Computer Associates Extends Management of Palm OS® Devices

Joe Pascal
Director of Marketing
Computer Associates International

PalmSource Conference 2000

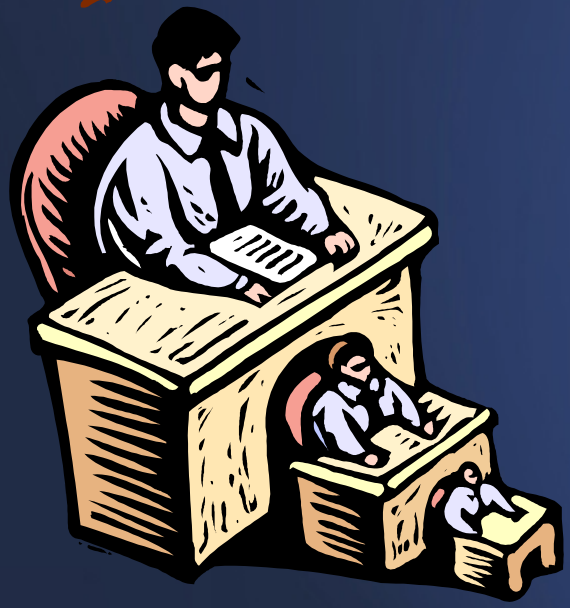

Agenda

- Desktop/Mobile Management Requirements From Different Facets of Organization
- Desktop/Mobile Management Cost of Ownership
- Customer IT Requirements
- Desktop Management Challenges
- Asset Management
- Software Delivery
- Integration
- Summary

PalmSource Conference 2000

Requirements of Different Facets of the Enterprise

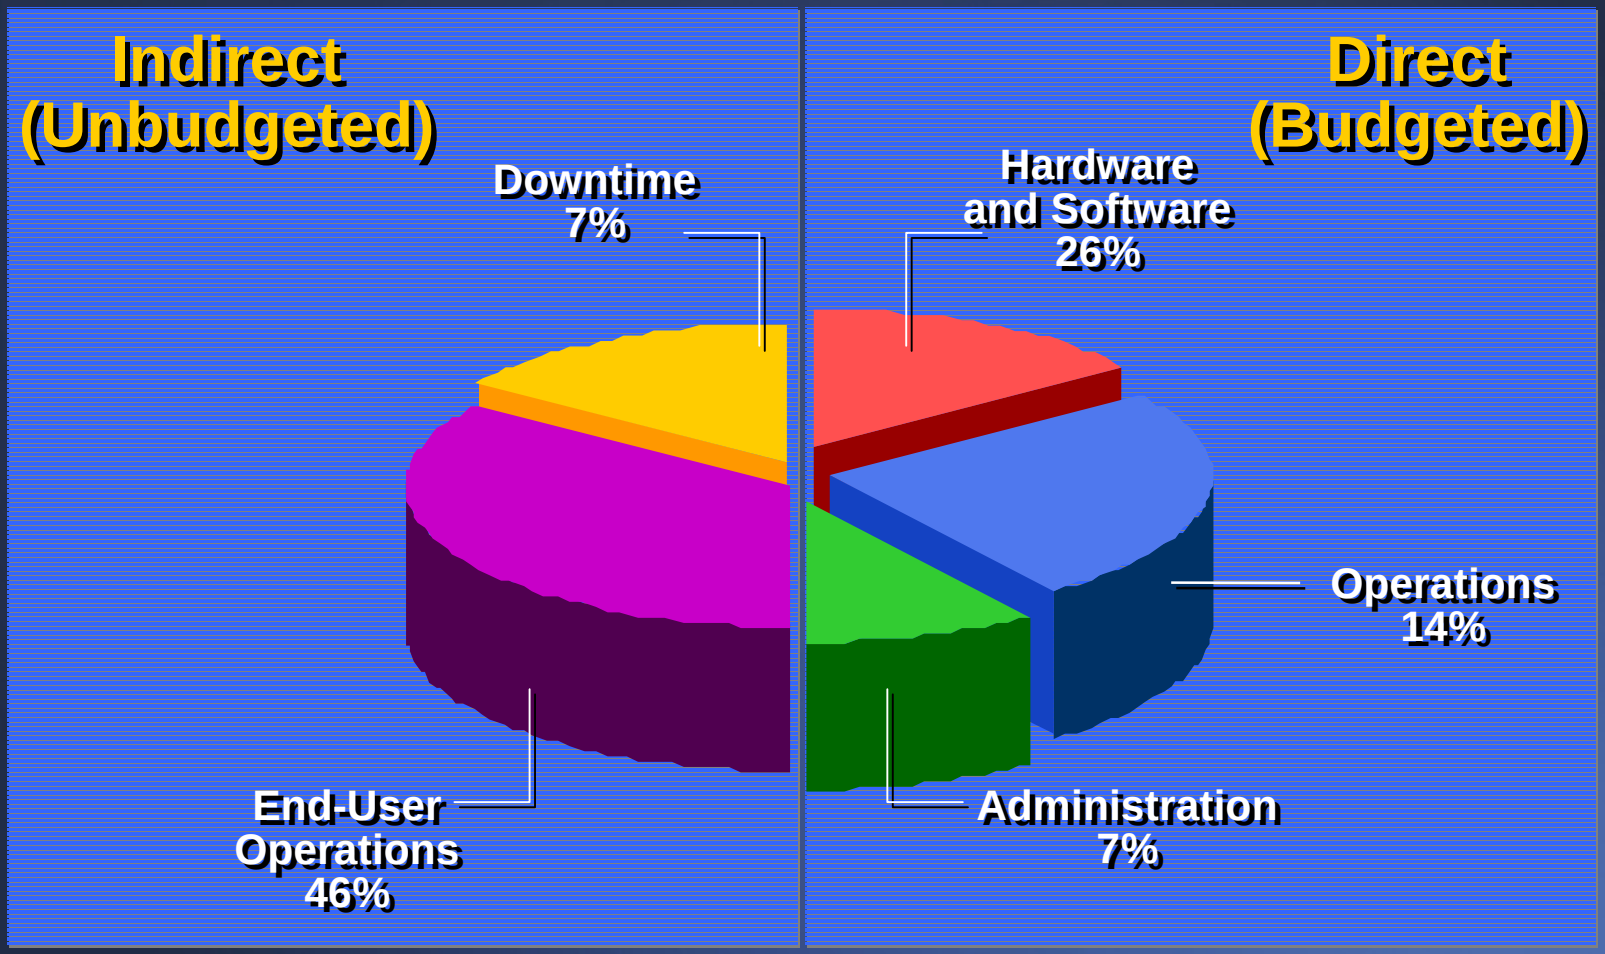

CEO: My company must be competitive and profitable

CFO: I need to minimize costs and increase profits

IT Manager: I need to satisfy the business with the IT investments made and show a good ROI

IT Engineer: HELP

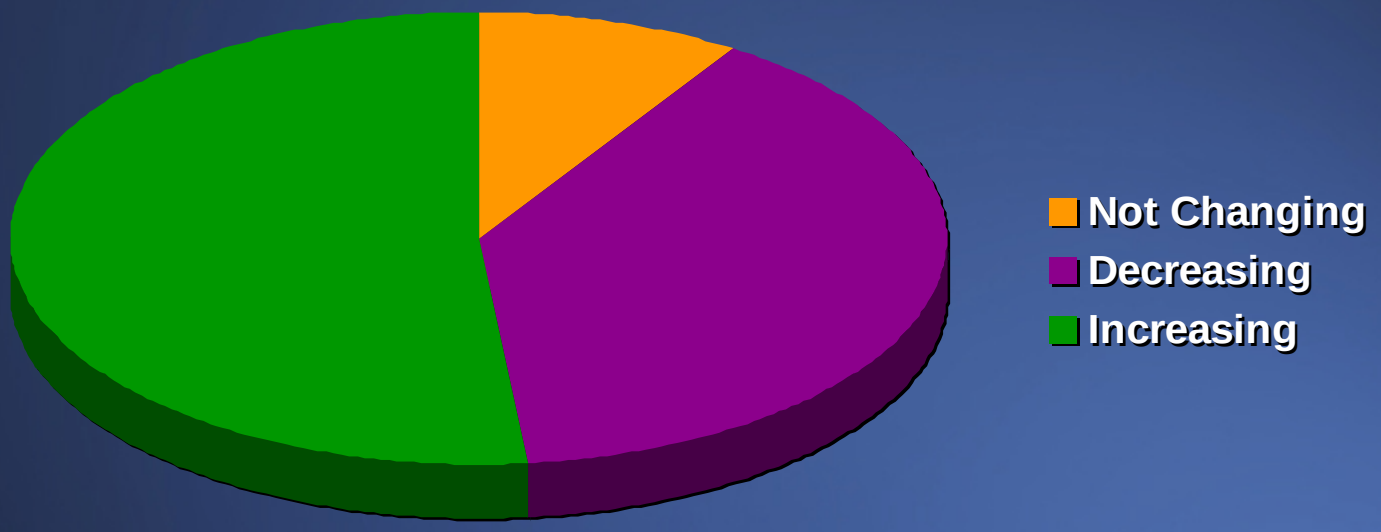

IT Total Cost of Ownership

Labor-to-Capital Ratio: 74% Labor, 26% Capital

IT Total Cost of Ownership

What Is Happening to the Cost of Desktop/Mobile Management Support?

Customer Requirements

- Scaling of Solutions to Ongoing Management Needs
- IT Service Level Assurance for Key Apps. and Business Processes
- Automate Mundane Tasks and Processes
- Take Advantage of the Pervasive Web Style of Computing
- Want to Use Management on an “As Needed Basis” with Day 1 ROI
- Easy to Plan, Deploy and Maintain

Customer IT Issues Today

Productivity

Time required for administrators to perform activities that maintain or improve performance

Efficiency

Number of systems each administrator can manage

Availability

Frequency and impact of users inability to access the network and computing resources

Integration

Different tools are required to manage different devices

Palm Devices Are Becoming Critical Component of the Extended Enterprise

- PDA retail sales are expected to double this year
- 11million PDAs sold in 1999, 89 million 2004 expected
- Enterprises beginning to deploy Palm devices
- Palm devices either brought into org. through personal or enterprise purchase still need to be managed!

PalmSource Conference 2000

Challenges of Managing the Extended eBusiness Infrastructure

- Palm devices need the latest dynamic info
- Need the latest software to compete
- Increase in Telecommuters
- Non-traditional Devices

PalmSource Conference 2000

CA Meets These Challenges

- Complete Coverage
- Heterogeneous Support
- Intelligence
- Automated
- Integrated
- Business Alignment
- Proven

Leading Technology

- Asset and Inventory Management
- Software Delivery

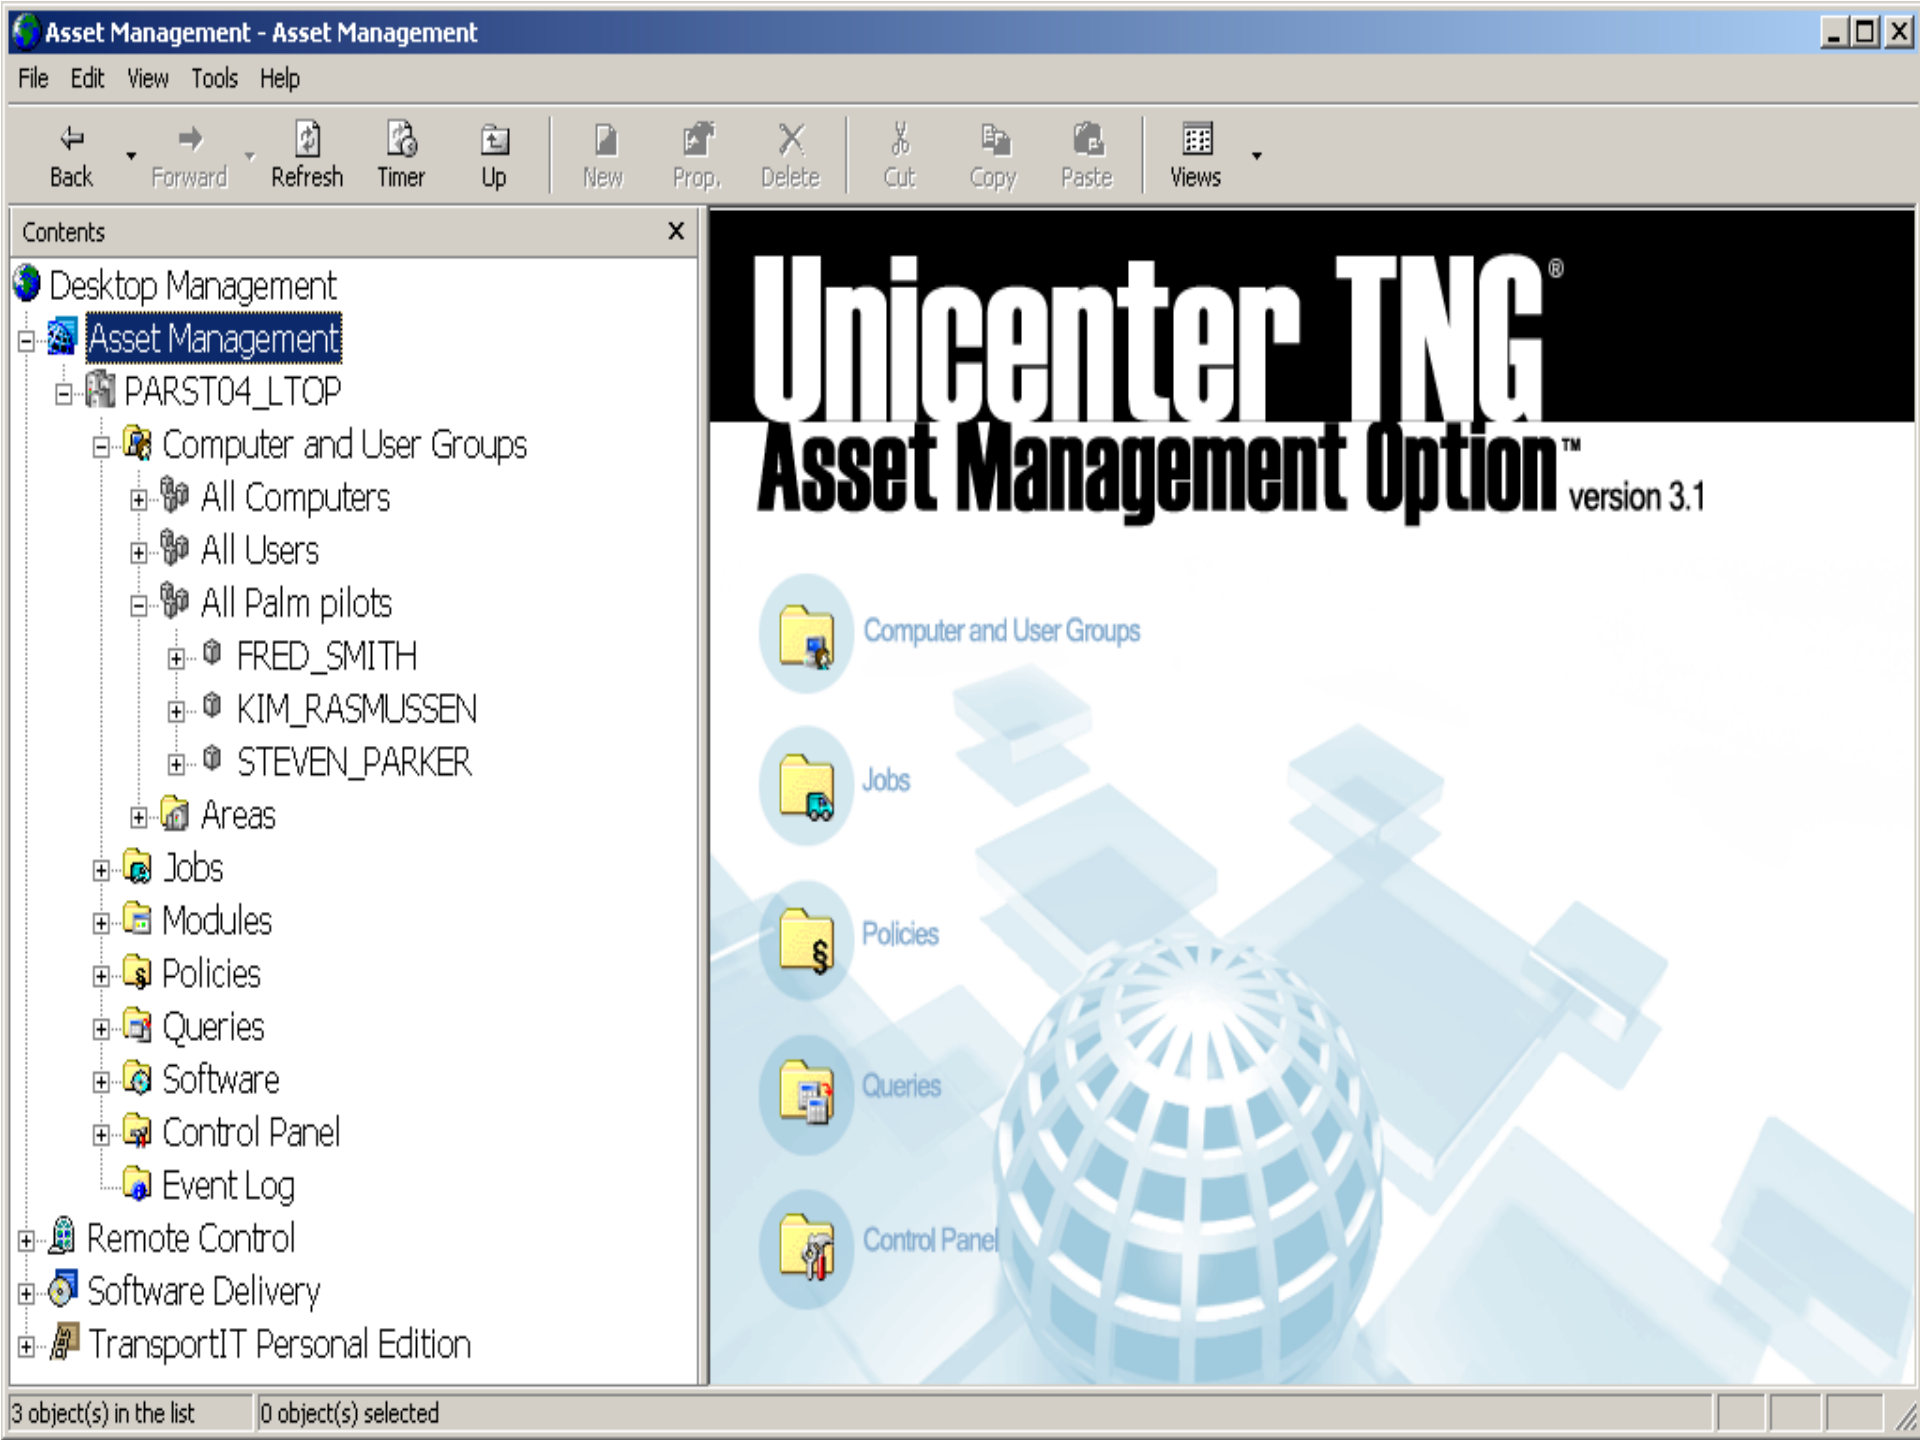

Challenges of Asset Management

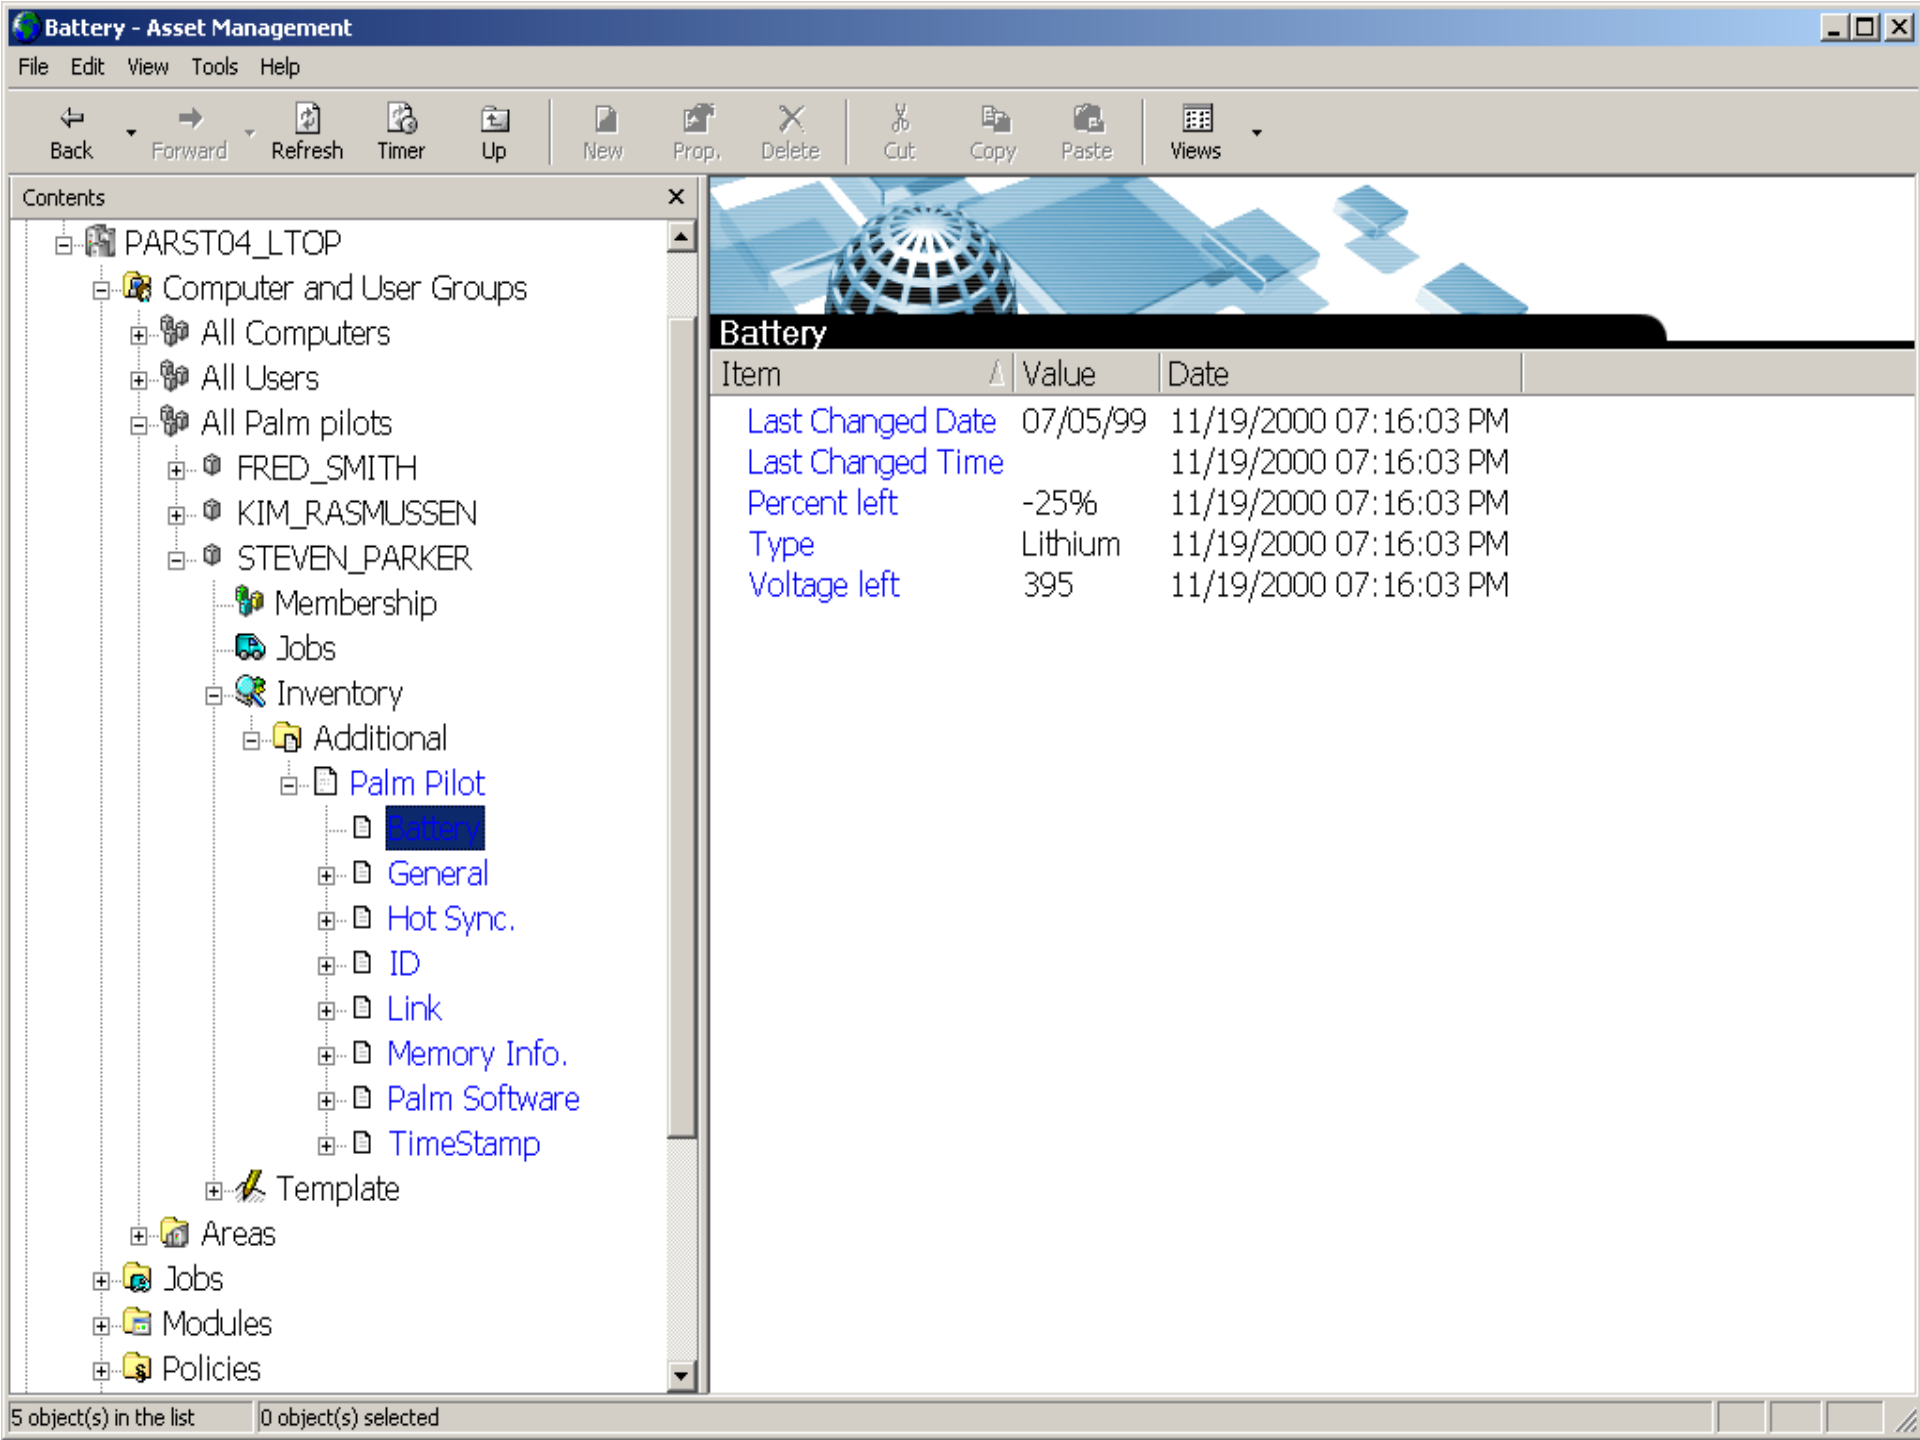

- Constant changes
- Exploding amount of nodes
- New platforms
- Inherently heterogeneous
- Integration
- Supporting/tracking assets as high as 73% of the TCO
- Without effective asset management up to 40% of accounting records could have mis-statements

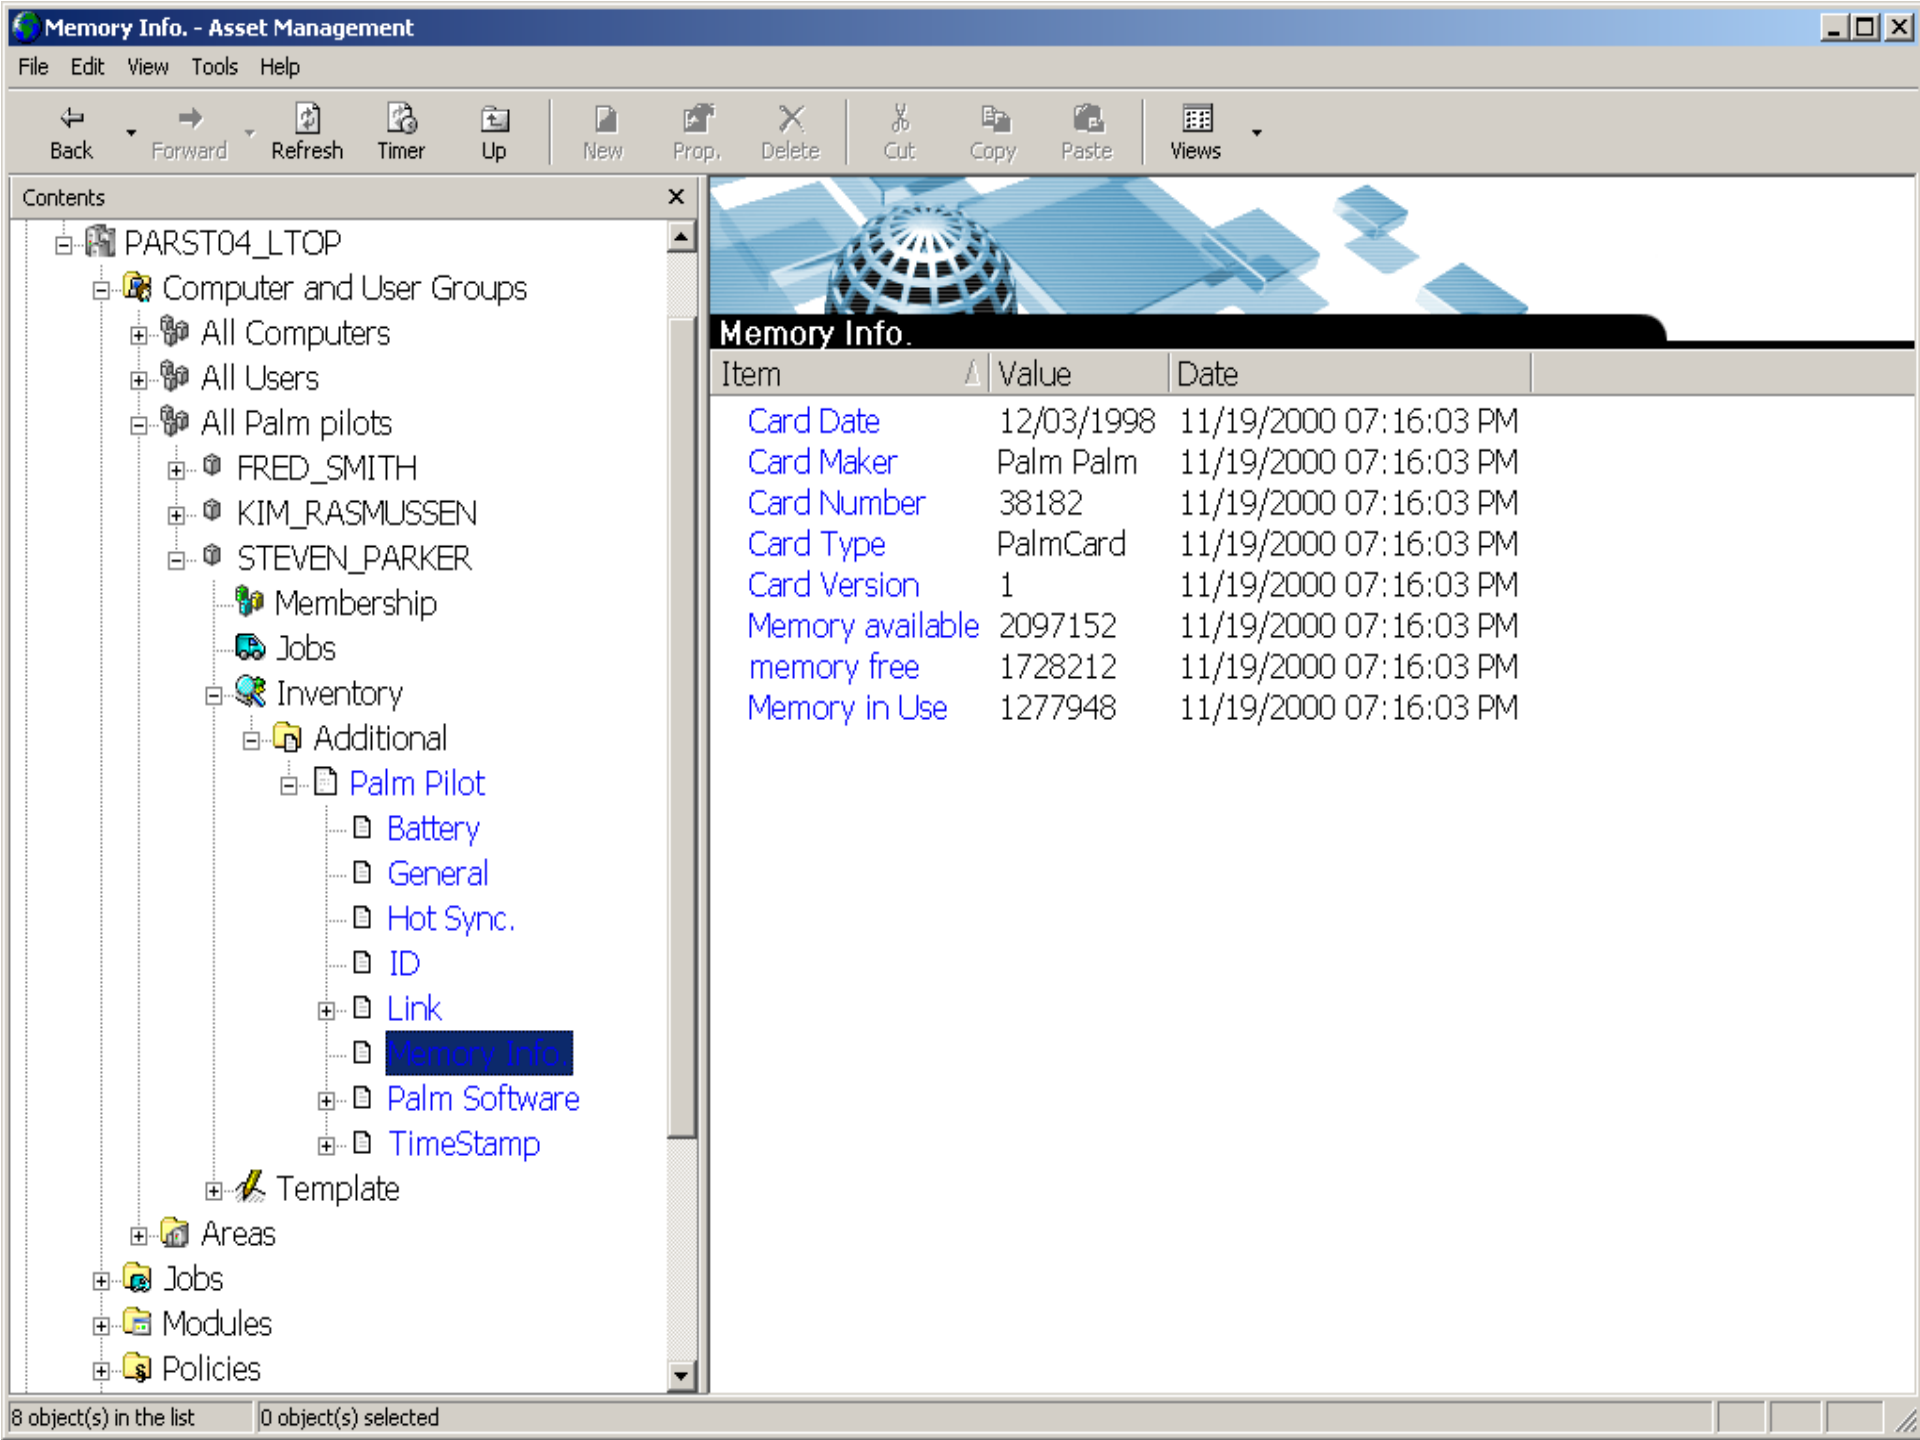

Asset Management

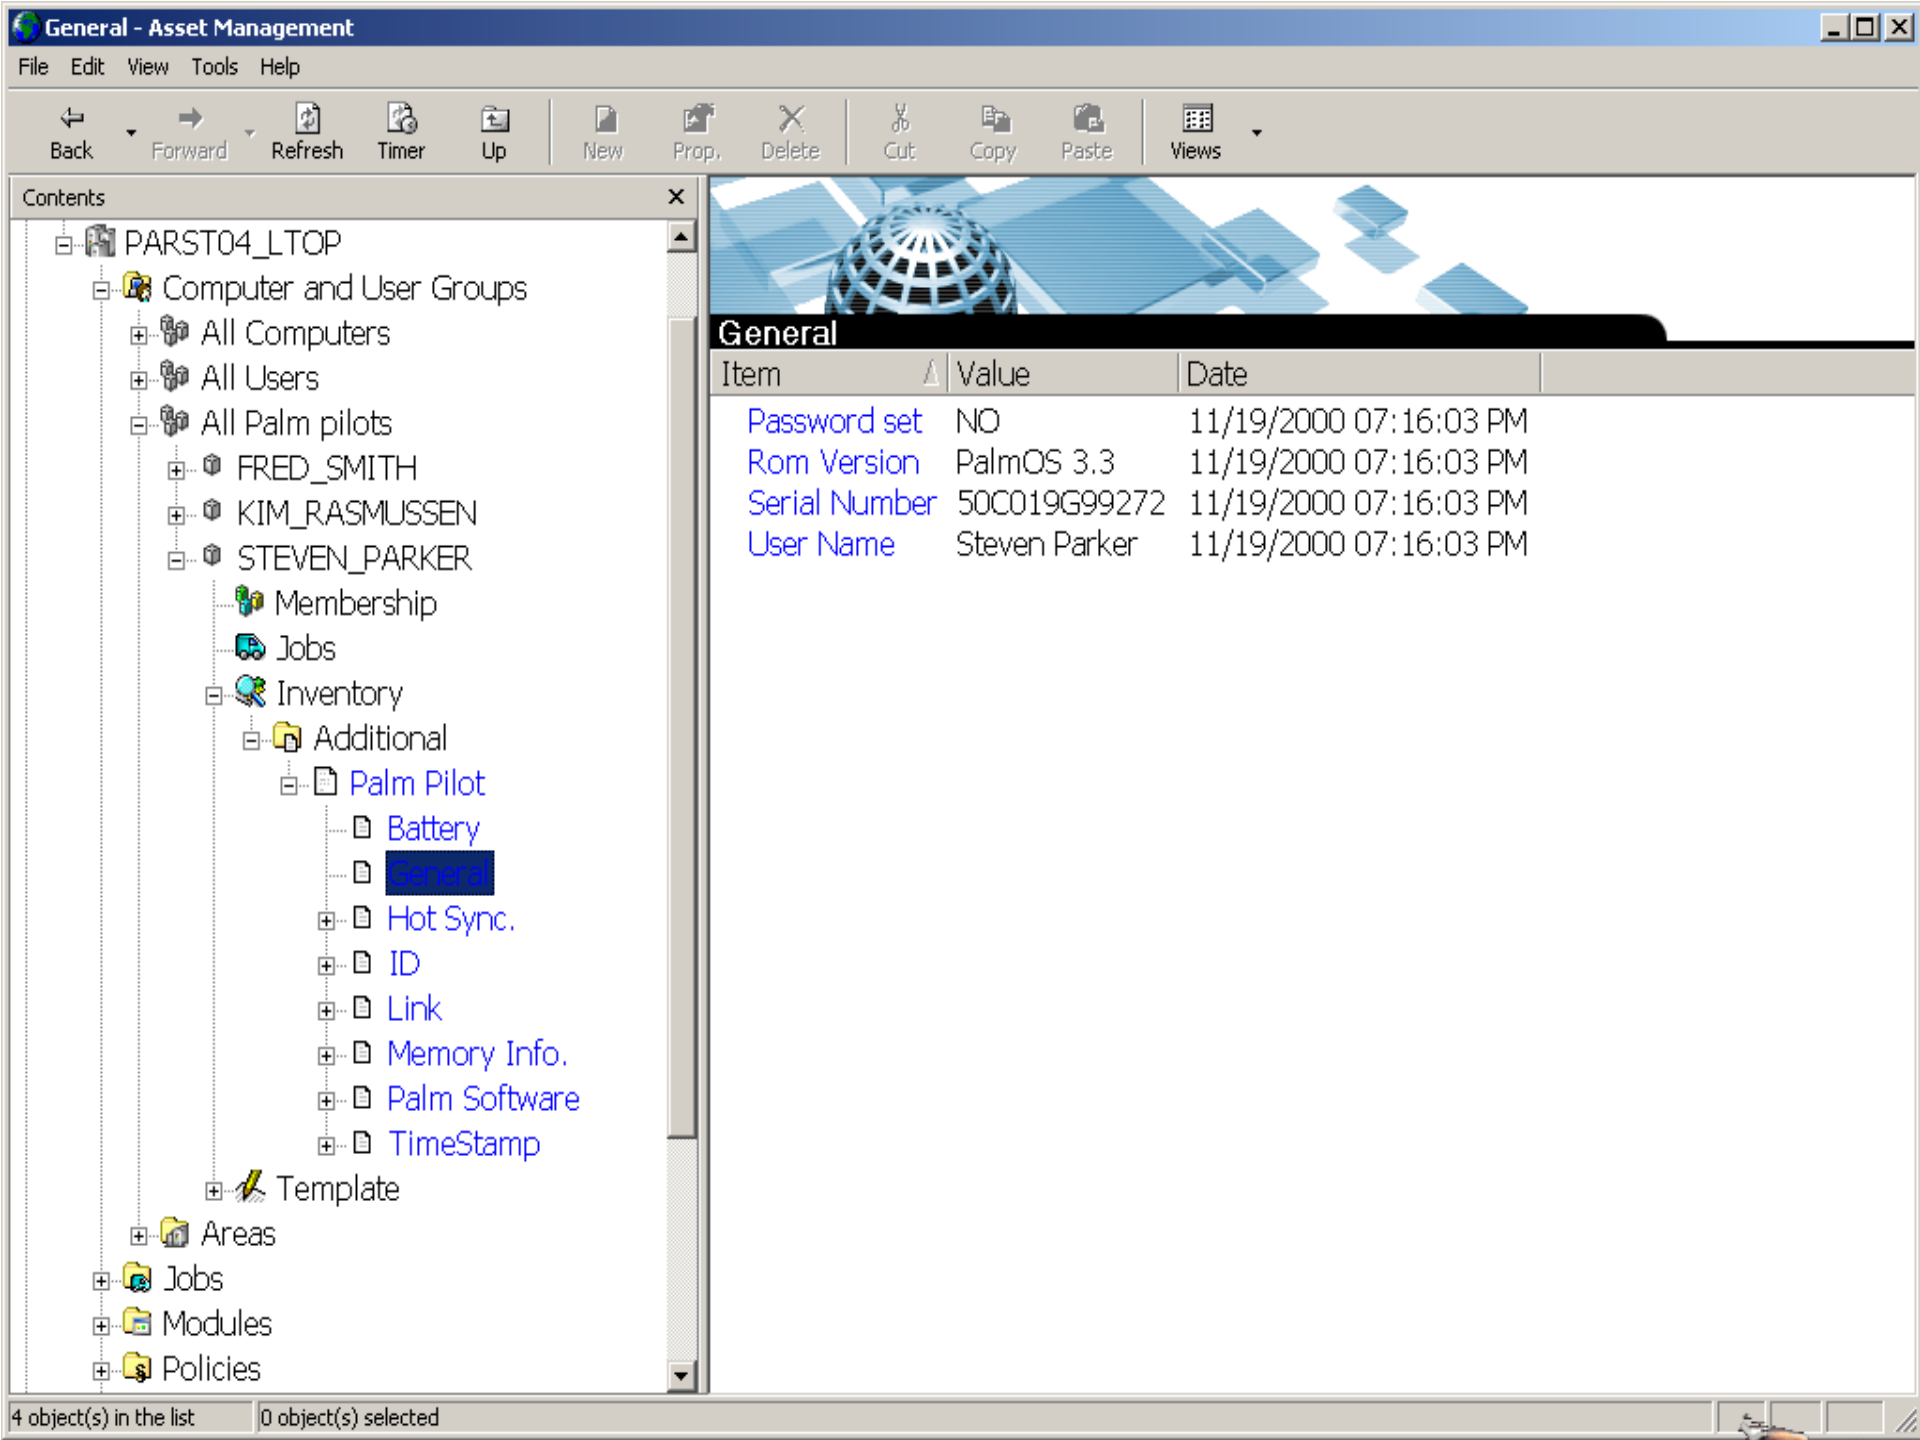

- Primary Functions
  - Hardware and Software Inventory
  - Software Metering and Audit
  - Configuration Management
- Strengths
  - Heterogeneous—Wide range of platform support from Windows
  - Unix to Palm Scalable
  - Flexible
  - WEBM Inventory Support

Why Is Software Delivery an Infrastructure for eBusiness

- Cost of delivering software exceeds cost of buying software
- Traveling around the corporation is too inefficient
- Software should be where/when the business demands it
- Competitiveness requires current software versions
- Content and software distribution—continuous process

Software Ownership Costs

- Software licenses and upgrades = 13% of cost
- 87% =
  - Distribution
  - Installation
  - Administration
  - Support
  - Upgrading effort

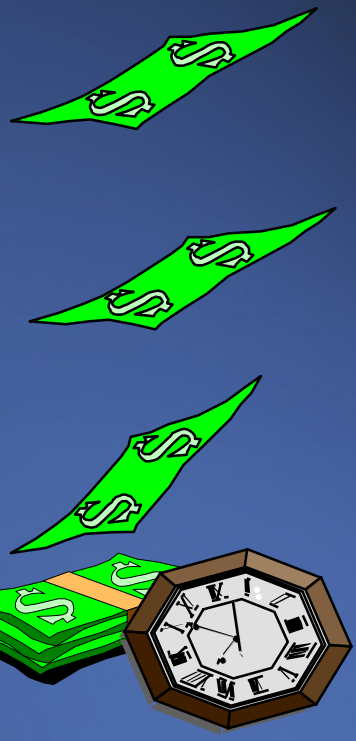

Business and Technology Challenges

- Window of time for software distribution is shrinking
  - Distribution done after production
- Heterogeneity
  - Different protocols, different platforms, skills expertise
- Applications have relationships
  - Dependencies
  - Conflicts

Business Benefits

- Saves time while improving consistency
- Lowers software distribution costs
- Reduces errors
- Supports business objectives
- Facilitates fast roll out of complex applications

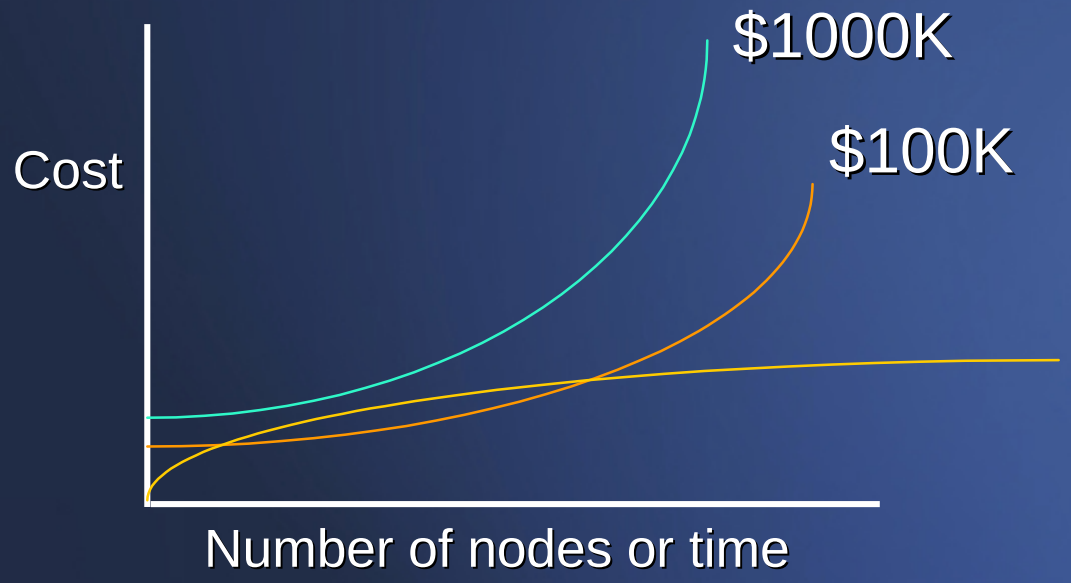

PalmSource Conference 2000

Software Management

- Complex Environments
- Complex Applications
- Need to support today's complex application interdependencies
- Need to Support Internal + External Application Dependencies
- Versioning + Delta-Packages
- Sequential Installations
- Automatic Rollback

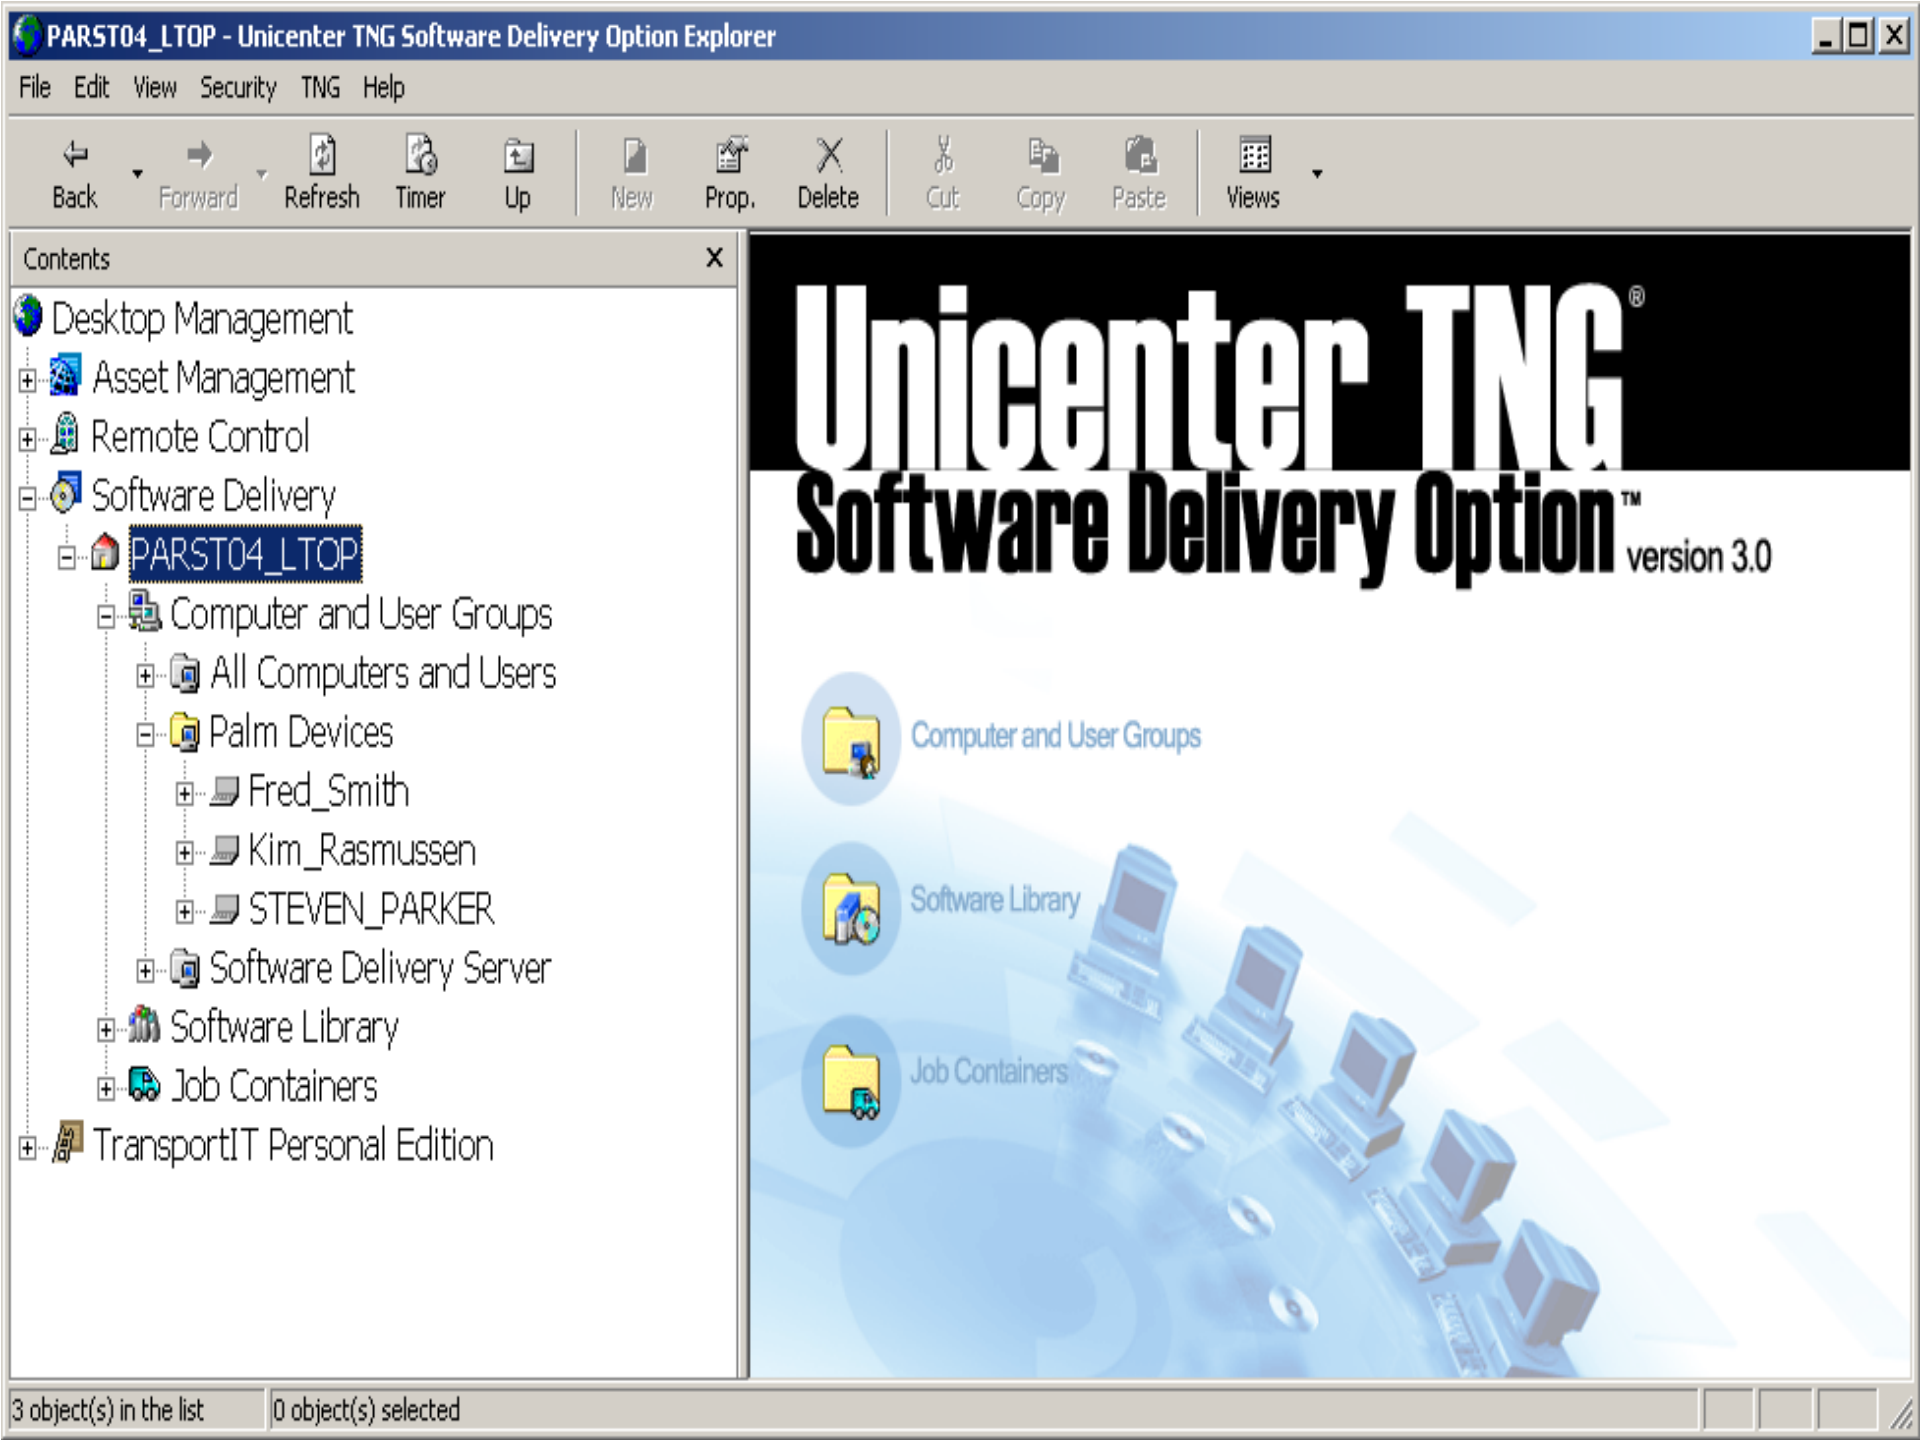

‘Simple Math’

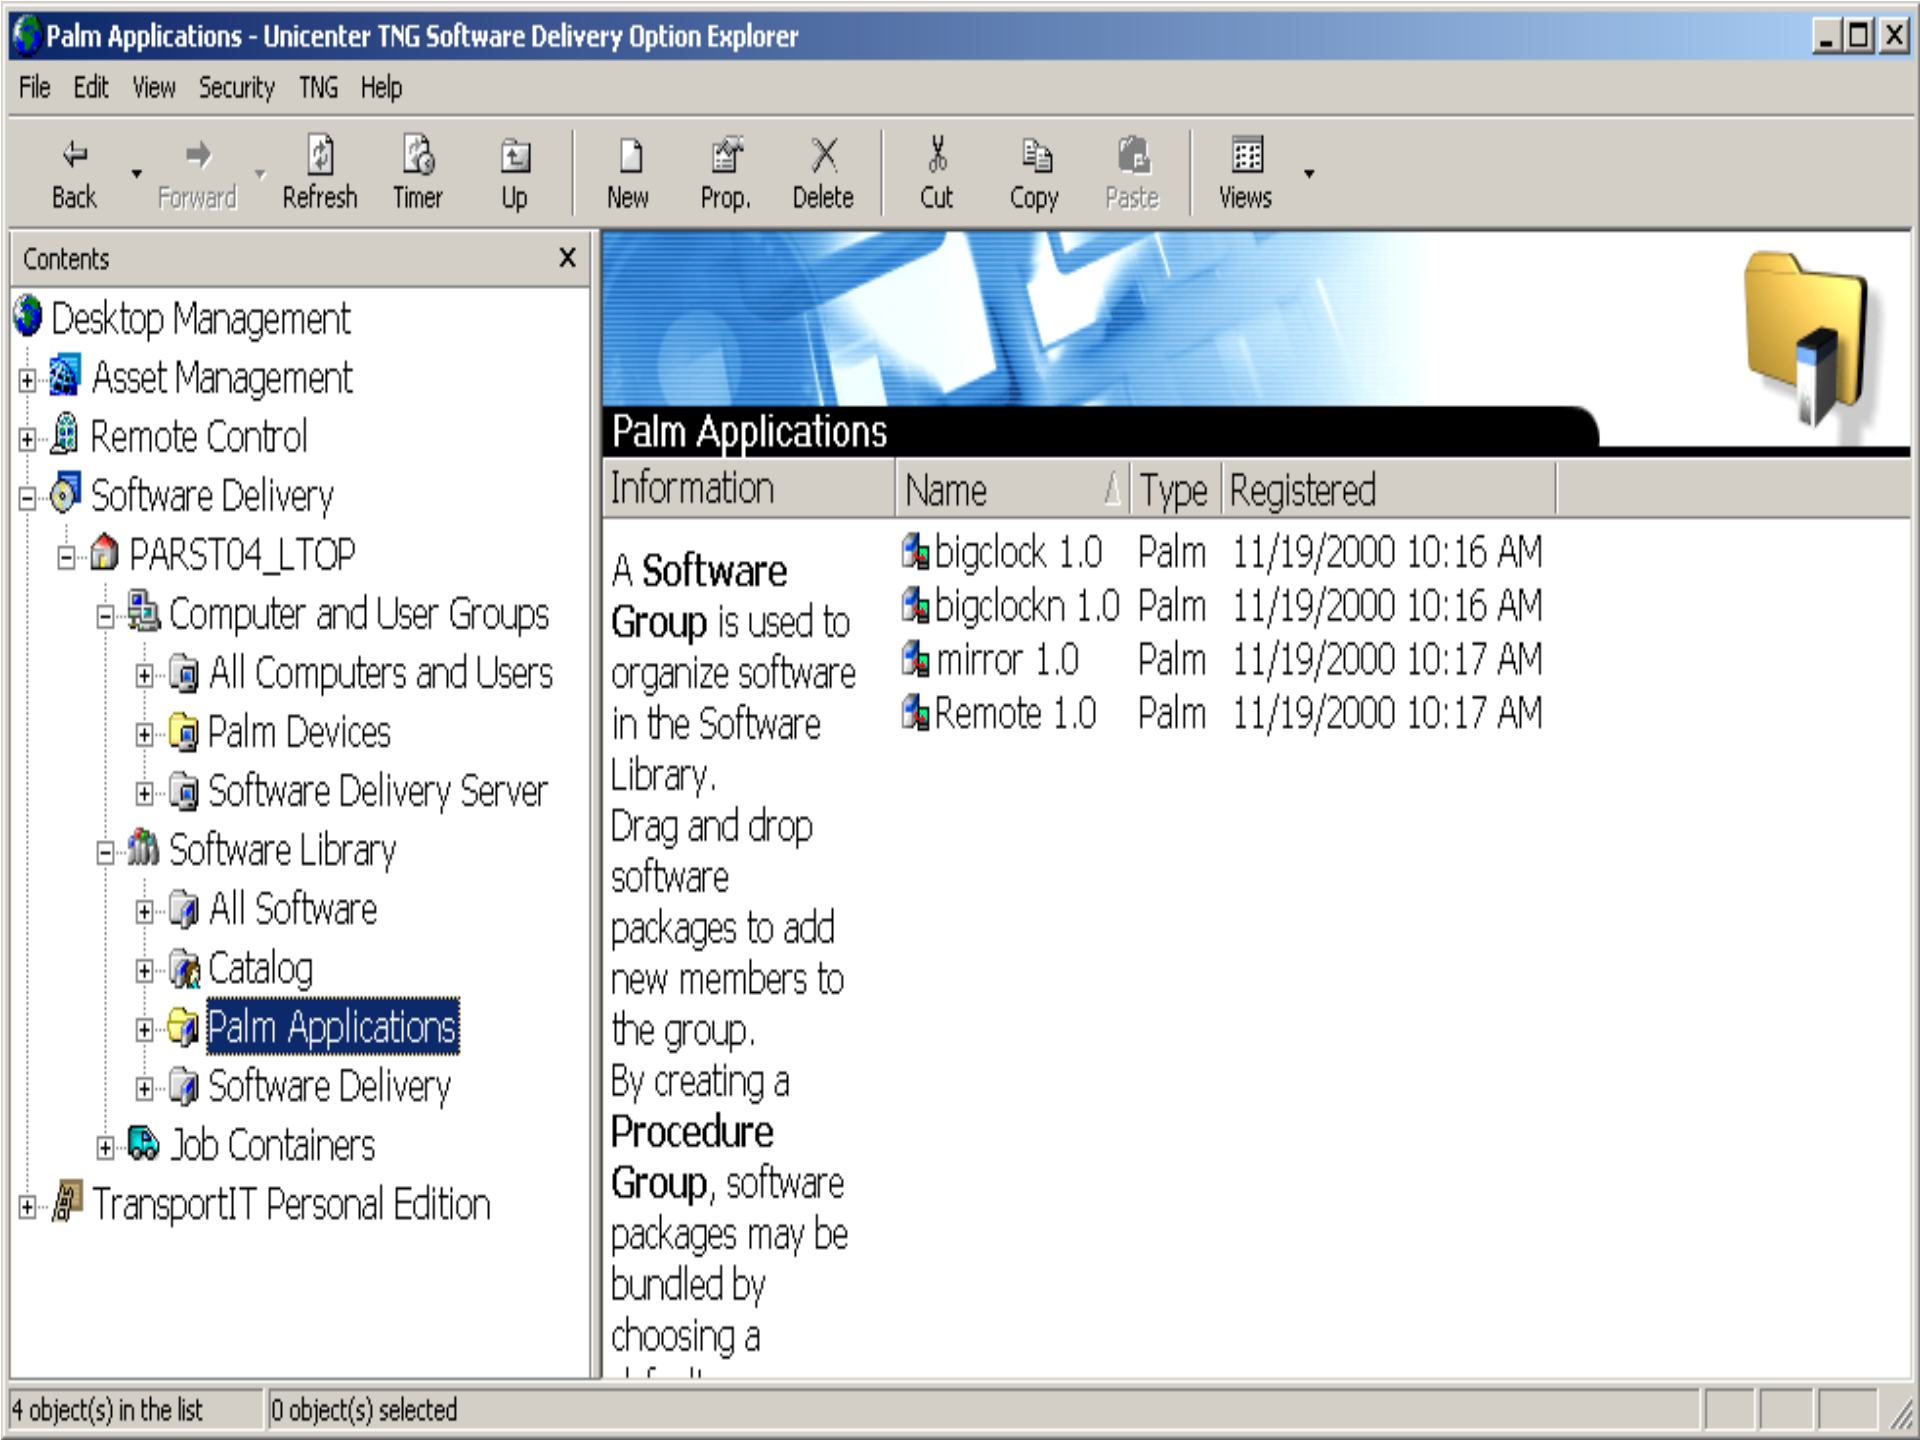

- 250 PCs; 1 hour per update; 8 updates per year
- Assume support price: $50 loaded cost/ hour
- 250x8 = 2000 x$50 = 100,000$
- With Unicenter Software Delivery NO such costs!

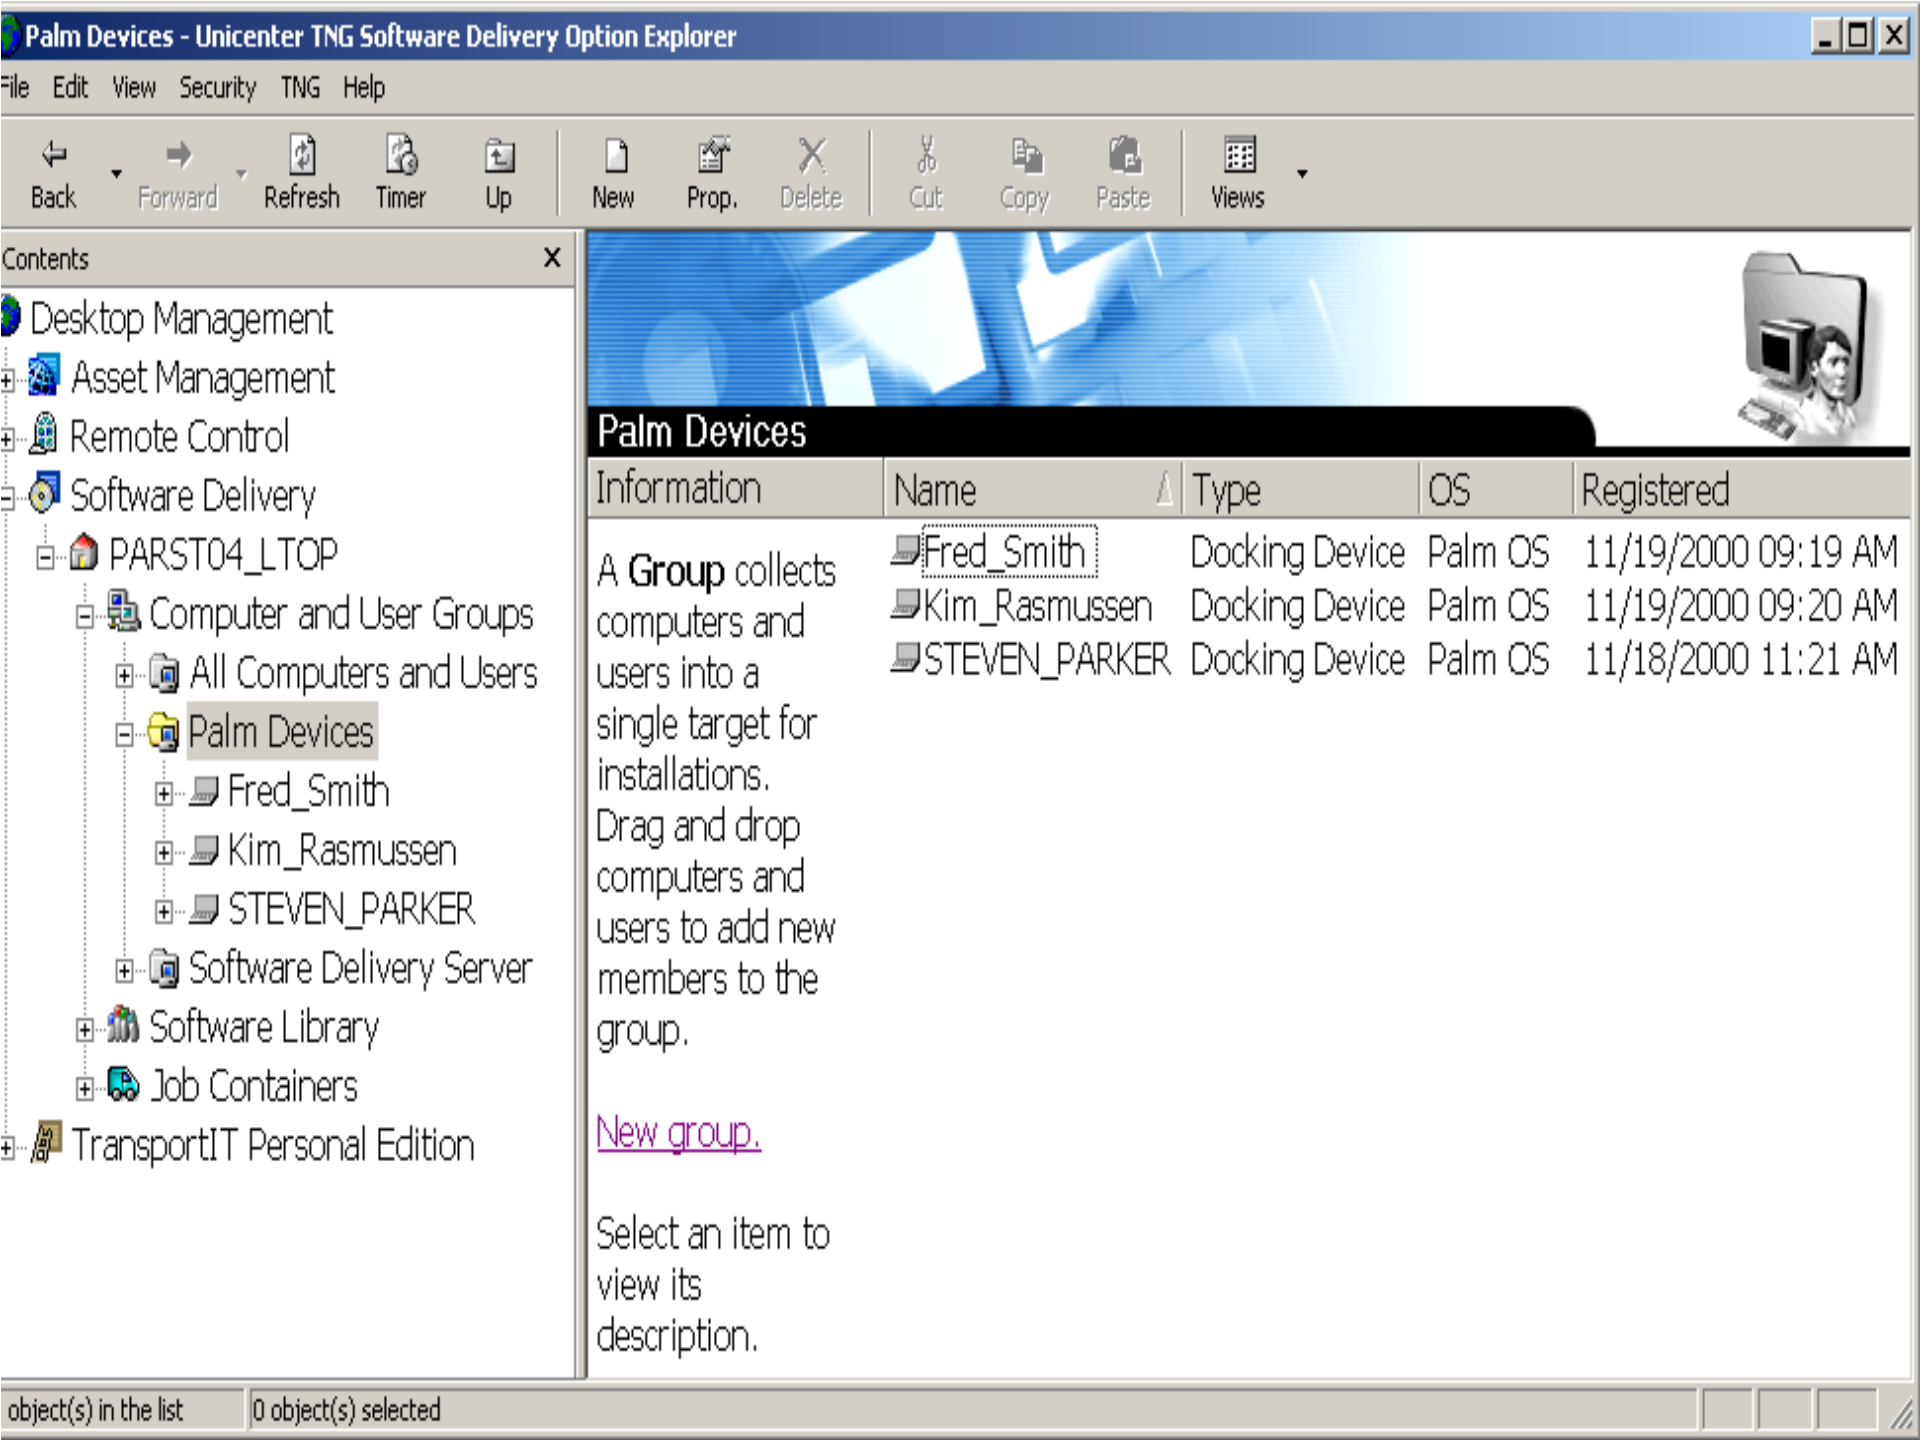

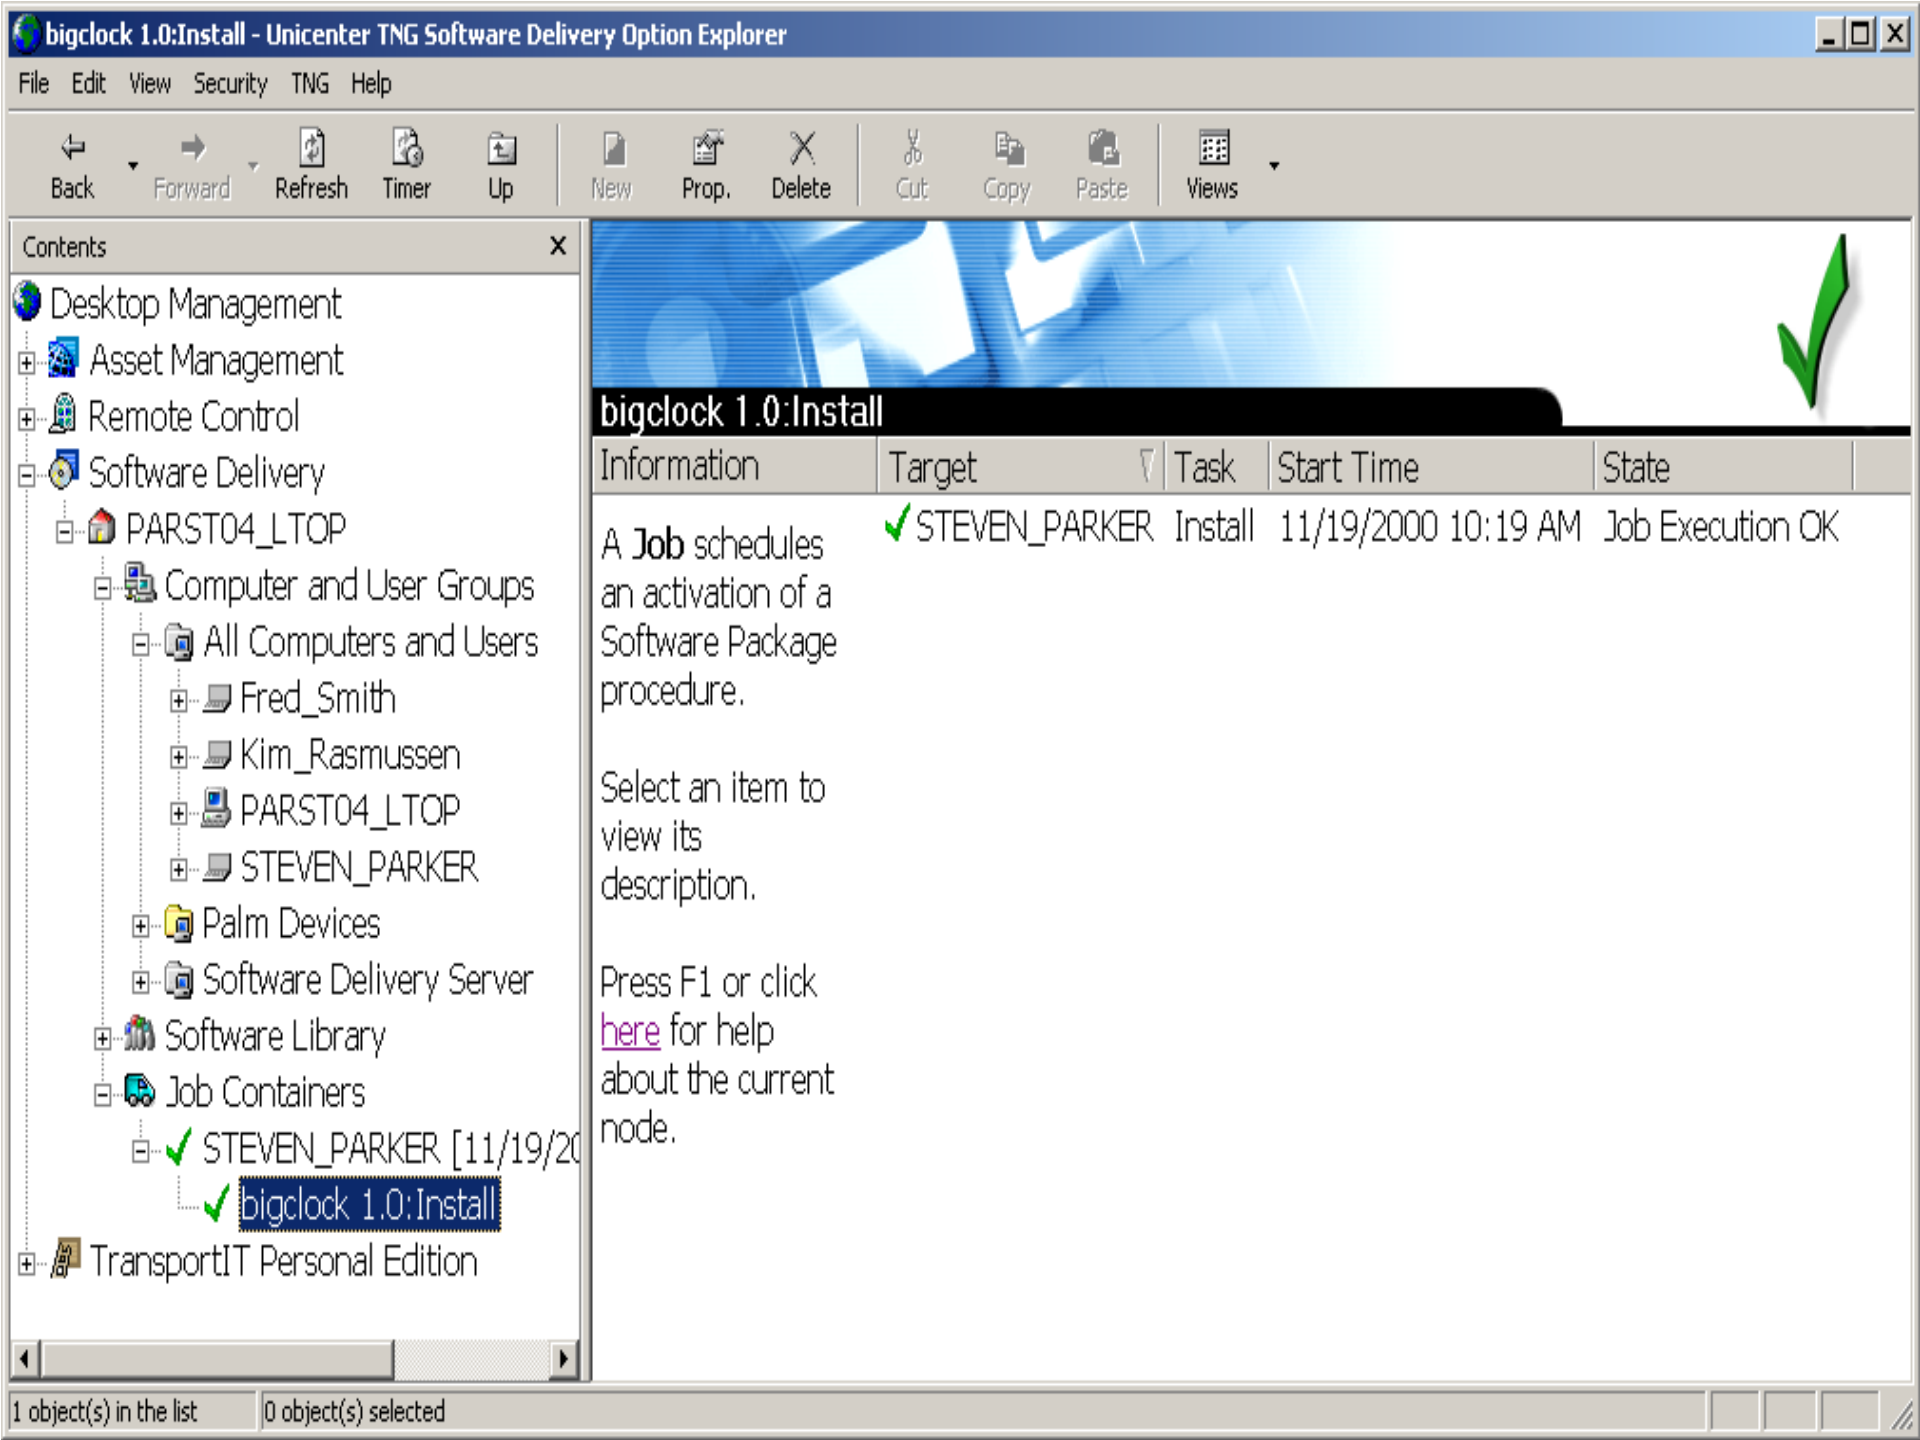

Costs Using Electronic Software Distribution

COMPUTER ASSOCIATES
Software superior by design.

Summary

- Palm devices are becoming an important aspect of the enterprise
- Enterprises need to support Palm devices
- CA has the largest software delivery market share
- CA has clients around the world using the technology to support the extended enterprise
- CA's asset management + software delivery solutions increases the power of Palm devices in the enterprise environment
