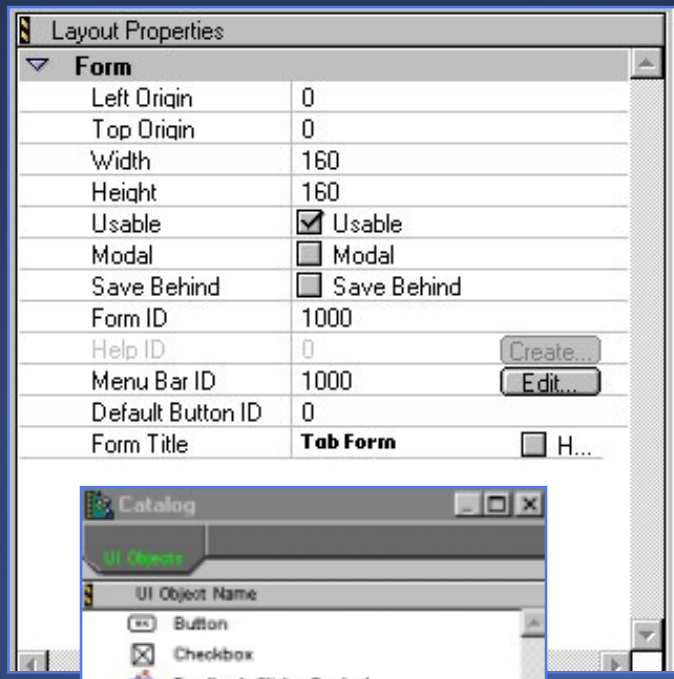

WIN 98/NT/2000

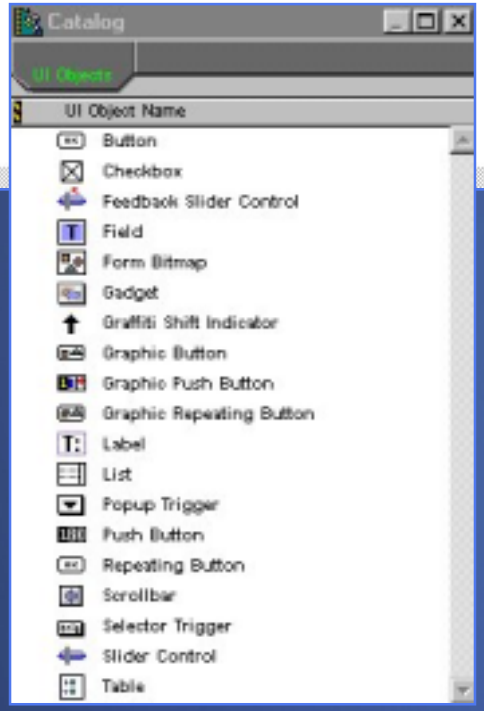

MAC 8, 9.x

Palm OS

CodeWarrior + Constructor

PalmSource Conference 2000

CodeWarrior + Constructor

- Why to Use This Tool?
  - Scalable
  - Reliable
  - Well Supported (Many books assume you use)

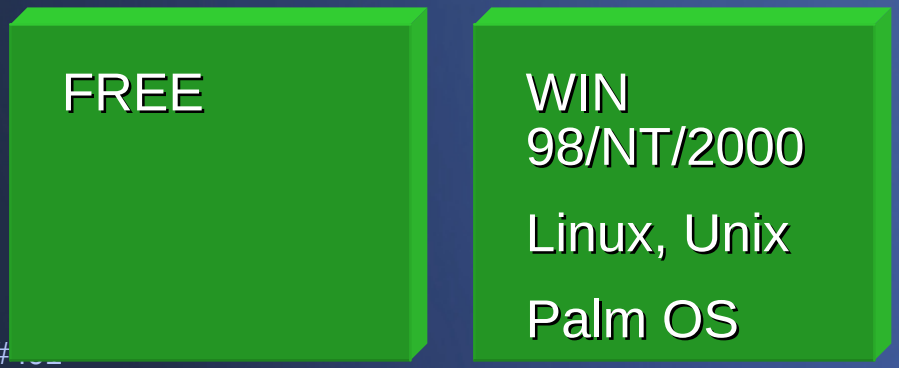

- http://www.palmos.com/dev/tech/tools/cw/
  - Get the debugger plugin from the web page and update the SDK

PRC-Tools + PilRC

Features

- Complete Tool Chain to make Palm OS® Apps
- GCC Compiler, GDB Debugger, and various post-linker tools to produce Palm OS .PRC files
- Generate UI from resource scripts w/ PilRC
- Supported by Palm

- Why to use this tool?
  - Scalable, Flexible, Develop on Linux
- http://www.palmos.com/dev/tech/tools/gcc/

Falch.Net IDE OR VFDIDE

Features

- Integration of PRC-Tools Tool Chain
- WYSIWYG UI development
- Complete Resource Editor
- Code Wizards and Templates for standard Palm OS apps, Multi-segmented Apps, and Shared Libraries
- Look and feel similar to Visual C++

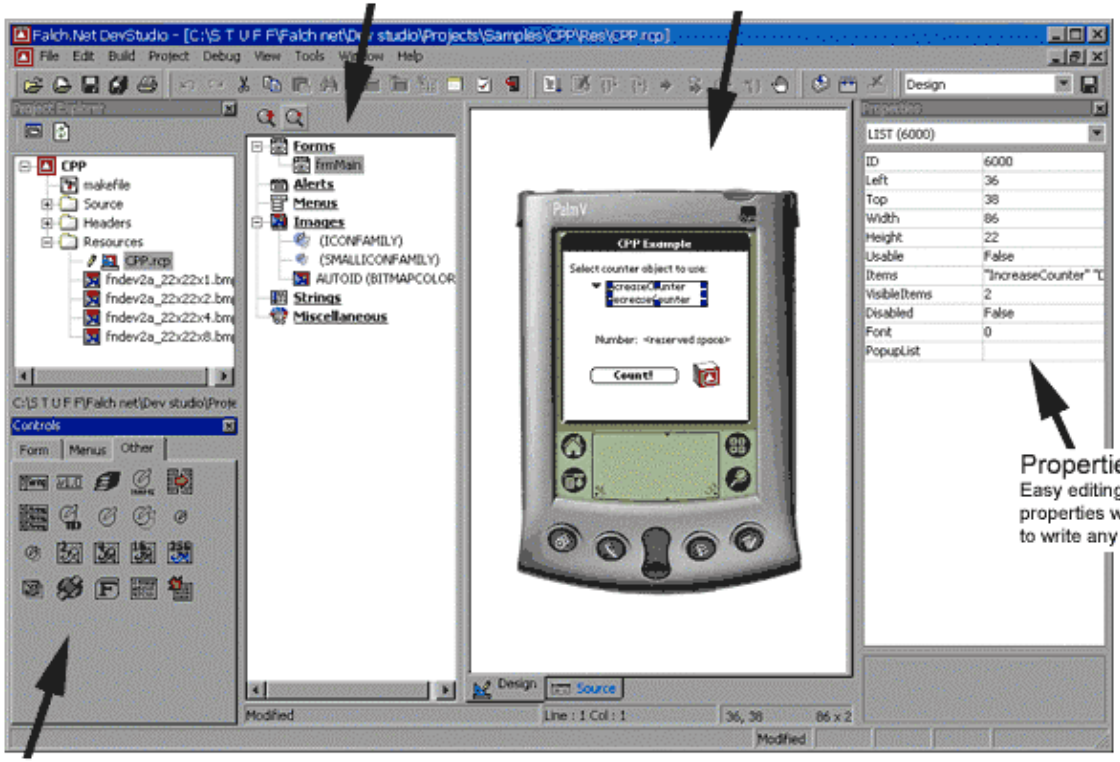

- Why to use one of these tools?
  - Scalable, Familiar Look and Feel, Flexible
- Take a good look at both!

Falch.Net IDE

Resource Explorer
Allows for easy overview of all resources in a script

Editor
Full WYSIWYG editor for Palm OS forms

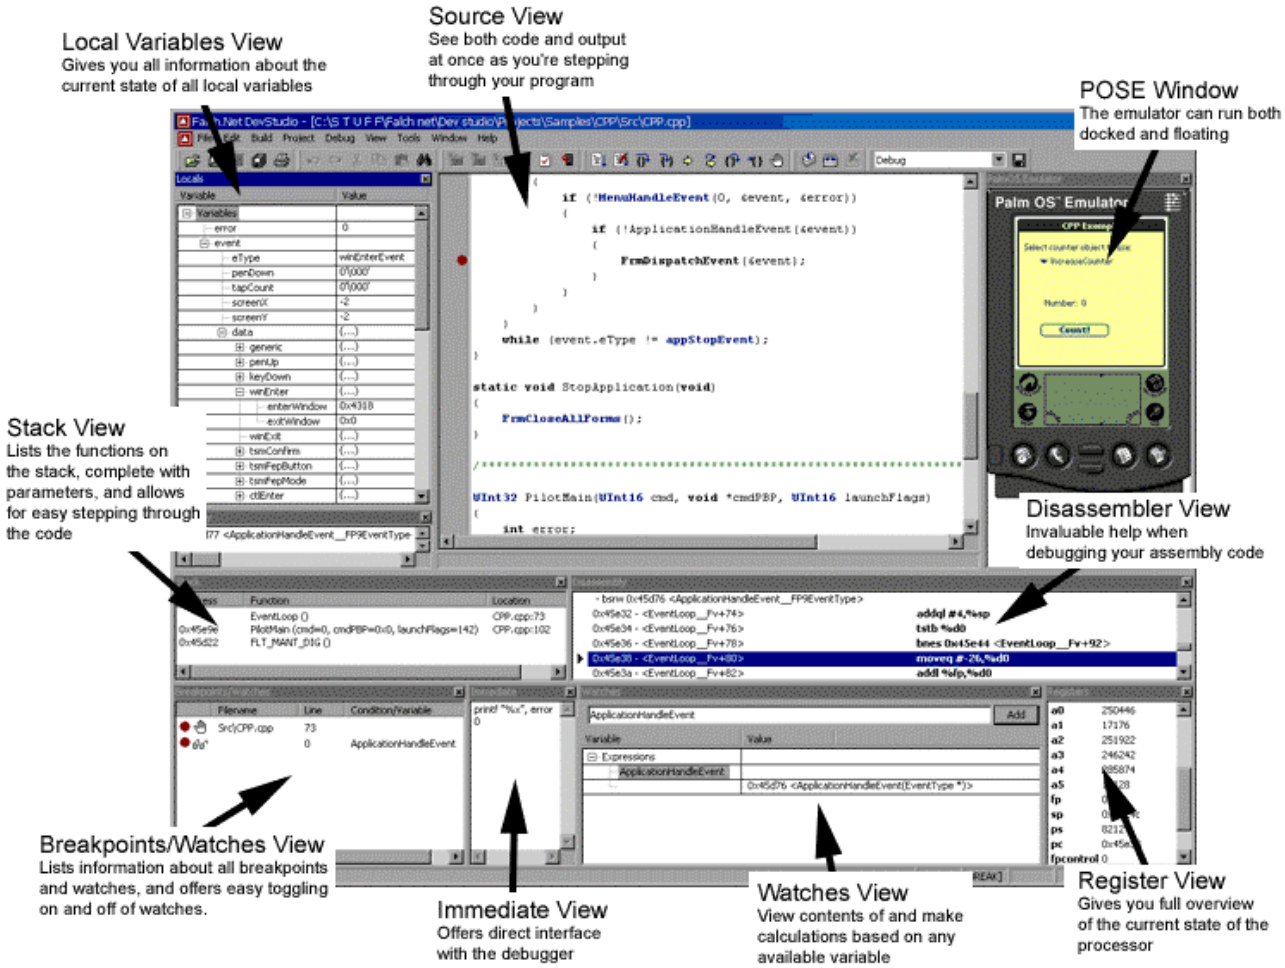

Properties Editor
Easy editing of resource properties without having to write any scripts

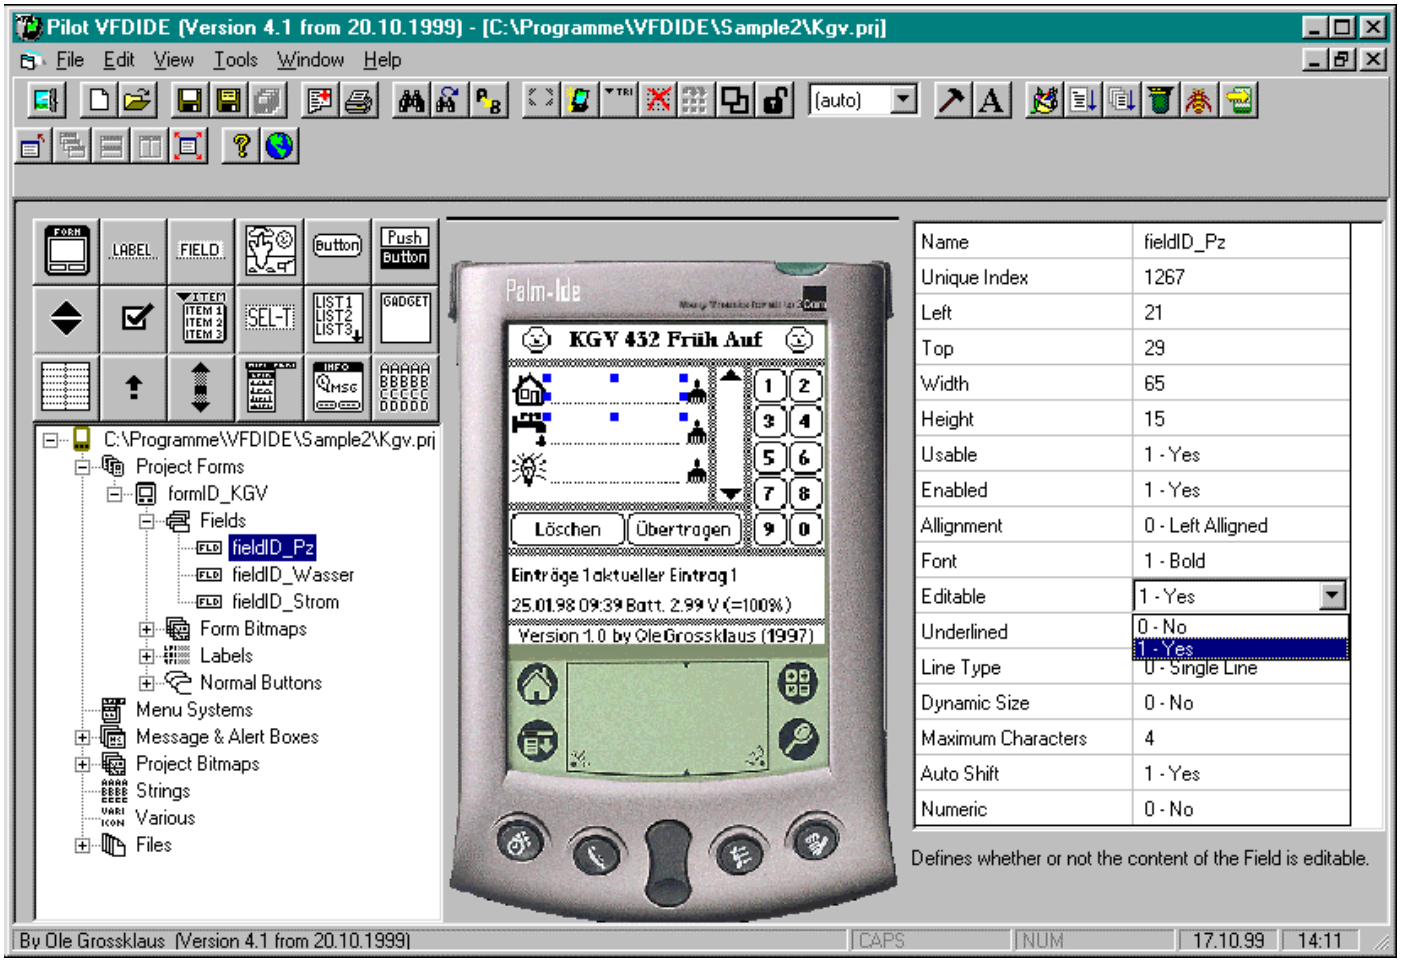

Controls Palette
All Palm OS resources only a mouse-click away

http://www.falch.net

Falch.Net IDE

VFDIDE

http://www.vfdide.com/

PalmSource Conference 2000

VisualAge Micro Edition

Features

- J9 Virtual Machine for Palm OS
- IBM Visual Age IDE
- Supports Multi-Threads on the Palm
- Collaborative Package adds version and release tools and the team repository

- Why to use this tool?
  - Java Development, IBM Level Enterprise Support
- http://www.embedded.oti.com/

142K VM
47K Debug
80K Base Class

Individual FREE
Collaborative $99

WIN 98/NT/2000
Linux
Palm OS

RAD and VB Tools

- WSIWYG Application Design & Form Building
- Drag and Drop Palm UI Objects
- Some sort of scripting language
- Automated Data Management on Palm Powered™ handhelds
- Runtime Engine

Satellite Forms

Features

- Satellite Forms conduit synchronizes between Palm and dBASE databases on the desktop
- Linked to Microsoft Access or other ODBC compliant database that supports dBASE databases
- Extensible through SFX Plug-ins and Controls
- Comes with extensions like Symbol Bar Scanning

Free 300K Virtual Machine

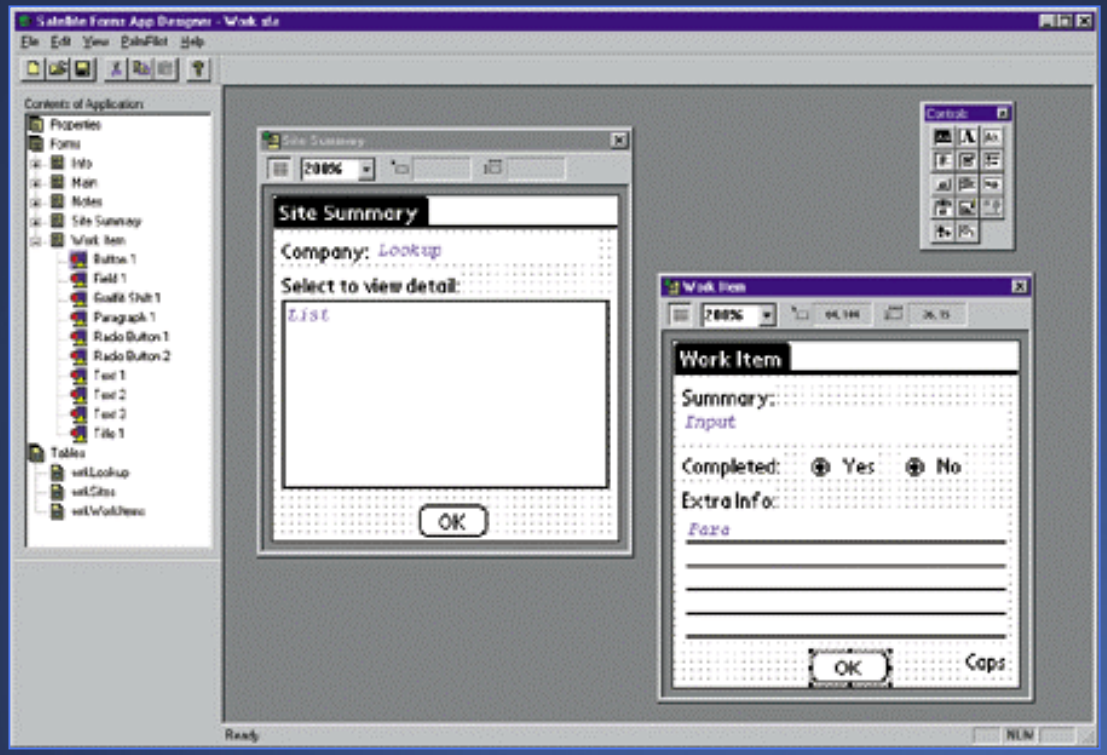

W/O Server $695

W/ Server $995

WIN 95/98/ 2000/NT

Palm OS 2.0–3.5

Satellite Forms

- Why to use this Tool?
  - Reliable
  - Visual Basic Like
  - Scalable

Satellite Forms

- Satellite Forms Server
  - Admin of users, groups, and applications
  - Data security
  - Real-time data access
  - Full sync of data via auto built server conduit
- Recommend “Palm Programming in 24 Hours”
- Trial Edition available from website
- http://www.pumatech.com/products.html

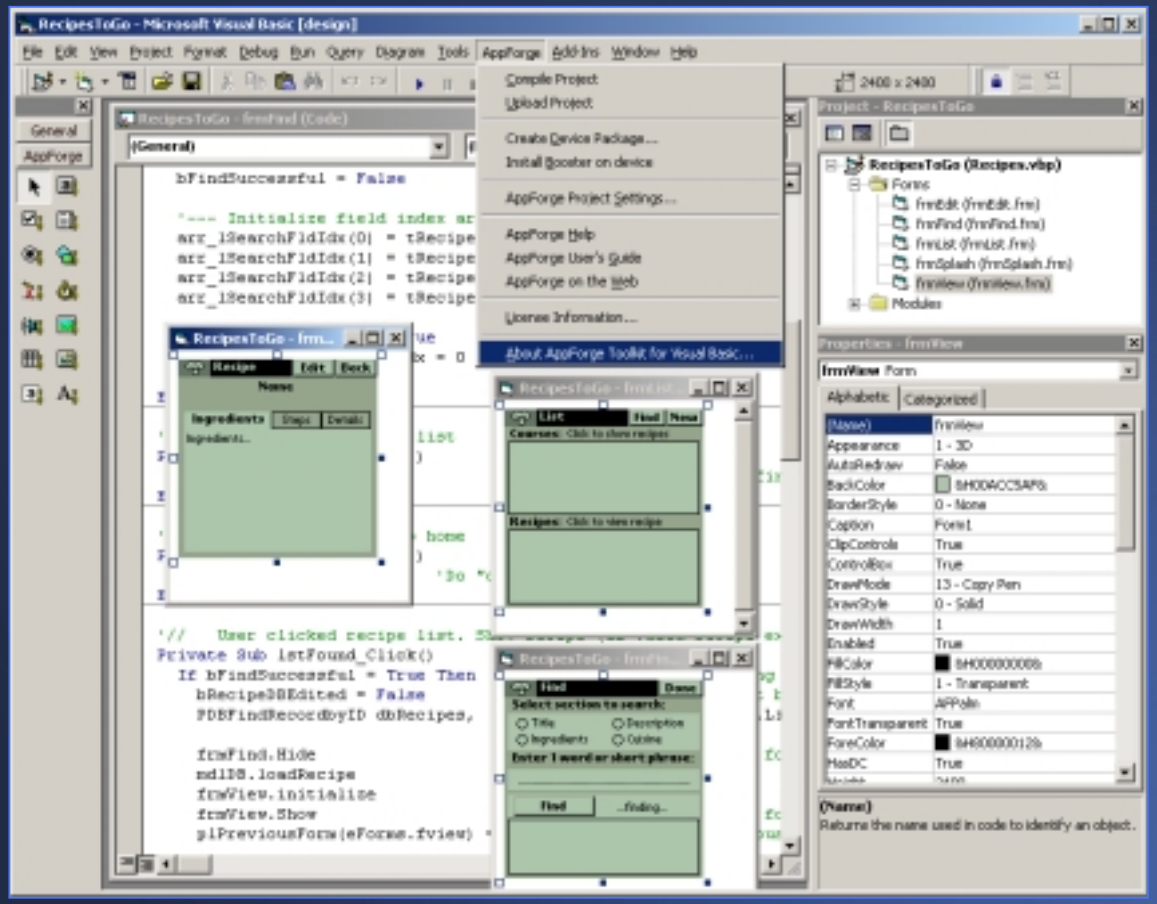

AppForge

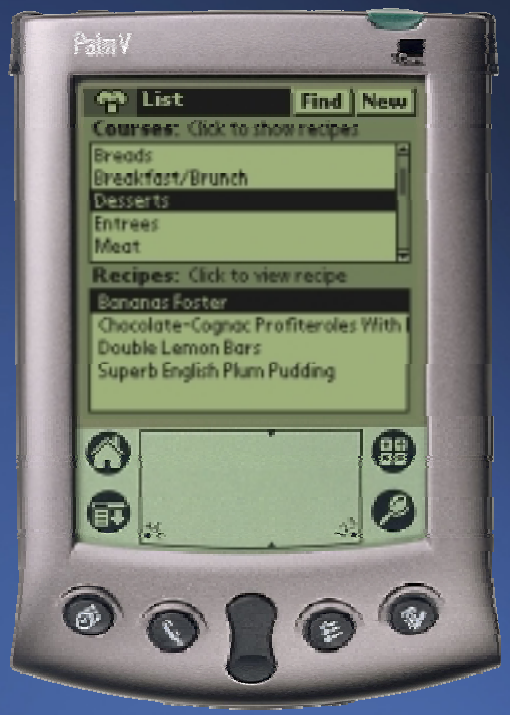

Features

- Develop in MS VB with standard VB commands
- True line-by-line debugging in the IDE
- Compile as Windows Executables for testing then compile as Palm .prc
- 300K Runtime Engine free to anyone
- Standard Palm .pdb support
- MS Access® to Palm .pdb converter
- Full database synchronization to any ODBC database

AppForge

- Fully functional trial version available at www.appforge.com

ScoutBuilder

Features

- Works specifically with ScoutSync or HotSync Server so no conduit is needed
- Basic Like Scripting Language
- Code Wizard

- http://www.aethersoftware.com/scoutware_family/sbuilder_index.php3

NS BASIC

Features

- Visual Basic Like environment
- Creates and uses standard Palm DB on the handheld so conduit development is easy
- file I/O, serial I/O, trigonmetric and statistical functions
- Color Device Support
- No Table, IR or Barcode Scanning Support

- Why to use this tool?
  - Simple, Visual Basic Like

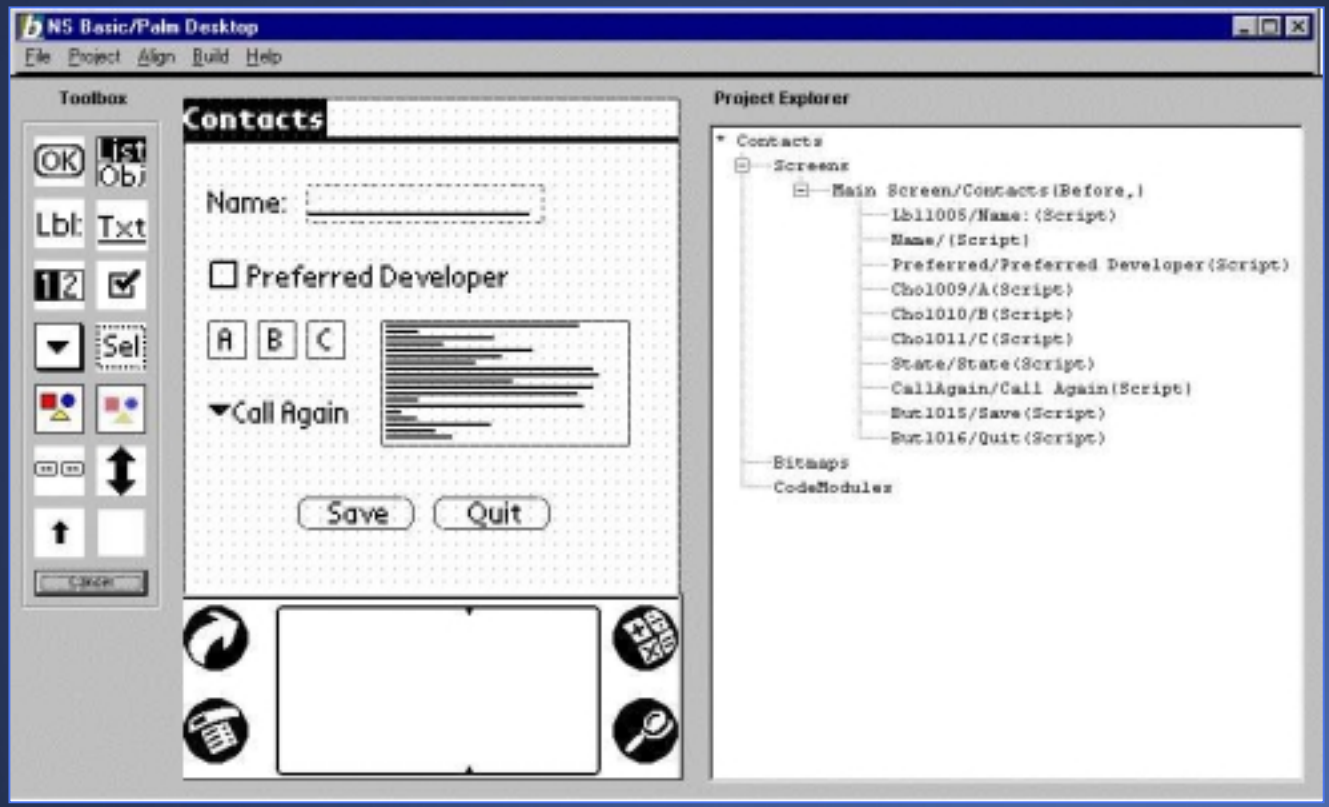

Free 77K NSB Runtime

99.95 + No Runtime

WIN 95/98/ NT/ME/2000

Palm OS 2.0–3.5

NS BASIC

http://www.nsbasic.com/palm/

Database Management Tools

- VERY, VERY Rapid Development
- Little to no programming needed
- Excellent for collection and organization of data

Pendragon Forms

Features

- Pendragon Manager creates Palm App and MS Access Tables to go with it
- Also, create app from existing MS Access Tables
- Pre-built Conduit Syncs to MS Access, or to other ODBC DB through Access or ADO
- Query and Submit via Palm VII
- Up to 250 fields per form
- Input validation, scripting and branching
- Barcode Scanning, Signature Capture etc.

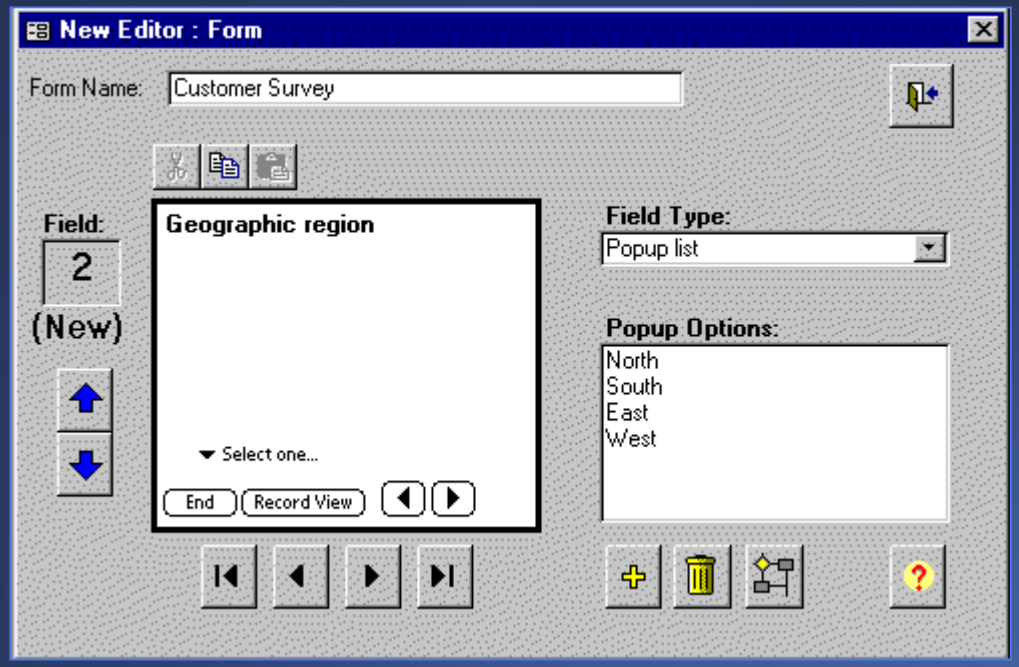

Free 200K Runtime Engine

99.95 + No Runtime

WIN 95/98/ NT/2000

Palm OS 3.0 and up

Pendragon Forms

- Why use this tool?
  - Scalable
  - Reliable
  - Full solution in very little time

Pendragon Forms

- Recommend “The Official Pendragon Forms for Palm OS Starter Kit”
- http://www.pendragonsoftware.com
- Trial version on Website

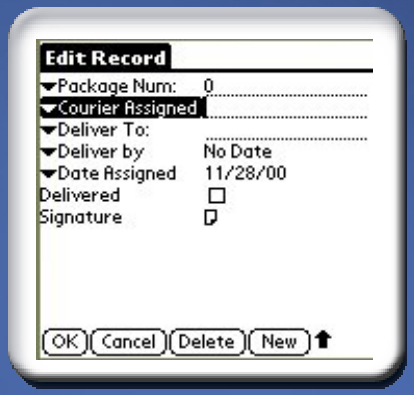

- See also Pendragon SyncServer
  - Sync with Enterprise DB via TCP/IP over LAN, Internet, Wireless Modem

Other Database Management Tools

- Small Relational DB that runs on and can be created on Palm OS® handhelds (desktop designer as well)
- Filter, sort and create reports from data
- Premade applets available

HanDBase
- Export to Excel, CSV, Word, HTML, XML
- 30 Fields per form

ThinkDB
- Convert Access DB to ThinkDB app
- Smart List of commonly entered values
- 36 fields per form

Other Tools

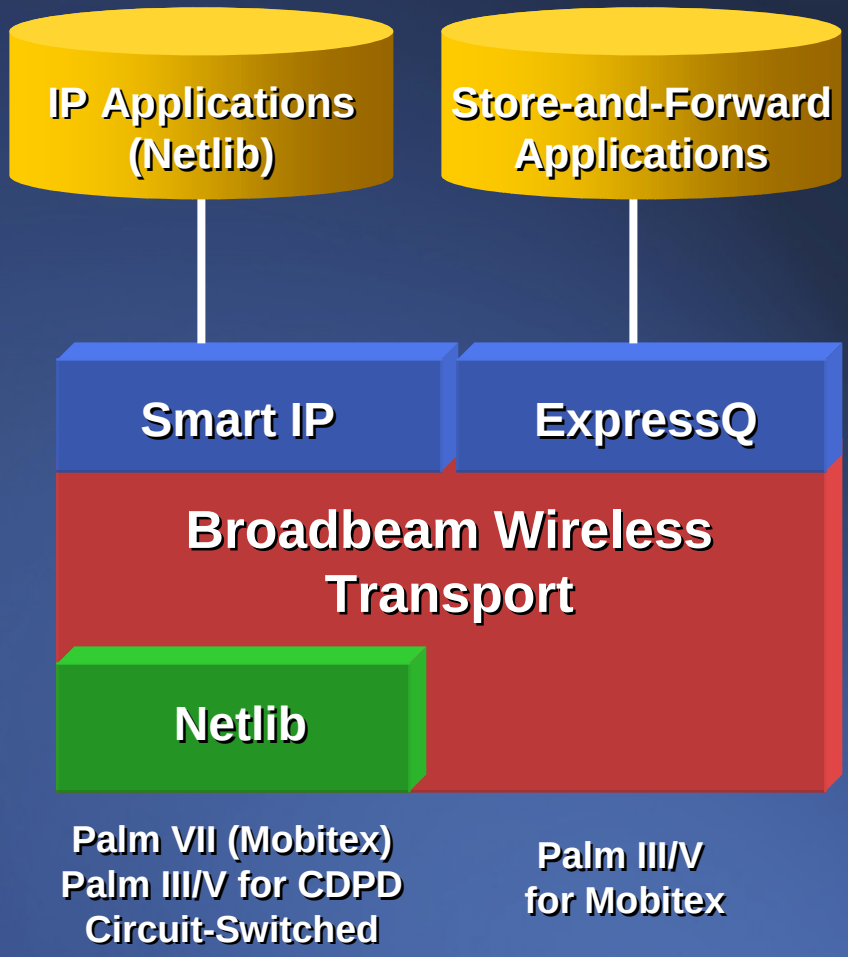

WaveLink

- Platform to create real-time wireless Palm OS apps running server side
  - Mainly via Symbol 1740 device with wireless ethernet card
  - Application running on Windows NT/2000
- Development in any Active-X based language
- http://www.wavelink.com/wavelink/studio/studiopalmnews.asp

Other Tools

BroadBeam

- IP-compatibility for non-IP based networks
  - Direct, secure access to enterprise applications behind firewall
- Store-and-forward message queuing, push message delivery and security

- http://www.broadbeam.com

Other Tools

Sybase SQL Anywhere Studio—UltraLIte

- Embedded, custom built relational DB with built-in sync capabilities
  - Custom built = small (50 to 200K ish)
  - Access with static SQL commands
- Syncs to any ODBC data source
  - Pre-built conduit to Sybase's MobiLink and then out to any external DB
  - MobiLink server takes care of data extraction and conflict resolution
  - Includes scripts to ASA, Sybase Adaptive Server, MS SQL Server and Oracle DB

Other Tools

Oracle 8iLite

- Optimized Object-Relational database for the Palm OS platform
  - 50 Kb footprint
  - Use SQL, C or C++ to access the database
- Best synchronization to Oracle 8i databases
  - iConnect Consolidator for fast refresh
  - Supports Serial, HotSync® and HTTP transports
  - Ideal for Oracle database shops

Conduit Development Tools

- EHAND Connect
- Palm CDK
- Palm HotSync® Server

EHAND Connect

- Write custom conduits using Visual Basic or any COM-enabled language (Java,Delphi…)
- Easy to use, create a running conduit with less than 30 lines of code
- Free developer license with 2 restrictions
- Other licenses ($10 or $20 per end user)

EHAND Connect

- Features
  - Use Visual Basic to create conduits
  - Hides low level complexity (byte ordering, calling conventions, etc.)
  - Easy integration with other Windows components via COM (ODBC, MS Access, MS Office, etc.)
  - Wizard conduit installation process
  - Includes full sample codes, thorough reference manual, and developer's guide

EHAND Connect

- Why you want to use EHAND Connect
  - Fast custom conduit development
  - Easy to program (Visual Basic or COM-enabled)

- http://www.ehand.com

Palm CDK

- Palm Conduit Development Kit
  - C/C++ Sync Suite
    - C/C++ conduits, Mac and Windows
  - Sync Suite Java
    - Java conduits, Windows
  - COM Sync Suite
    - Visual Basic Conduits, Windows
- Free download
  - http://www.palmos.com

Palm CDK

- Features
  - Conduit Wizard and Starter Code
  - Sample code for all standard Palm applications
  - SyncManager API
  - Synchronization Base Classes or Objects
  - Conduit Inspector for conduit debugging
  - Conduit Installer

Palm CDK

- Why you want to use the Palm CDK
  - Free
  - Sample Code, knowledge base, support
  - Visual C++, Visual Basic, Java

- http://www.palmos.com

Palm HotSync® Server

- Microsoft Exchange conduit (E-mail and calendar)
- Comprehensive console-based management
- Open architecture
- Wireline and Wireless support
- Available from selected Palm resellers
  - www.palm.com/products/enterprise/server.html

Palm HotSync® Server

- Features
  - Concurrently synchronize hundreds of Palm™ handhelds with enterprise data and services (e-mail, calendars, databases, etc.)
  - Application development and customization
  - Centralized administration, backups, application distribution, etc.
  - TCP/IP support for remote synchronization

Palm HotSync® Server

- Why you want to use the Palm HotSync Server
  - Robust enterprise solution
  - Application development and customization

- www.palm.com/products/enterprise/server.html

Developing for HotSync® Server

- Development tools are available from Aether Systems, Inc.
- Aether ScoutSync Server v3.5 and HotSync Server v3.5 are equivalent in functionality
