Beyond PIM

Byron Connell
VP Consumer Markets Group

PalmSource
Conference 2000

From a Palm in Every Hand… to the World in Every Palm

"Beyond PIM" means:

your Palm™ handheld becomes

the way you manage the

information, communications

and transactions in your life.

Today: Islands in the Digital Landscape

Digital Video

Digital Voice Recording

Notebook & Sub PC

GPS Systems

Digital Cameras

Palm™ Handhelds

Pagers

Digital Audio (MP3, CD, Tape)

Digital Phones

Calculators

Digital Gaming

Electronic Diary

Electronic Organizer

Digital Watches

Tomorrow: Collaboration and Sharing

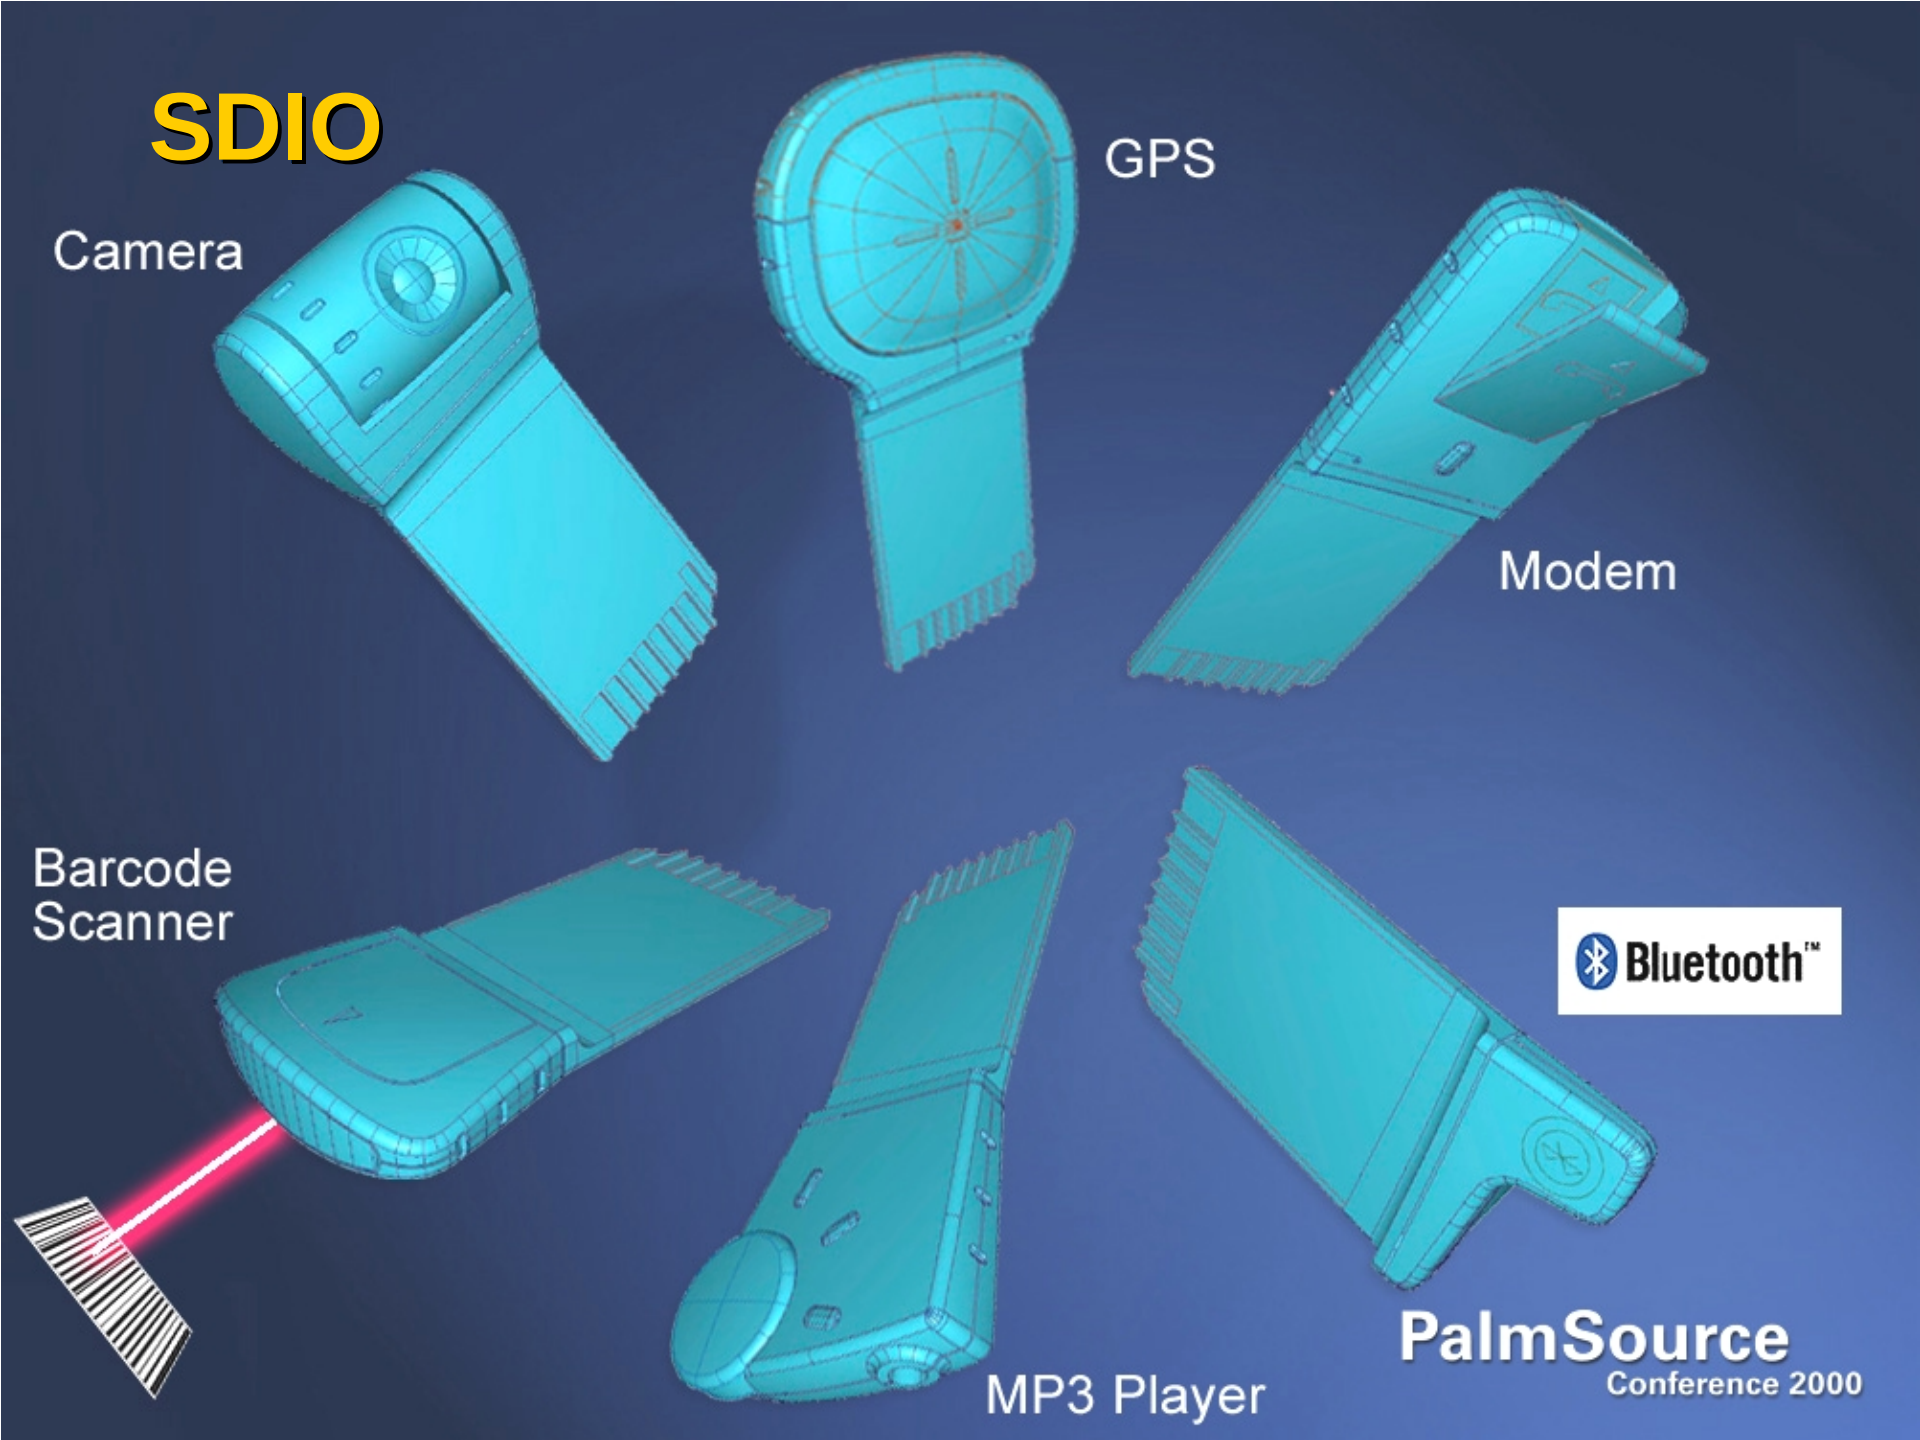

Dual Expansion Architecture
With a Common "Plug & Play" User Experience

- Expansion card slot
  - Why we chose SD & MMC:
    - Size (Think: postage stamp)
    - I/O (for Bluetooth, Ethernet, modems, cameras, etc.)
    - Security (supports digital rights management)
    - Flexibility (used in cameras, video recorders, MP3s, etc.)
    - Open platform (no licensing fees = lots of third-party solutions)
    - Speed (10MB/second transfer rates)
    - Cost (less expensive media because of volume)

WaveLink Company Overview

- Innovative wireless software solutions since 1992
- Over 3,000 customers worldwide
- Utilized by enterprises in more than 50 countries
- Relationships with 100+ VARs, leading network operators and systems integrators
- Thin-Client/Server Architecture Model—Access powerful server-side applications from your wireless Palm OS® device
- Develop in the programming environment of your choice

WaveLink

Enables the rapid development and deployment of robust wireless applications across any network or operating system.

Create applications that run on all networked Palm devices—optimized for the Palm OS

- Write in a language you already know, such as Java, C++, Delphi
- Take advantage of server-side applications—write once, update once, run anywhere, real-time
- Legacy Integration with the IBM Mainframe, AS/400, UNIX

In the Palm of your Hand!
Create Server-Side Applications that do more with the Palm OS

- Pull-Down Menus
- Buttons
- Hotspots
- Signature Capture
- Check Boxes
- Selector Triggers
