Conference 2000

Springboard Module Development

Handspring
Developer Relations

PalmSource
Conference 2000

Agenda

- Objective:
  - Overview of Springboard development
  - Development milestones
  - Valuable resources to support your development
- Topics
  - Why Springboard™?
  - Register with Handspring as a developer
  - Architect your product
  - Build and test a prototype
  - Register and verify your module
  - Prepare to launch your module
  - Launch your module

PalmSource Conference 2000

Why Springboard™ ?

- Handspring is your partner from start to finish!
- Handspring's handheld computers are based upon the most successful handheld computing platform, the Palm OS®
- The Springboard Platform is the easiest and most robust expansion system
  - Designed from a user perspective
  - True "Plug & Play" simplicity (self installing and de-installing)
  - Unique open-faced design provides flexibility for real-world solutions
  - Flexible power management

Register with Handspring as a Developer

- All Developer tools and documentation are free
- There are no royalties to build or distribute Springboard modules
- Free self-certification test for compatibility testing
- Sign-up for Handspring's No Cost or Premier Programs at www.handspring.com
- No Cost Program
  - Email support for marketing and technical questions, but no guaranteed response time
  - Access to FAQs, technical notes, and resources
  - Take advantage of marketing programs, including eCommerce, channel marketing, national and international distribution, press release support, collateral inclusion, and tradeshow participation

Register with Handspring as a Developer

- Premier Program
  - Email support for technical questions with guaranteed highest priority turnaround
  - 1 co-funded submission to Quality Partners for Springboard compatibility testing—Springboard Gold certified mark
  - Access to FAQs, technical notes, and resources
  - First access to marketing programs, including channel marketing, national and international distribution, press release support, collateral inclusion, and tradeshow participation
  - Access to Premier only marketing programs like National Advertising, Database marketing and more
  - 20% discount on the purchase of Visor/Visor Deluxe, Visor Platinum and/or Visor Prism, with a maximum of 20 total units per year
  - 20% discount on the purchase of select Handspring accessories

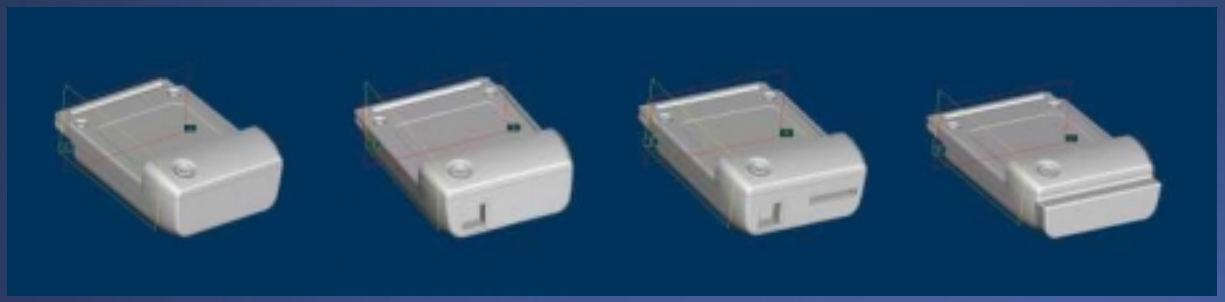

Architect Your Product

- ***Think about our plug & play "philosophy"***
- General Development Information
  - Developer Kit Manuals
    - Springboard Development Manual (rev. 1.1)
    - Product Development Manuals
  - Application Notes and Presentations
  - Standard Palm OS development
  - Consulting Services
- Software Development Information
  - Environments
    - Palm OS GNU Tools
    - MetroWerks CodeWarrior
  - Tools and Utilities
    - Palm OS Emulator (POSE)
    - Utilities: i.e., CardUpdaterMakerSDK, FileTransferSDK

Architect Your Product

- Mechanical Development Information
  - Springboard module design files
  - Springboard module mechanical inspection document
  - Reference Design: Standard and Battery Module
  - Other resources: ATL and Novus Technology

- Electrical Development Information
  - Springboard electrical timing
  - Diagnostic reference modules and extender boards:
    - eFig.com, Pacific Micro Instruments, Riverside Technology…

Build and Test a Prototype

- ***Think about our plug & play "philosophy"***
  - Automatically run application and initialize hardware
  - No need to insert any CD!
    - ⇒ You need memory on your Springboard module:
      - » Flash, OTP or Masked ROM
- Making module ROM Image
  - Palm-make ROM
- For test, development and reference:
  - Get diagnostic reference module and Extender Cards
  - Reference sample code

Register and Verify Your Module

- Register Your Application and Module:
  - ⇒ Application:
    - ⇒ http://www.palmos.com/dev/tech/palmos/creatorid/reg.html
  - ⇒ Module ID
    - ⇒ www.handspring.com/developers/module_registrationid.jhtml

- Verification and Testing
  - ***Think about our plug & play "philosophy"***
  - Springboard compatibility testing: on the web
  - Self-certification however…
  - New partner that will do compatibility testing for you!

- Handspring is your partner from start to finish!

Prepare to Launch Your Module

- Production of Content Modules
  - Developers use the Palm Make-ROM utility from Handspring to build the .prc application files into .bin binary ROM image files
    - Provides true plug & play
  - Production of Software/Content Modules from Handspring's recommended vendor
    - Smart Modular: http://www.mobilemodules.com
    - OTP ROM
    - Mask ROM
      - Minimum quantity = 2500 units
    - Flash ROM

Prepare to Launch Your Module

- Production of Hardware Modules
  - Components
    - Flash
    - Tantalum capacitors
    - Connectors
    - Tooling if necessary
  - Regulatory certifications
    - FCC
    - CE
    - VCCI

Prepare to Launch Your Module

- Marketing Considerations
  - Packaging Guidelines
    - http://www.handspring.com/developers/modulepkgguidelines.jhtml
  - Springboard Compatible logo:

  - Marketing Collateral
- Handspring is your partner from start to finish!

Launch Your Module

- On-line Launch program:
  - Launch at the PalmGear co-branded store
  - Handspring Home page exposure
  - Handspring Springboard module news page feature
  - Press release support
  - End-user newsletter feature
- Retail Channel Launch and Programs
- Press Release Support
- Additional Programs
  - Tradeshow and Event Participation
  - Advertising and Marketing Programs
  - Handspring Add-On Product Catalog
