RealSync Server…

Synchrologic
Business Data Anywhere

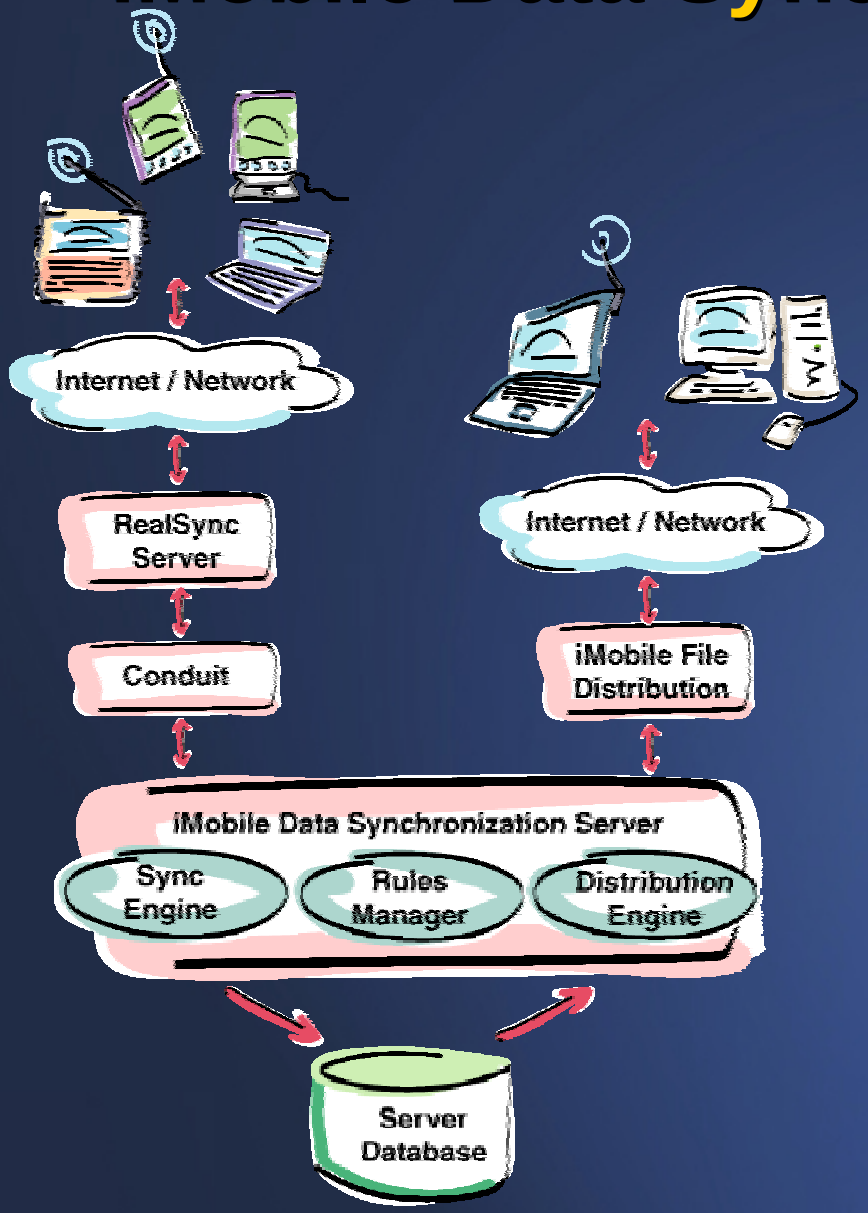

… Keeps Palm OS® and other handhelds synchronized with enterprise servers

- Manages connections with multiple Palm OS (and other) handhelds simultaneously
- Rich APIs for building conduits to relational databases
- Out-of-box conduits for Notes and Exchange
- Wireless or wireline connection via Internet, dialup, network
- Advanced security and user authentication

PalmSource Conference 2000

iMobile Data Synchronization…

Synchrologic
Business Data Anywhere

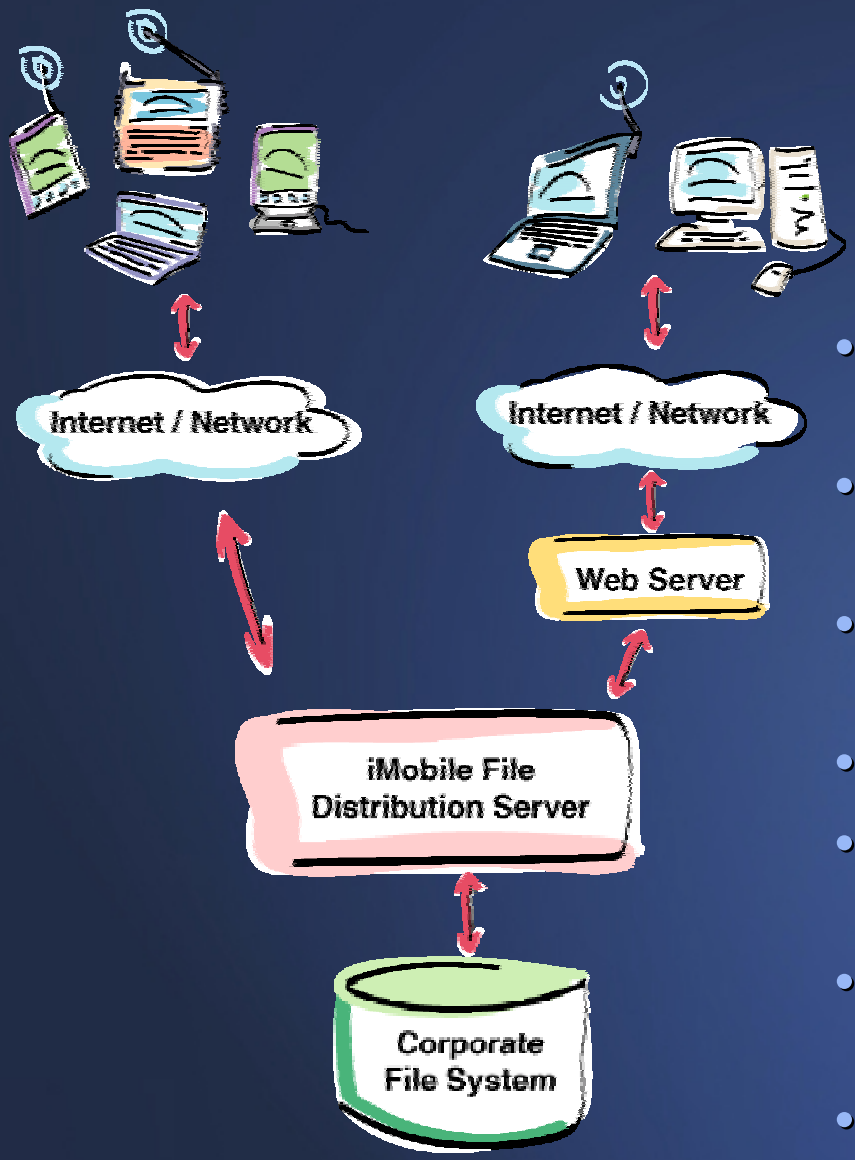

… Offers the most advanced data sync technology and management tools available

- Syncs all major mobile devices
- Moves data changes to and from server
- Changes redistributed according to rules
- Uses iMobile Suite products for managing sync sessions
- Wireless or wireline connection via Internet, dialup, network
- Advanced security and user authentication

iMobile File Distribution…

Synchrologic
Business Data Anywhere

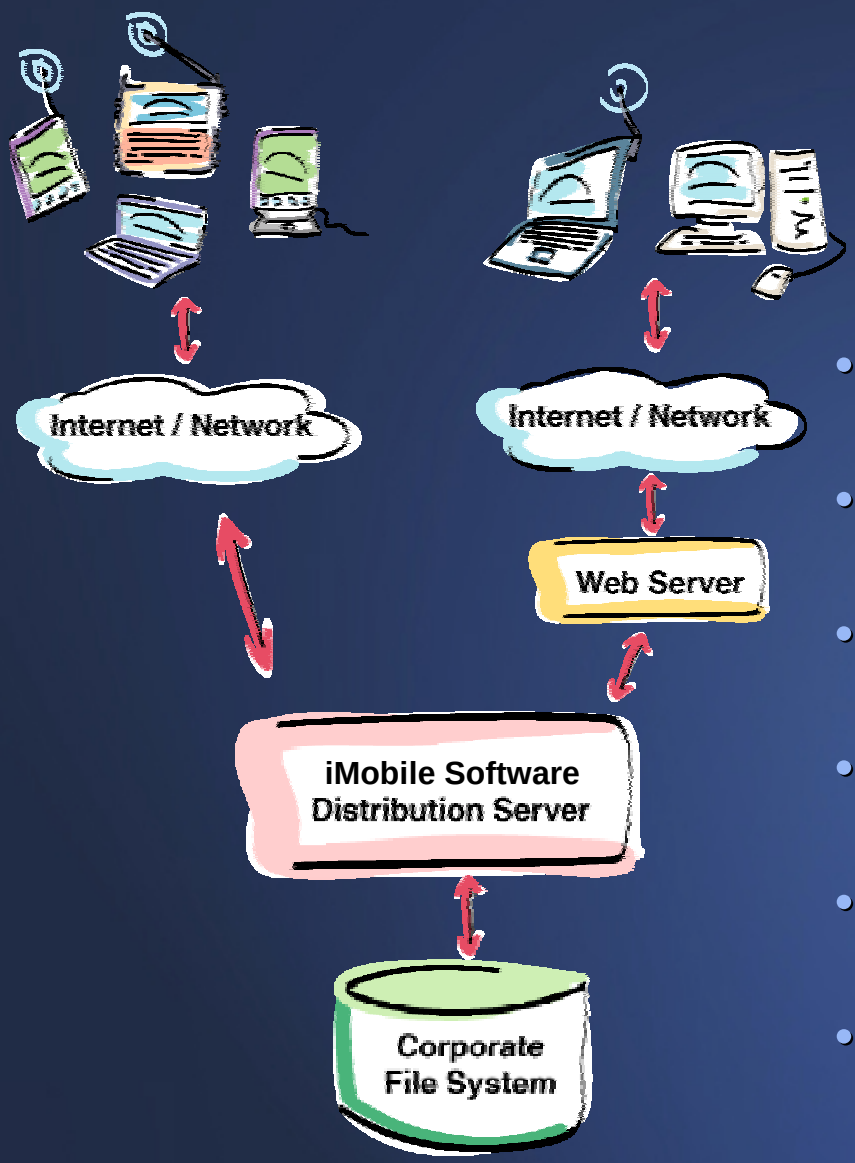

… Distributes personalized content and files to mobile and wireless users

- Scanner engine detects new and changed files
- Files are packaged by server for different mobile devices
- Users connect and receive subscribed files
- Files are unpacked on devices
- Files are also harvested for backup or redistribution
- Wireless or wireline connection via Internet, dialup, network
- Advanced security and user authentication

iMobile Software Distribution…

Synchrologic
Business Data Anywhere

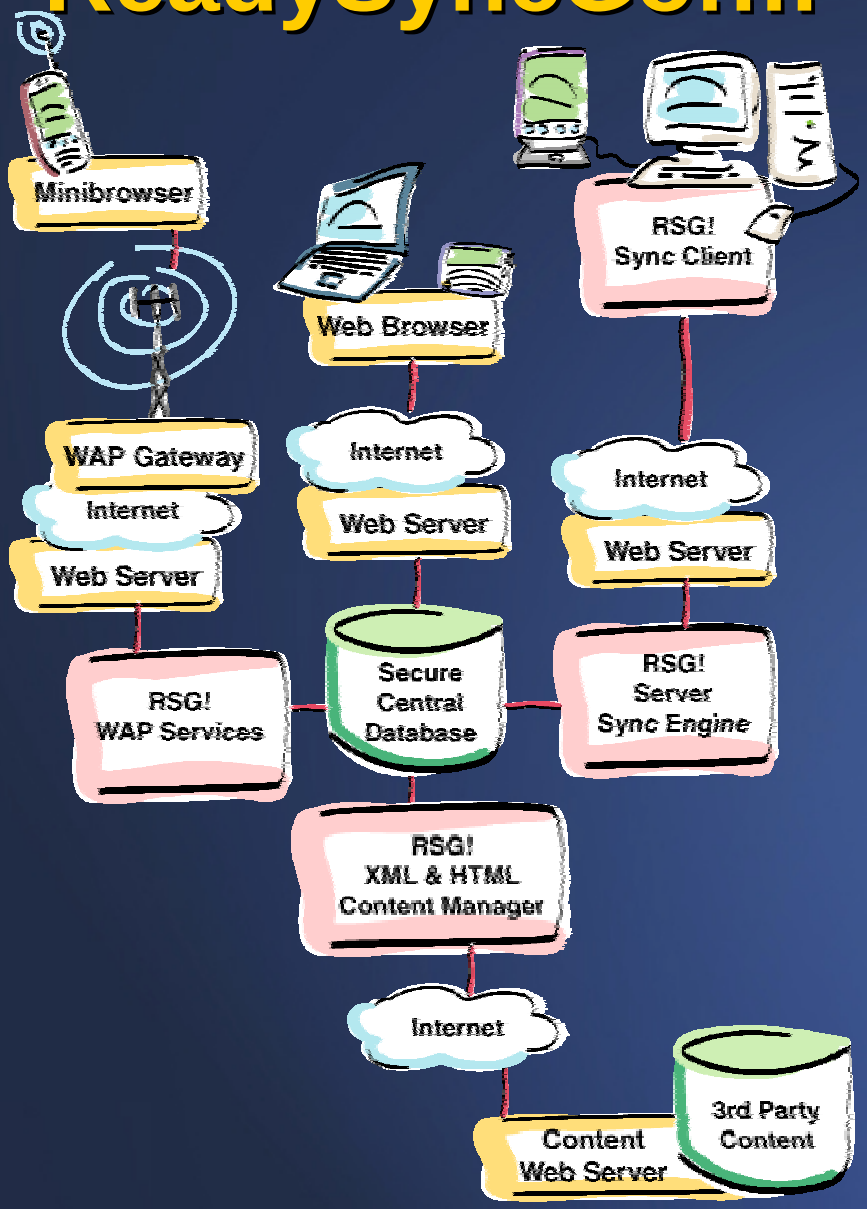

… Automatically installs and maintains applications on mobile and wireless devices

- Software installs and updates are packaged for delivery
- Users connect and receive the latest applications and updates
- Asset management information is collected at server
- Administrators are alerted to potential problems
- Wireless or wireline connection via Internet, dialup, network
- Advanced security and user authentication

PalmSource
Conference 2000

ReadySyncGo!…

Synchrologic
Business Data Anywhere

… Synchronizes personal information and value-added content via the web

- Server sync engines controls all information flows
- Value-added information retrieved from 3rd party sources based on context
- Info is rendered in WML for minibrowser viewing on phone
- Outlook, Palm™ handheld, and browser app use PC network connection for live sync
- Data from any device available instantaneously on any other

Only Synchrologic…

- Offers a comprehensive set of tools for supporting enterprise Palm™ applications
- Offers advanced data synchronization for complex corporate applications
- Offers a data sync platform which requires minimal conduit coding effort
