Enterprise-Ready Handheld Management Solutions

Dane Avilla
Systems Engineer

PalmSource
Conference 2000

Aberdeen Study

"The technical overhead and impact of implementing handheld devices on the enterprise infrastructure need to be carefully considered, and should be a key part of the decision criteria to implement handheld devices"

—Aberdeen, *The Benefits of Mobilizing Enterprise Applications with Handheld Devices*

Overview

- Challenges to integration
  - Asset management
  - Configuration management
  - Software distribution
  - TCO: Total Cost of Ownership
- Vendor solutions: making IT management simple

Challenge: Asset Management

- Inventory contents of devices
- Count devices on network
- Various device models (Palm, Handspring and others)
- Device statistics (available memory, OS version, etc.)

Challenge: Configuration Management

- Network settings
- Palm OS ® device configuration
- Troubleshoot mobile devices
- Track unauthorized software
- Data backup

Challenge: Software Distribution

- Application distribution
  - Time-consuming to load individual devices
  - Simplify process of upgrading users' applications
  - Consistent versions for all users
- PRC OS updates

Challenge: TCO

- User account creation and permissions
- Data synchronization
- Wireless/wired connectivity
- Mail/corporate data access

Solutions: 3 Groups

- Enterprise management vendors
- Handheld data management vendors
- Mobile and remote management vendors

Solution: Tivoli

Device Manager for the Palm Computing Platform

- Administrative configuration
- Inventory
- Software delivery/removal
- Discover and count devices on network
- Device info
- Network settings
- Palm OS device configuration

Solution: Computer Associates

Unicenter TNG

- Integrated Palm OS ® support in TNG
  - Inventory
  - Software delivery/removal
  - Asset management
  - Device info
- Also available as stand-alone products
- Integrated w/ Palm HotSync™ Server and Aether ScoutSync

Solution: On Technology

Comprehensive Client Manager (CCM)

- Manages Windows clients
  - Inventory of Windows clients
  - Install and configure software: HotSync, Intellisync, etc.
- Extended to support Palm™ devices
  - Software Distribution
  - Application inventory through single interface
- Integrates w/ Microsoft SMS

Solution: Palm

HotSync® Server

- Server sync product
  - Notes, Exchange and IMAP conduits
  - User account management/access controls
  - Backup/restore
- Palm service and support
- Management features
  - Inventory
  - Software delivery/removal
  - Asset management
  - Device info

Solution: Aether

ScoutWare

- ScoutSync: Server sync product
  - User account management/access controls
  - Backup/restore
- ScoutIT: Management features
  - Inventory
  - Software delivery/removal
  - Asset management
  - Device info

Solution: Extended Systems

CONNECT

- Server sync product
  - Centralized configuration of corporate PIM
  - User account management/access controls
    - Lotus Notes
    - Microsoft Exchange
- Management features
  - Software delivery/removal

Solution: PumaTech & Xcellenet

Intellisync & Afaria

- Intellisync: Server sync product
  - Centralized configuration of corporate PIM
  - User account management/access controls
  - Backup/restore
- Afaria: Device management product
  - Device info
  - Software delivery/removal
  - Inventory
- Available bundled or separately

Solution: Synchrologic

iMobile Suite

- iMobile Data Synchronization
  - Centralized configuration of corporate PIM
  - Email synchronization
- iMobile Software Distribution
  - Software distribution
  - System management
    - Inventory
    - Device info

Solution: Callisto

Orbiter

- Integrates with Microsoft SMS
- Management plug-ins for HotSync, ScoutSync, PumaTech and Extended Systems
  - Inventory
  - Device info
  - Software distribution

Solution: Mobile Automation

Mobile Automation 2000

- Device management functions
  - Inventory
  - Software delivery
- Integration w/ Microsoft Systems Management Server
- Optimized for management over low bandwidth

Solution: Critical Devices

Asset Services Management

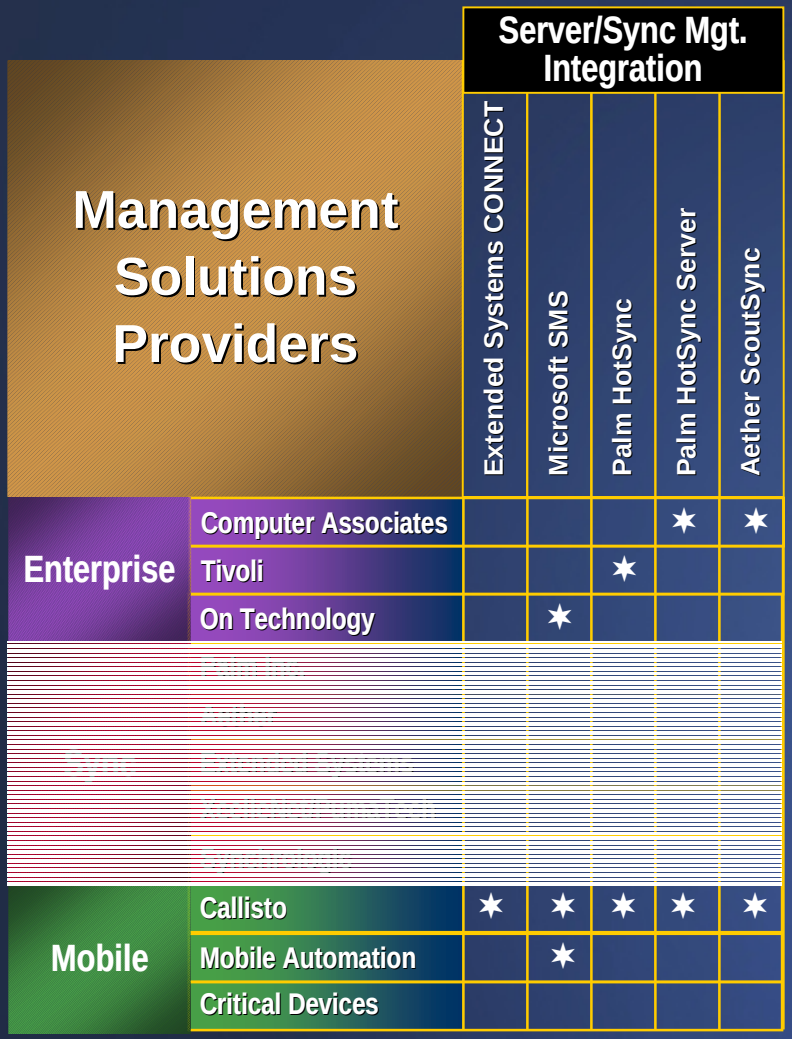

- ASP Model
  - Web configuration of mobile users
  - Web-based device management
- Track physical location
- Device info
- Inventory

Solutions vs. Challenges Matrix

Management Solutions Providers		Asset Mgt.			Config. Mgt.								Software Distrib.	Security
		Count Pre-existing Devices	Device Manufacturer & Model	Device Statistics	Create User Accounts	Import Accounts from Exchange	Import Accounts from Notes	Built-in Server Sync (e-mail/PIM)	Set Device Network Prefs	Set Palm OS Device Prefs	Inventory of Applications	Delete Apps & Data
