JP Systems PQA-Solution

Sat Nashikkar
Manager, Product Development

PalmSource Conference 2000

What Is the PQA-Solution ?

Advantages of JPS PQA-Solution

- Network-agnostic; works on CDPD, CDMA, GSM, Reflex paging network
- Needs just the TCP/IP connectivity for the Palm OS® device
- Works globally, not restricted to US
- Uses Certicom's ECC encryption technology for efficient and robust security
- PQA-Server is available for commercial deployment for clients giving them greater flexibility, efficiency, with added security and control

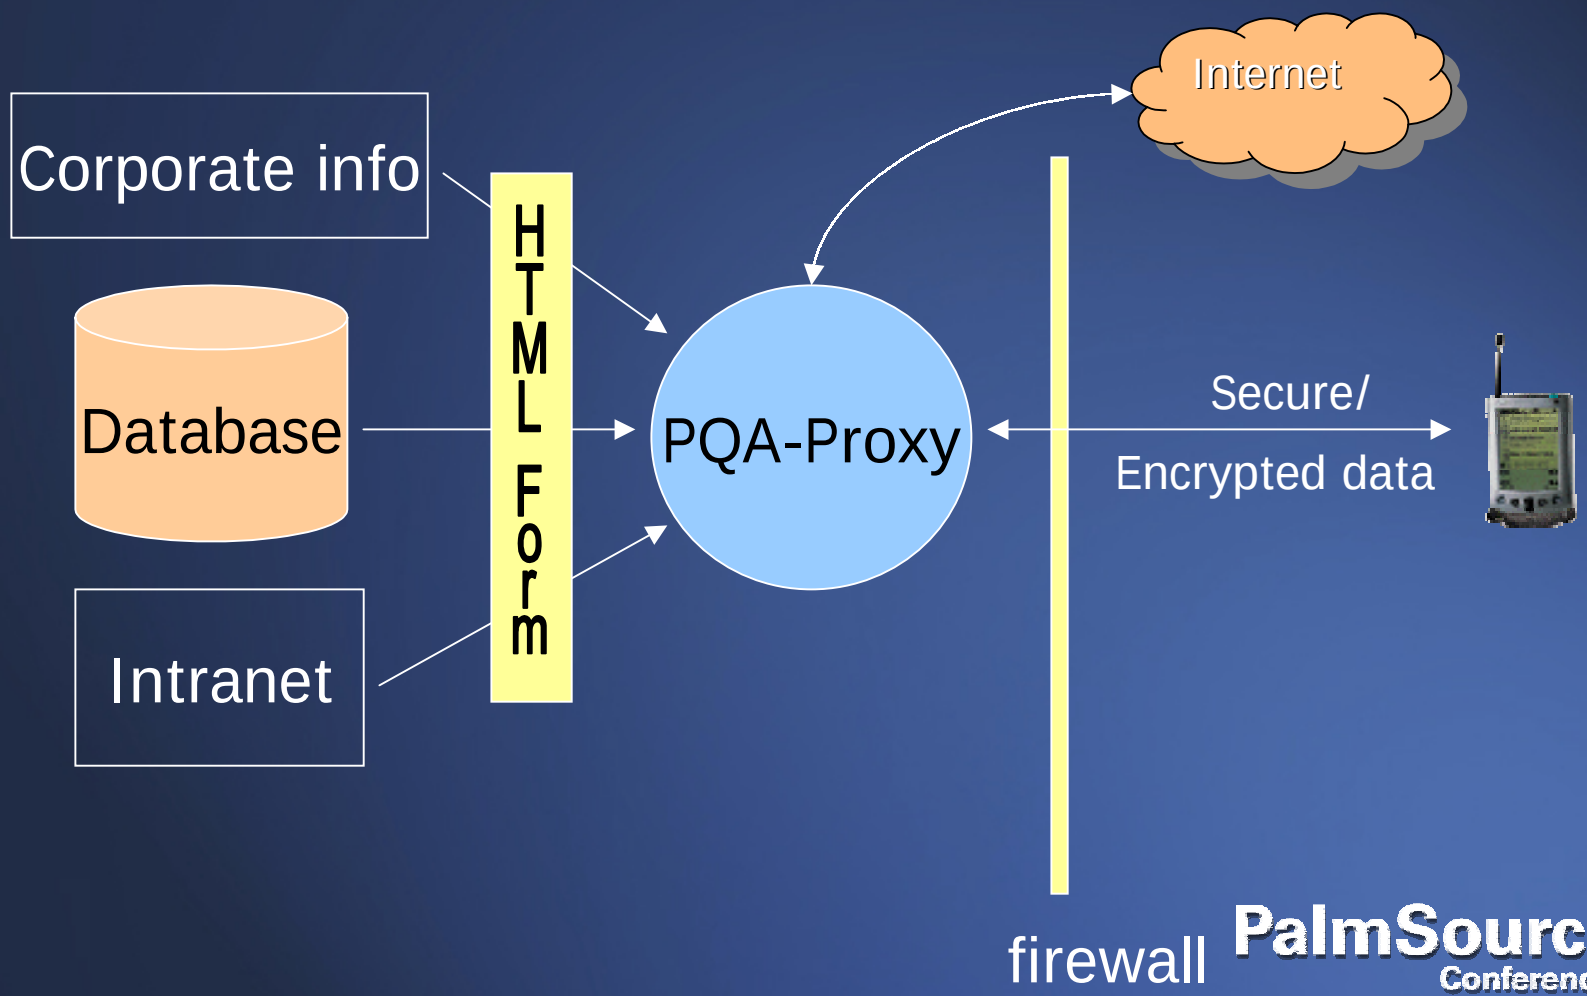

Applications of JPS PQA-Solution

- Enterprise/Corporate Solutions
  - Wireless enable enterprise content with minimal effort
  - Mobile connectivity to the employees for greater efficiency
  - Additional security and efficiency can be achieved by hosting the JPS PQA-Server in their intranet
- Developer Community
  - Develop, test, demonstrate and deploy your PQAs and PQA based applications with our license-able PQA-Server
- Wireless ISPs (Wireless Internet Service Providers)
  - Give your Palm OS® handheld subscribers what they have been waiting for—the complete Internet access
  - Customize the PQA-Client and content for your specific requirements (Co-branding option is provided)

Applications of JPS PQA-Solution

- Wireless ASPs (Wireless Application Service Providers)
  - Take your applications mobile with our scaleable, secure and robust PQA-Solution
- End-user
  - Instant internet/enterprise connectivity on Palm OS® devices
  - Access hundreds of freely available PQAs using the JPS PQA-Browser

Enterprise/Corporate Solutions

PalmSource Conference 2000

Enterprise/Corporate Solutions—Advantages

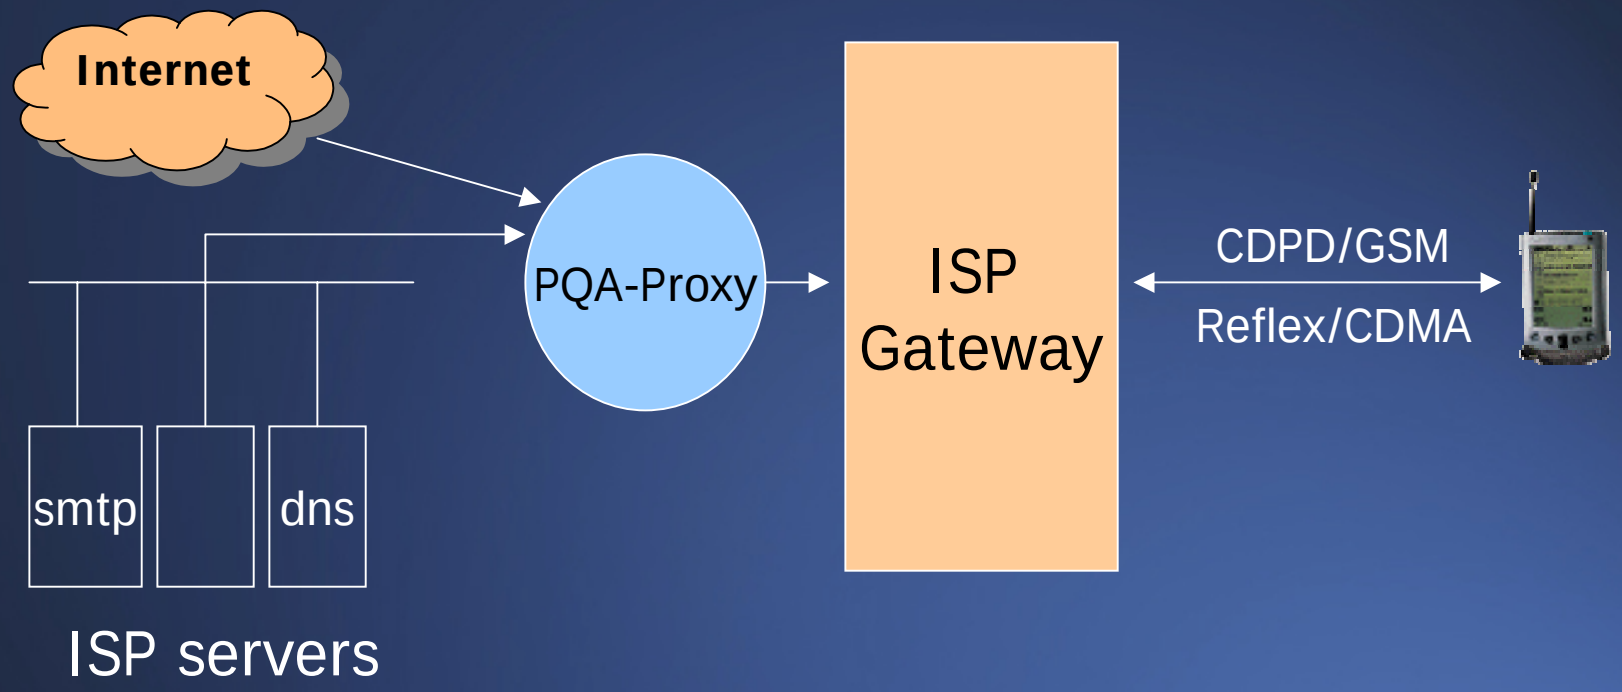

- Encrypted and secure data flow from source to destination, no compromise on security
- Dedicated PQA-server improves efficiency and reliability

Developer Community

- Use PQA-Server and client to test your PQAs and PQA-based applications
- Demo or deploy your PQA applications using our PQA-Server

PalmSource Conference 2000

Wireless ISPs

PalmSource
Conference 2000

Wireless ISPs—Advantages

- Established wire-line ISPs can quickly forge their entry into the booming wireless ISP business, by using our PQA-solution
- PQA-Solution is network independent
- License-able PQA-server offers more flexibility and control to the ISPs

Wireless ASPs

- PQA-Solution is easily customizable making transition of existing applications to wireless easier
- Existing value added applications could be made mobile applications making them available anywhere, anytime

End User

- Instant connectivity to the internet/ enterprise data
- PQA-Browser is fully compliant with the Palm OS® PQA format, enabling you to pick from hundreds of freely available PQAs
- Intuitive, easily navigable GUI
