# Consumers Want Location-Based Services

PalmSource Conference 2000

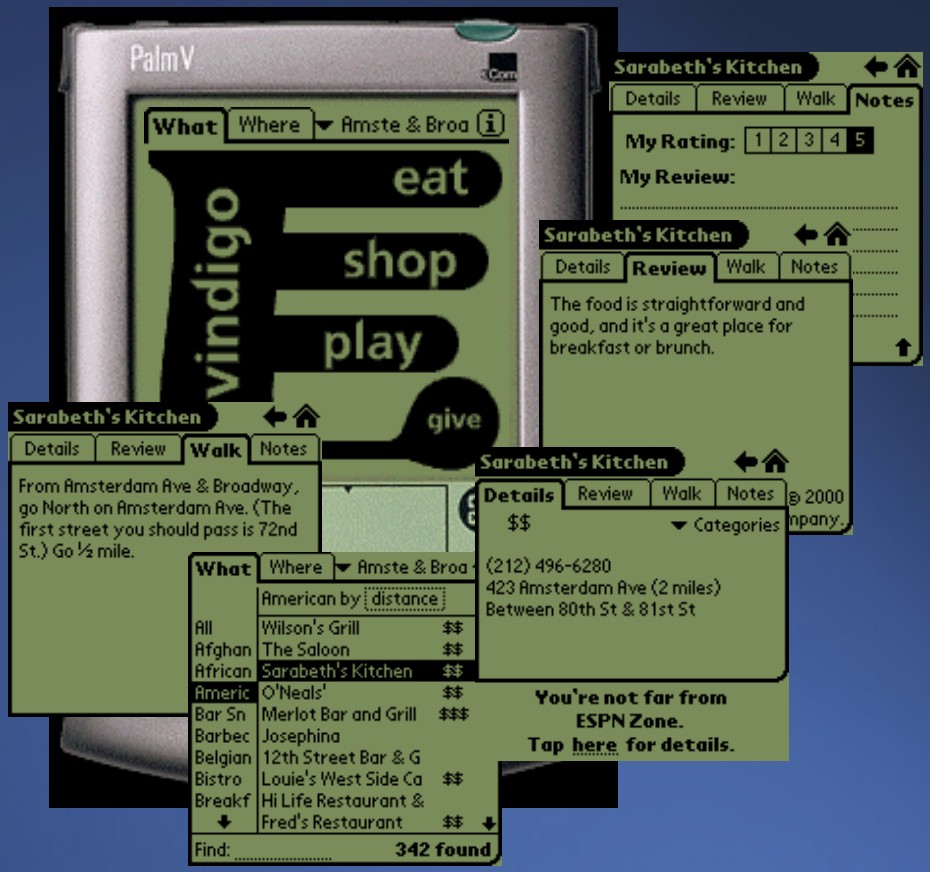

# The Vindigo User

- Today:
  - Upscale, urban, business people
  - Skews male but more women than the overall Palm OS demographic
  - Syncs twice per week on average

- In the future:
  - Broader demographic profile
  - Expansion beyond major urban centers
  - Global reach

# Mobile First, Wireless on the Way

- Start with the Palm OS®
  - Intuitive interface
  - Compact database
  - Automatic updating
  - Smart upgrading
  - Directions on the fly
  - Advertising in context
  - Viral distribution

PalmSource Conference 2000

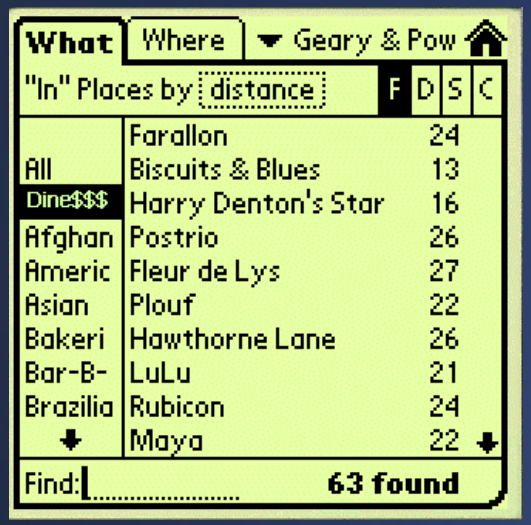

# What Does Wireless Bring to the Party?

- More information accessible: Fewer memory limitations
- Real time updating: Switch cities on the go
- Real time transactions: Purchase when you want it
- Real time couponing: Drive purchases at real world locations

# M-Commerce Is Not E-Commerce

- Q1 total U.S. retail purchases: $817 billion
  - 27% want to find stores and check availability
- Q1 purchases online: $7 billion
  - Only 13% want to buy from online stores
- Mobile devices will transform offline retail
  - Extend the reach of every business
  - Enable consumers to research purchases
  - Allow marketers to track through to purchase
- Wireless capabilities will enhance the transformation

# M-Commerce Partner iDine

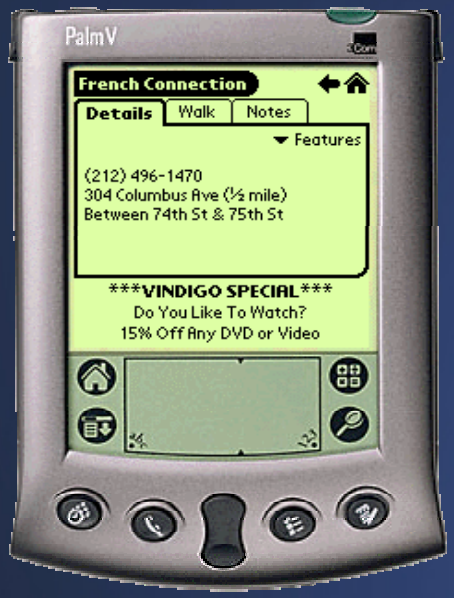

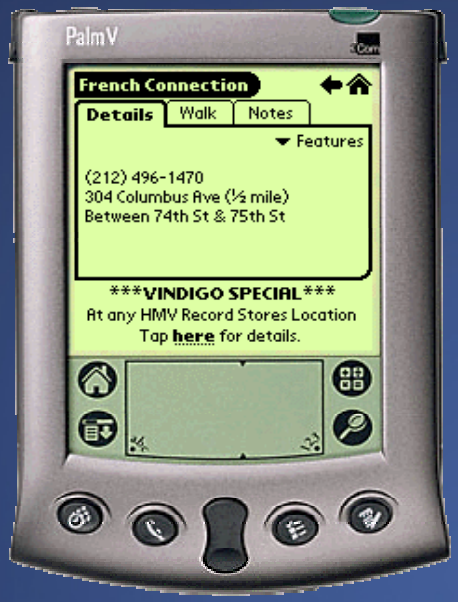

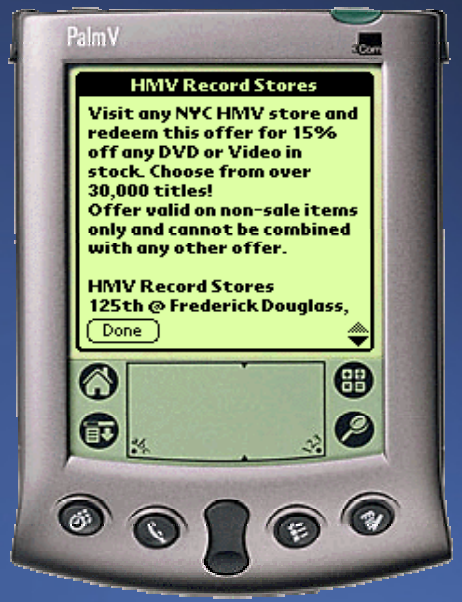

# HMV: Digital Coupons

# Vindigo “Street Savers” Test

- New York only
- 10 weeks
- 12 merchants (over 30 locations)
- Over 300 reported redemptions
- More than $6,500 in purchases

# Conclusion

- Consumers will rely on mobile and wireless devices to access location-based information every day
- Mobile devices will be the primary means by which brick and mortar retailers use the Internet to communicate with consumers
- Location-based services will drive both mobile advertising and commerce

PalmSource Conference 2000

# Yodlee

Shailesh Rao
Director of Mobile Services

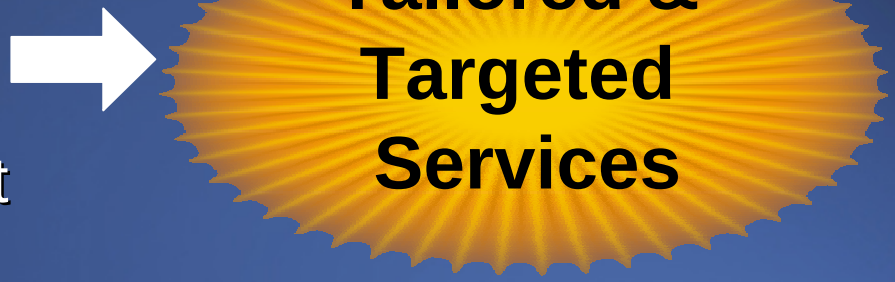

PalmSource
Conference 2000

# The Case for Wireless Personalization

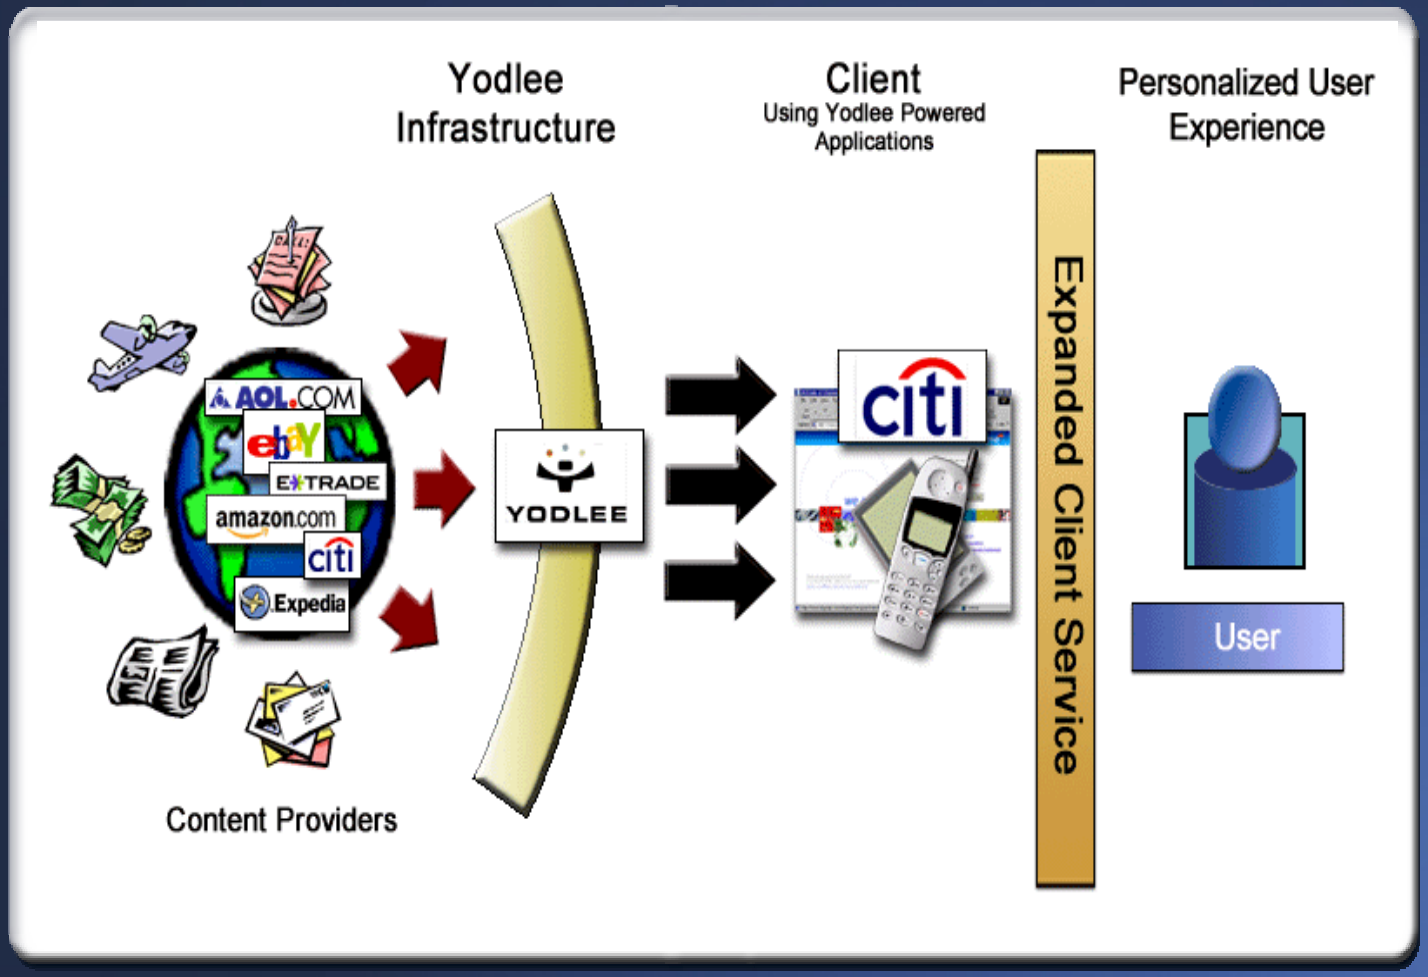

# Key Wireless Characteristics

- Difficult data entry
- Significantly smaller form factor
- User context more focused
- User tends to be in a resource poor environment
- Less bandwidth

# Yodlee Vision

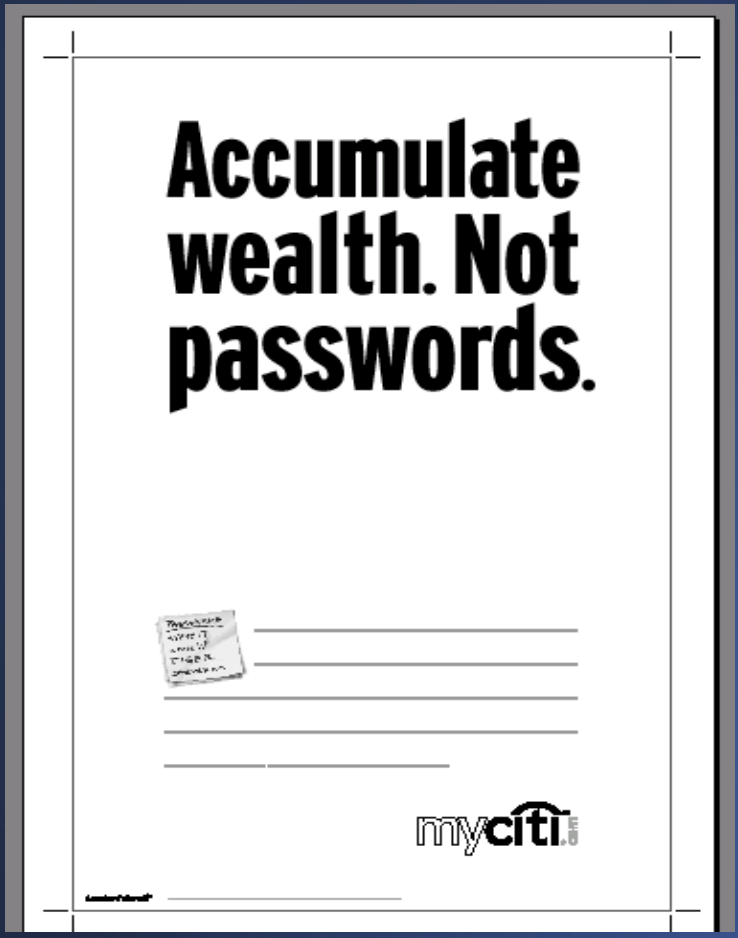

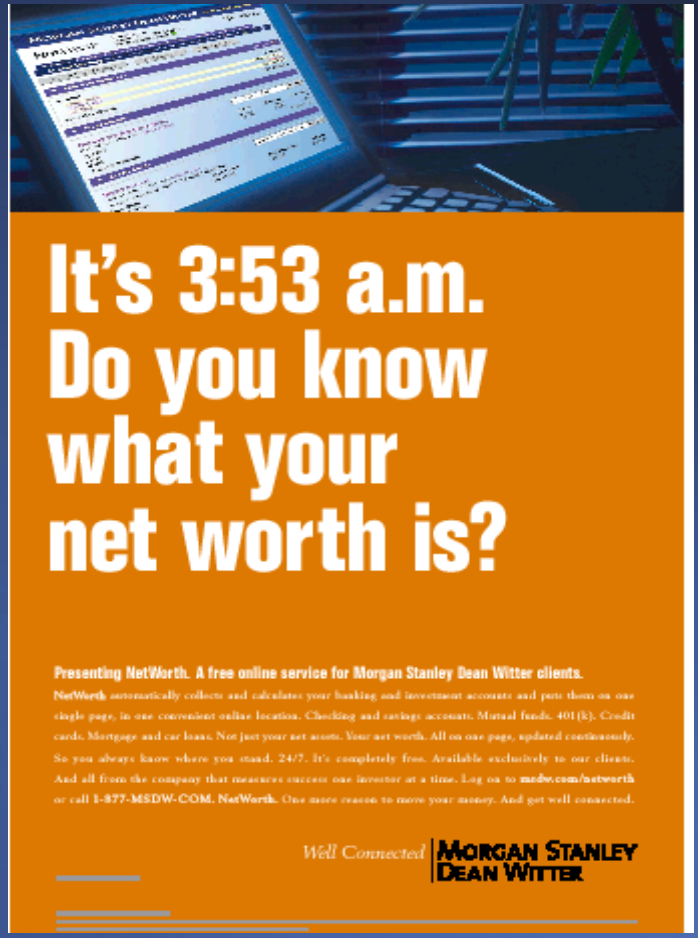

- Yodlee launched the first consumer account aggregation service in September 1999
- Today Yodlee summarizes and aggregates personal content from 7 different channels, 30+ categories, and over 2,000 Web sites
- Yodlee provides anywhere and anytime access via multiple devices and appliances

# Partnerships (Over 160 Total)

# Winning With Aggregation

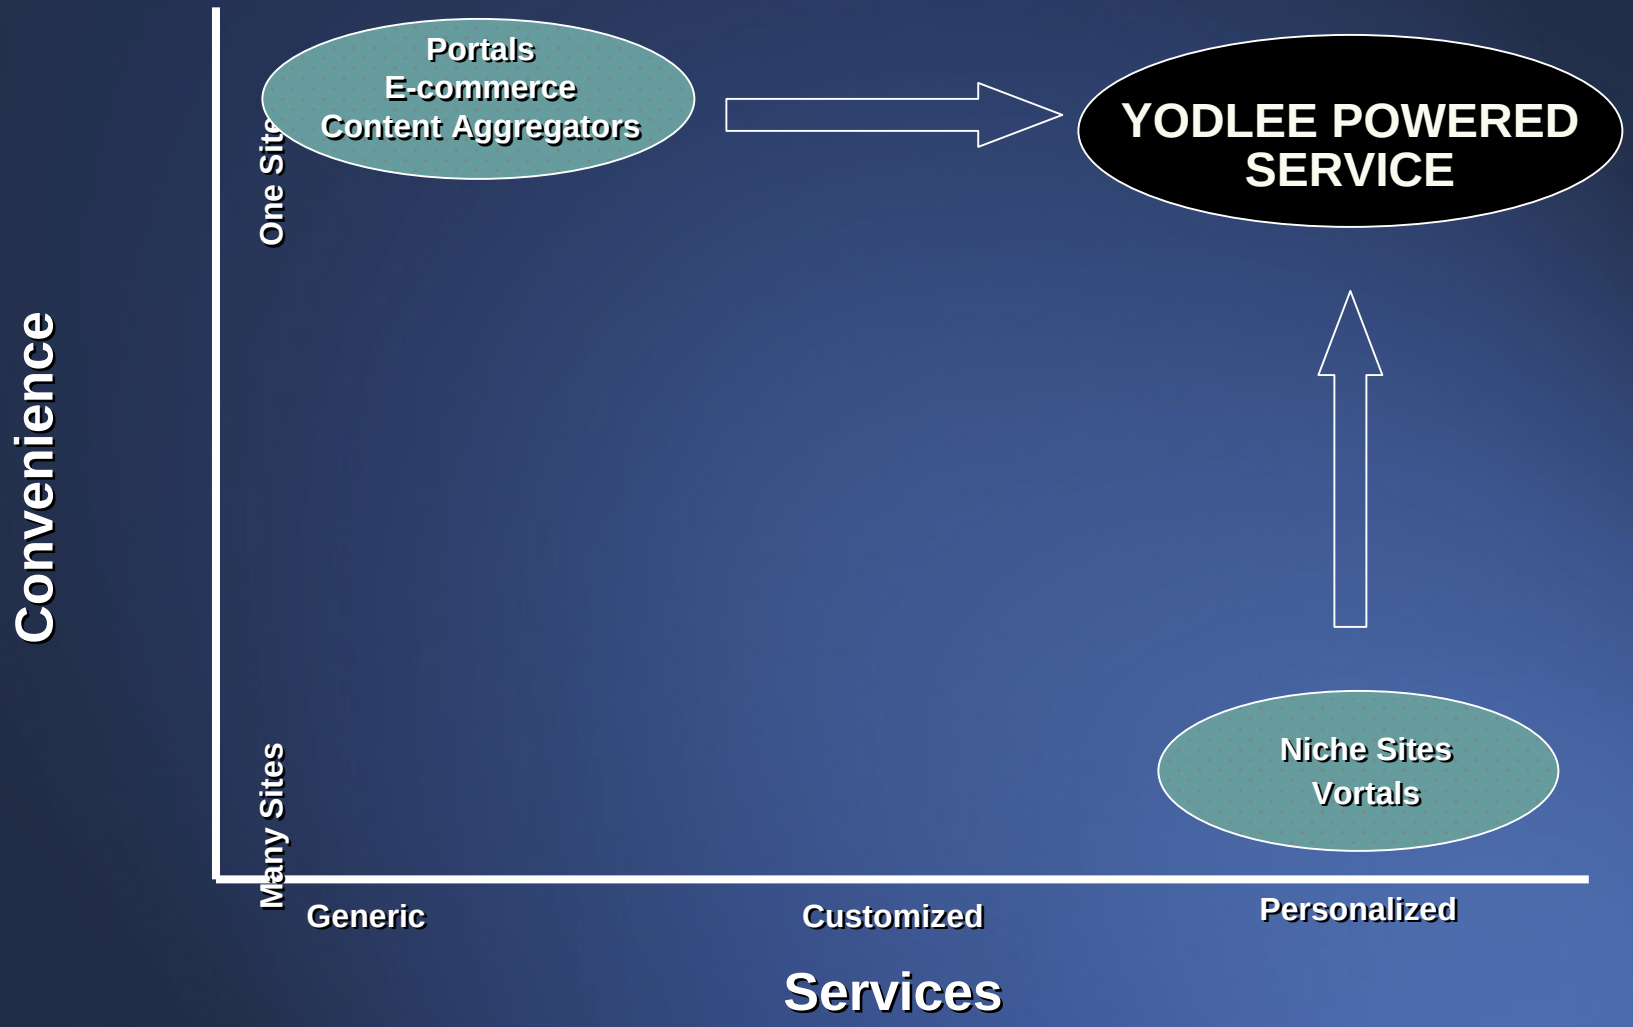

***"[Aggregation is about] cross-selling the grown up way, and investing in the relationship and not the product."***

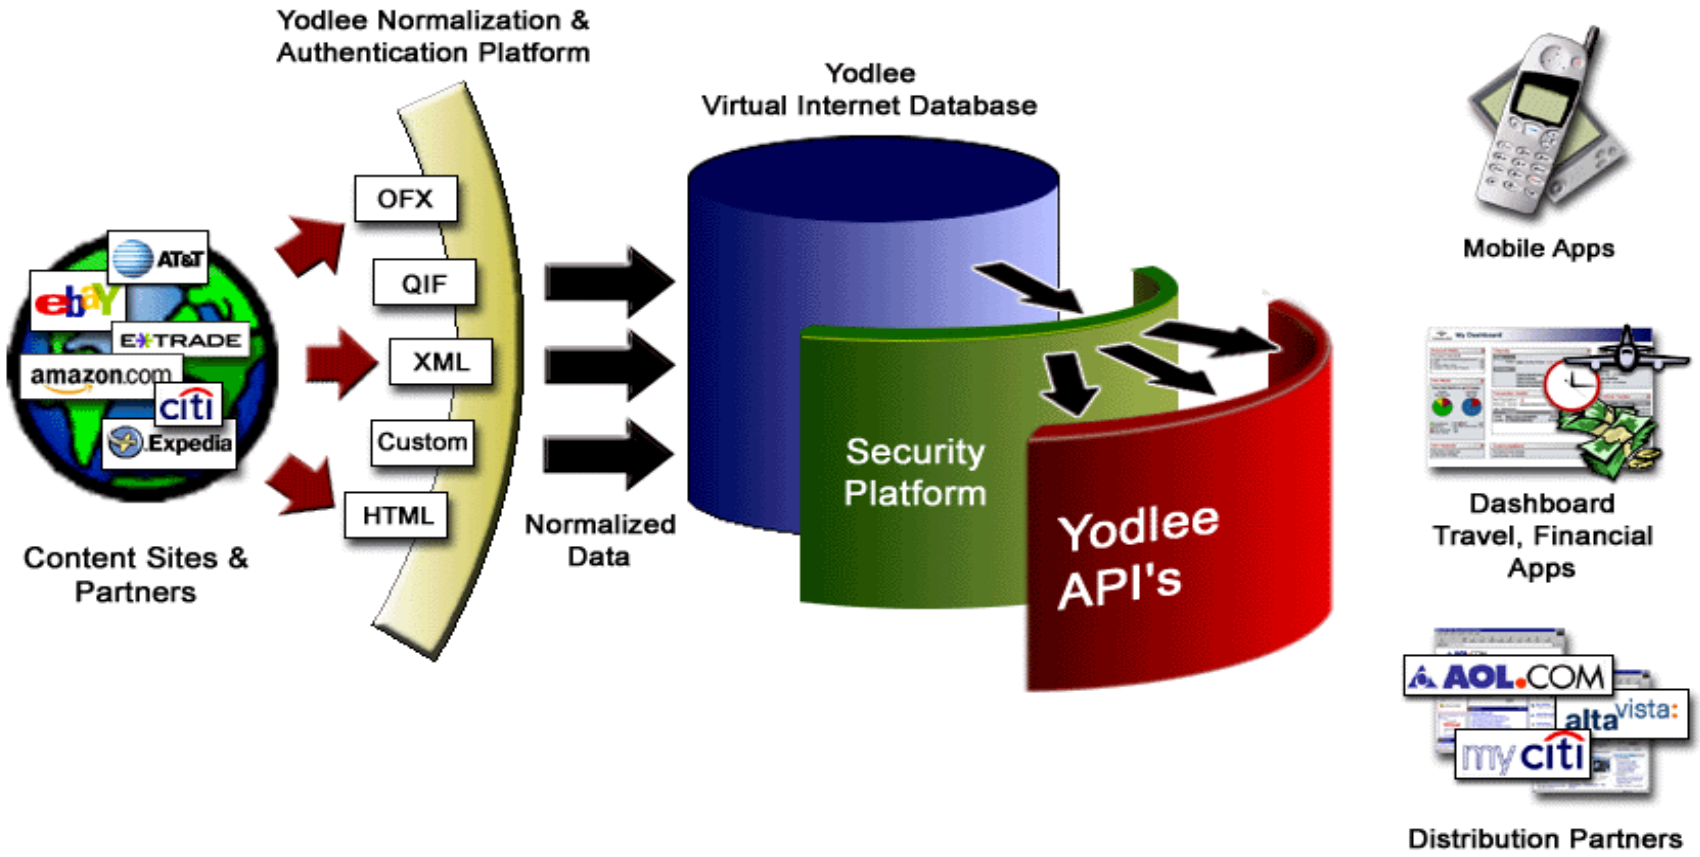

***– Citibank executive***

# Service Providers Converge

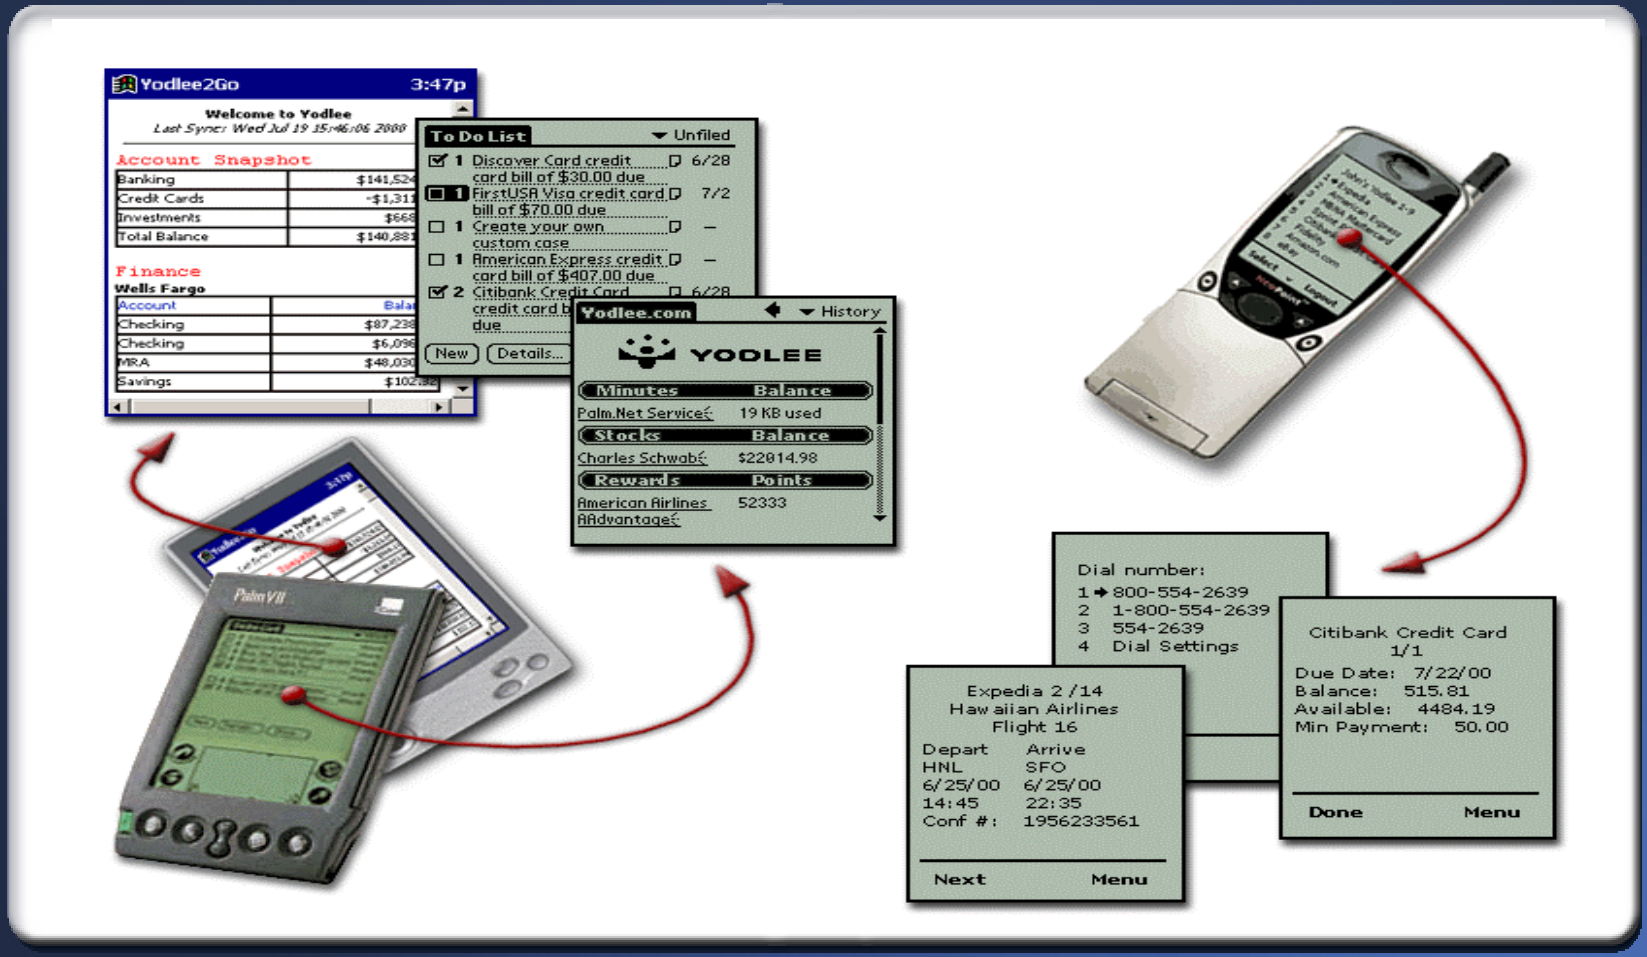

# What Is Yodlee?

**The Premier Information Platform in Personal Value Added Services**

# Mobile Solutions

- Yodlee renders content to multiple devices through apps which were developed internally
- Devices include the Palm III/V and VII, Pocket PCs and Wireless Phones

# MyInfo Wireless PDA Application

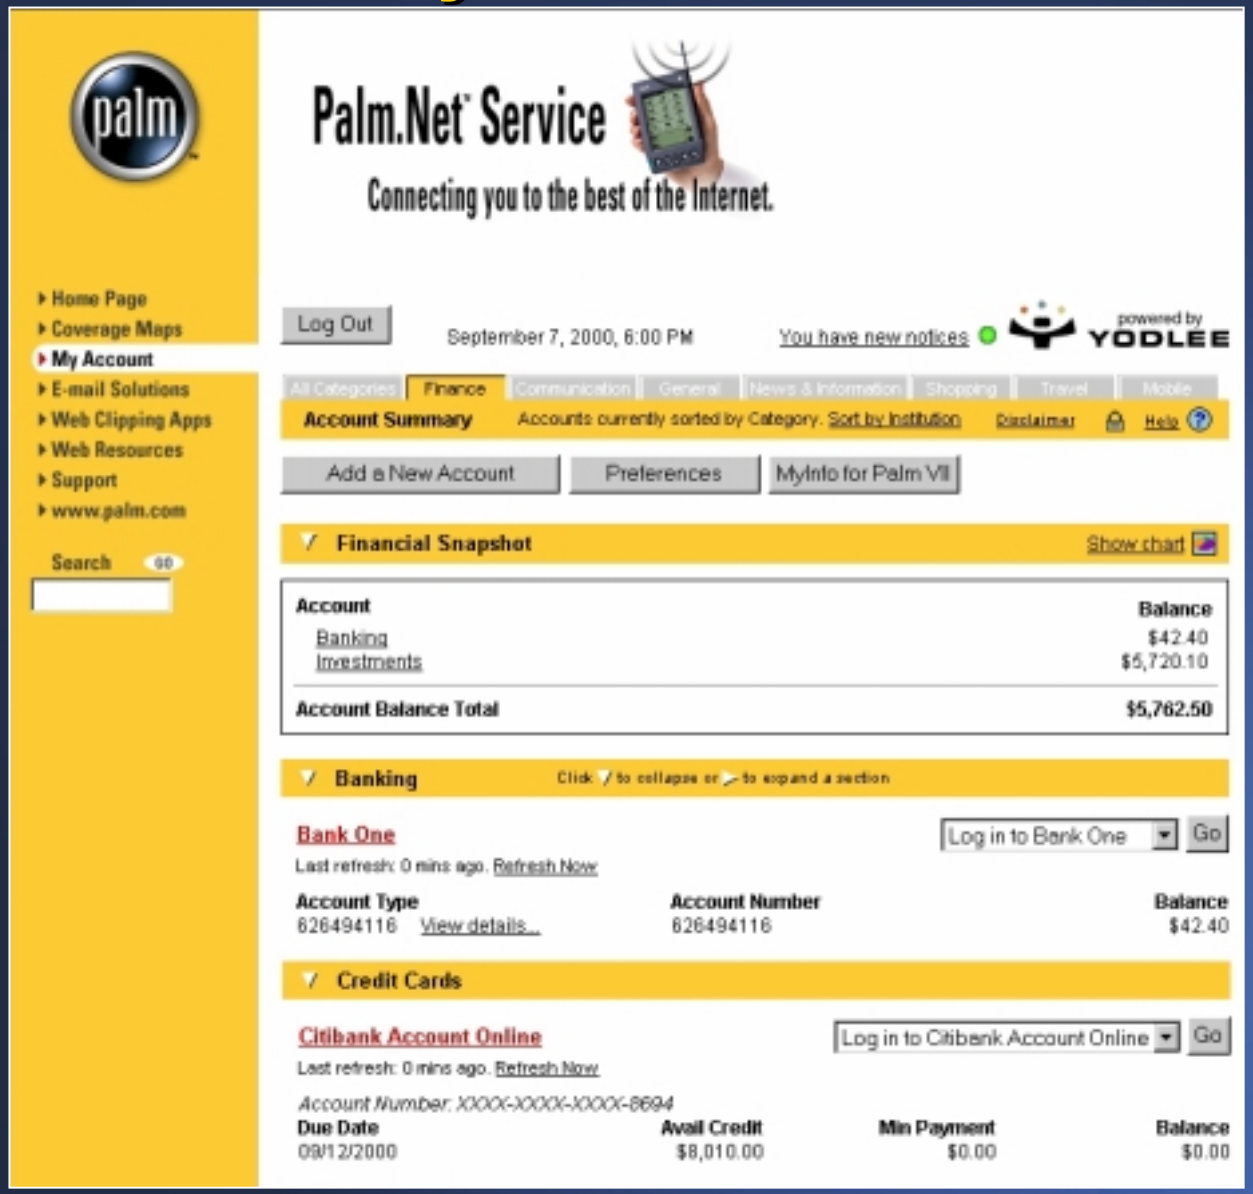

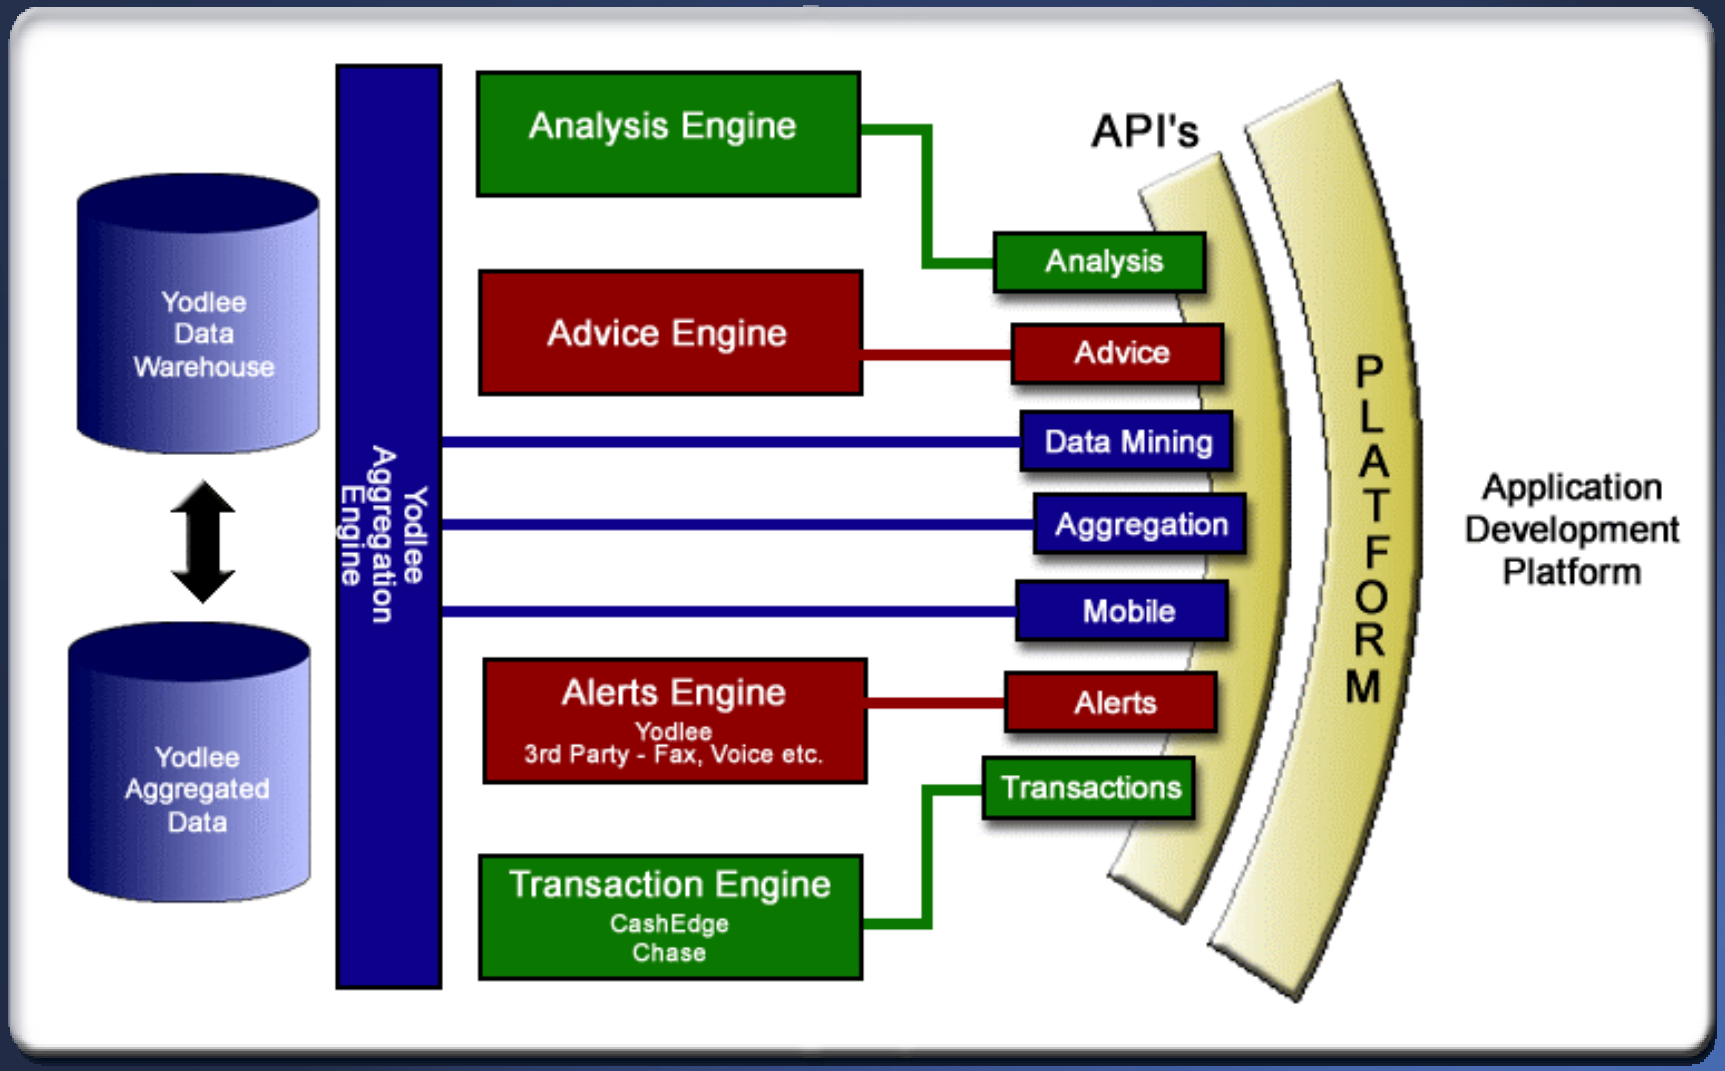

- **A single, secure Yodlee password** to wirelessly access all your accounts
- **A summarized view** of your latest account activity
- **One click exports** of travel and hotel reservations, credit card, bank accounts, investments into DateBook, ToDo, and MemoPad applications
- **Secure Logout** functionality to clear cache of sensitive personal data
- **Select which sites** to export and view on your Palm™ Wireless device

# Palm's "MyInfo" Co-branded Service

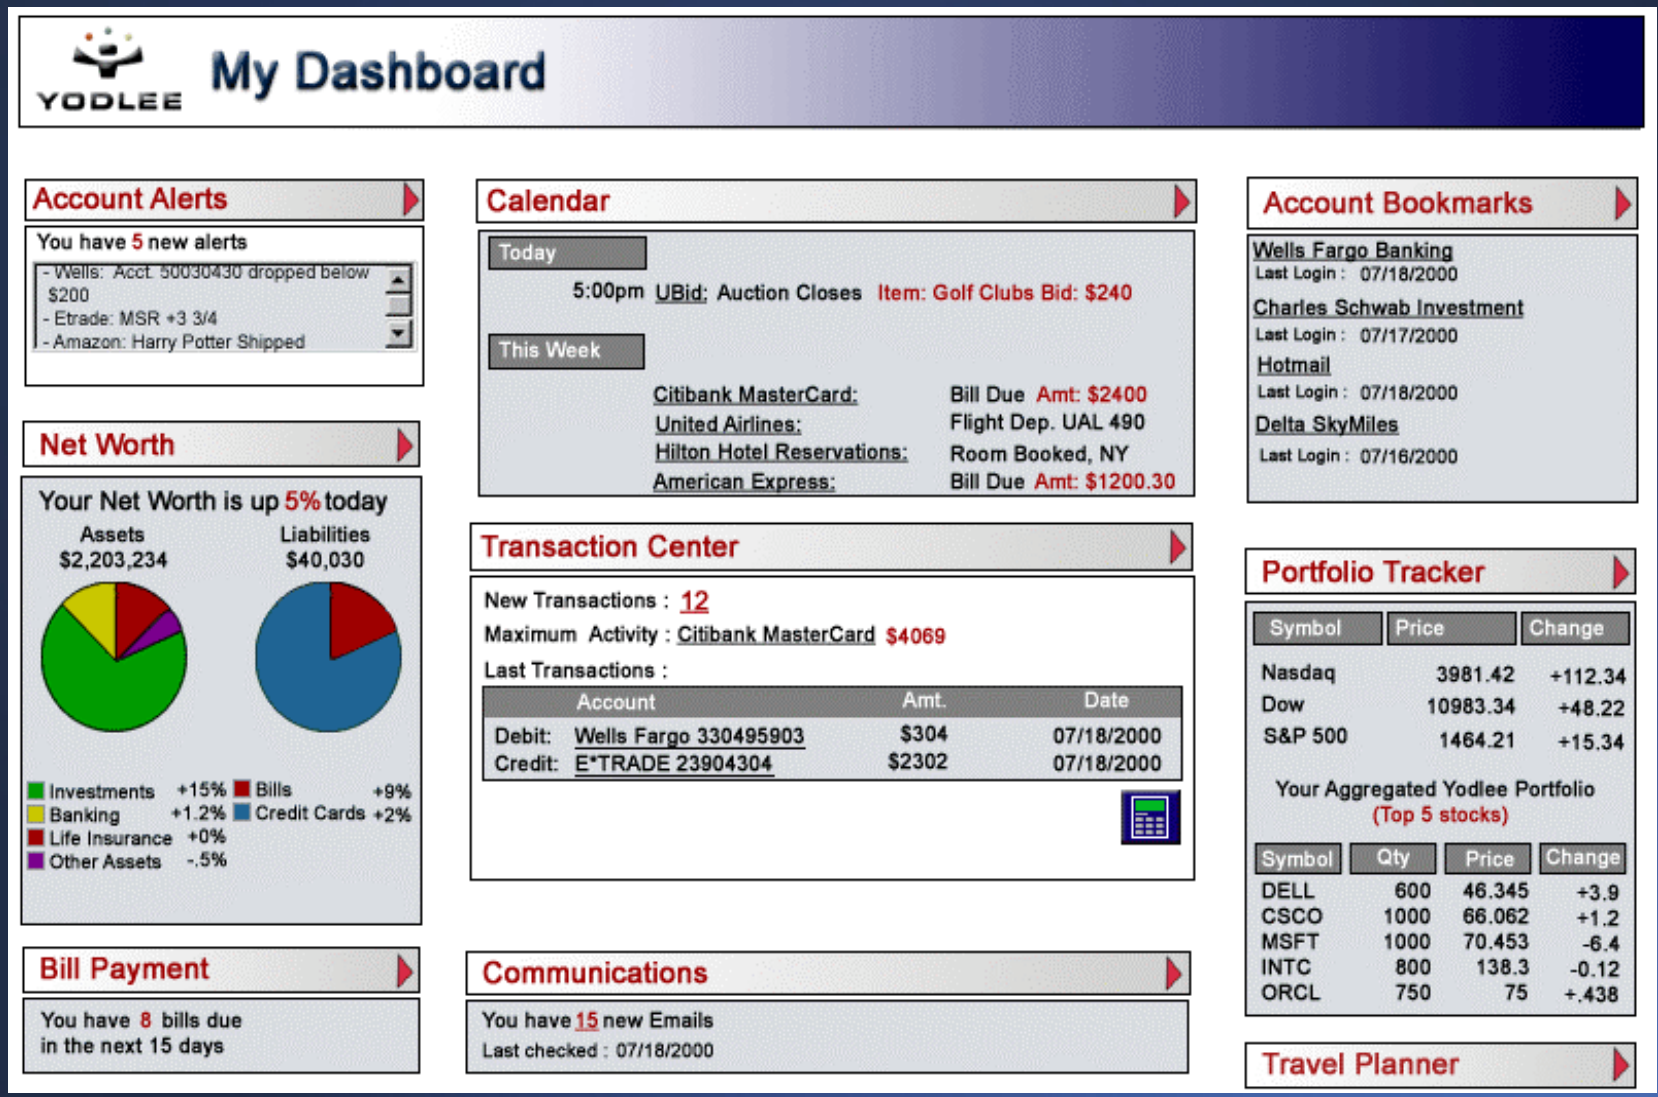

**Yodlee will provide partners with professional services and customize the look and feel of the site to your standards**

# Platform Overview

# My Dashboard

# Application Development on Yodlee's e-Personalization Platform

- Application Developers building on top of our platform will be able to use our APIs, published PDB formats, and Java SDK to:

  - Access aggregated personal data (flight reservations, frequent flyer miles, bank, credit card, and brokerage balances, transaction histories, etc.)
  - Disseminate information into the built in PIM applications from a PQA or PRC
  - Securely logout the user by clearing out the web clipping cache

# Conclusion

- Aggregation is capturing the imagination of the wireless marketplace
- Users are ready for something simple, personal, and convenient
- Aggressive consumer service providers are well positioned to be the “hub” for their consumers
- Aggregation is the right platform for future wireless application development
- Join the Yodlee Developer Network and help consumers do wireless right and get personal

# AOL for Palm™ Handhelds

John Metzger
Senior Product Manager AOL Anywhere

PalmSource
Conference 2000

# Why AOL on Handhelds

*AOL Handheld Devices Mission:*

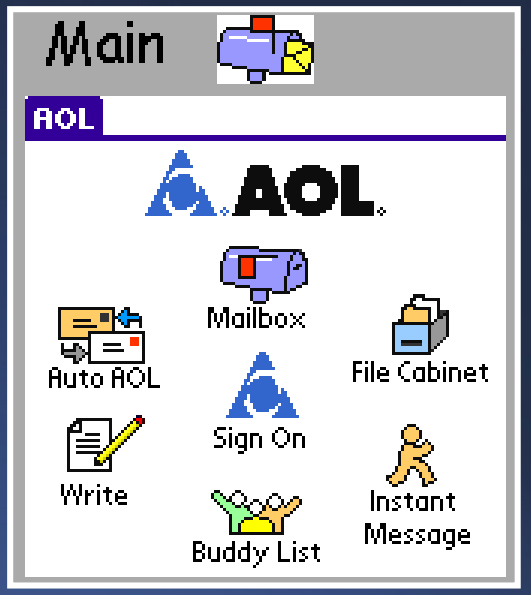

- Bring the convenience of AOL to handheld devices to serve our customers anywhere any time

*Business Case:*

- Core differentiator for AOL Brand
- Serve the needs of members beyond the PC
- Retention: extend the reach of core sticky apps

*Provide the right product at the right time for the right value*

# Functionality

*Initially:*

- Focus on retention
- Consistency across multiple platforms
- Must haves:
  - AOL Screen Name required
  - Core sticky apps; including AOL Mail and instant messaging

*Future:*

- Conduits: offline access to AOL
- Content: Online and offline access to AOL content
- Monetization: moving beyond retention to acquisition

# Bringing AOL to Palm OS® Handhelds

*Provide AOL interface for tethered and wireless devices:*

- AOL look and feel
  - Extends brand
  - Familiarity: Sign On sequence and Mail
- Ease of use
  - Desktop metaphor for easy navigation
  - Use of Palm OS features; shortcuts and address book

# Typical AOL for Palm™ Handheld Users

*Target:*

- 25 million plus AOL members

*Current Users:*

- Emotionally attached members to AOL core services
- Members who desire convenience of a portable device
- Demographic groups with relatively low AOL usage
  - Small businesses
  - Users of non-core services provided by AOL companies; including MapQuest, MovieFone and Digital Cities
- Business/professional, male, college educated

*Future:*

- Mass market consumers with a handheld

# Development Experience

*First AOL for Palm client released September 1999:*

- Development will take longer than anticipated
  - Conduits: be sensitive to user data and other applications
  - PQAs: understand the limitations
  - PRCs: manage file size
- Know Palm's roadmap for applications and devices
- Work closely with Quality Partners

# Relationship with Palm, Inc.

*Expanding:*

- Improved win/win business relationship
  - New AOL for Palm products
  - In the box distribution of AOL applications
- Opening doors and improving communication
  - Growing point of contact list for business and technical support
  - Palm sharing future product plans
- Palm wants vendor participation at trade shows

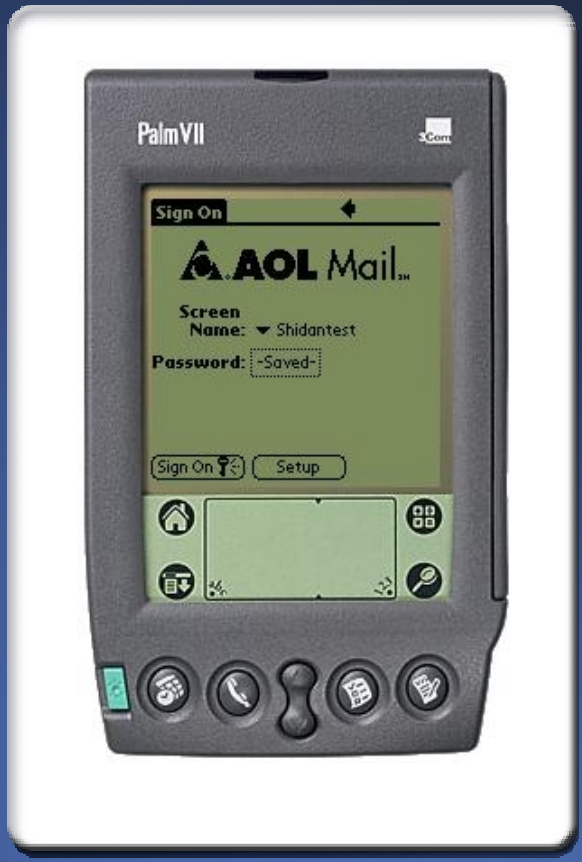

*Room for Improvement:*

- Joint Palm/vendor application testing
- Availability of devices prior to GM

# Parting Piece of Advice

*Think about Marketing:*

- Get your piece of growing handheld market
  - People: define and understand your target user
  - Product: develop to the needs of your target user
  - Placement: make your product easy to get
  - Promotion: Reach your target user
