Publishing Software on Expansion Media Cards

Steve McGuigan

Manager, Software Business Development

Overview

- Palm's commitment to Expansion
- Why did Palm choose SD / MultiMediaCards?
- Third Party Publisher Program
  - Concept and tools
  - Development services
  - Production partnerships
  - Promotion and marketing support
- Expansion cards in the Enterprise
- Where to go for more information

Palm is Committed to Expansion

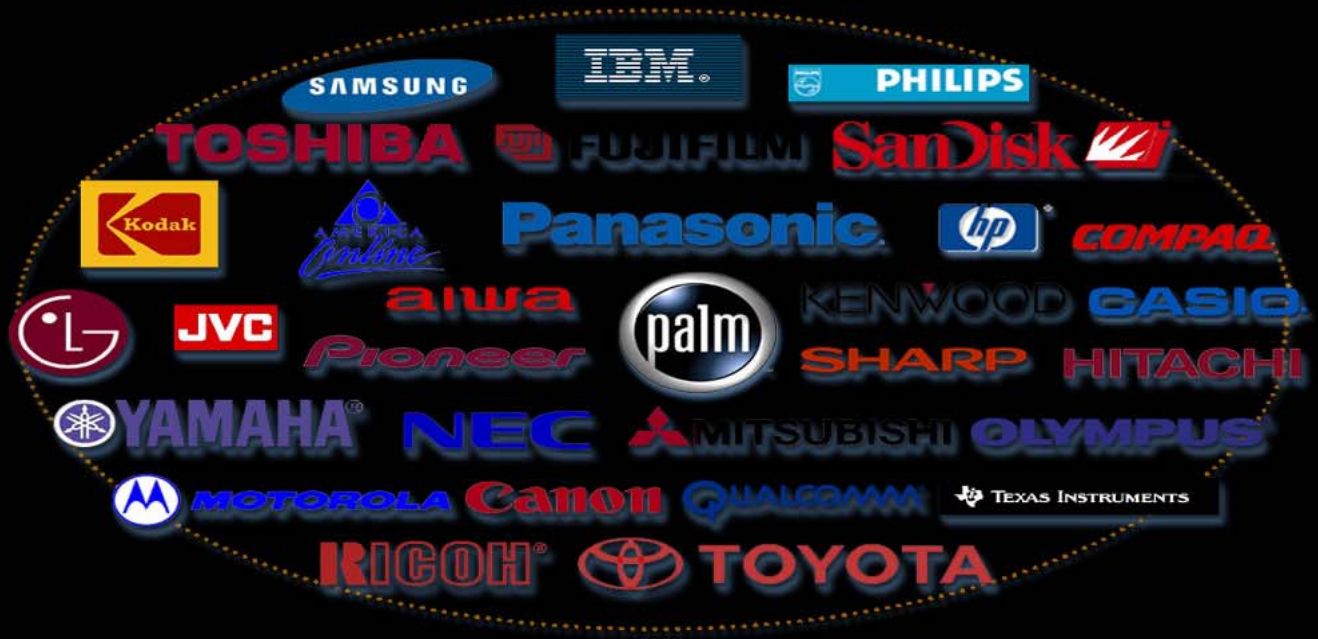

- Palm supports both SD Cards and MultiMediaCards in the Palm Expansion Card Slot
- Palm will continue to support the Expansion Card Slot in its roadmap going forward

Palm™ m125 Palm™ m500 Palm™ m505

Why Palm Chose SD/MultiMediaCards

- Industry-wide standards
- Non-proprietary, open platforms
- Size and capacity:
  - Small form factor
  - Shipping up to 256 MB, with planned capacity of 1 GB
- Supported by over 500* leading companies worldwide

*SDA & MMCA

Publishing Software through PluggedIn Program

- 4 distinct phases:
  - Concept phase
  - Development phase
  - Manufacturing phase
  - Go To Market phase

- Designed for Palm Handhelds Program (DFPH)

Concept Phase

- Expansion media capabilities and tradeoffs
  - ROM vs. Flash
  - Card size and available storage
  - Costs
- Application white papers and requirements
  - Making your application card aware
  - Optimizing your application for executing from expansion media
  - Sample code

Development Phase

- Application Programming Interface (API) to access expansion media on Palm OS® Version 4.0 and higher
- May be eligible for early hardware access
- Developer technical service answers via email
  - software@palm.com
- Software compatibility testing from third party test house
  - Requirement for use of DFPH logo
  - Ensures compatibility with current and legacy hardware platforms
  - Fees dependent on number of PRCs and conduits tested

Production Phase

- Palm-negotiated pricing:
  - Media with select SD and MultiMediaCard Flash and ROM manufacturers
  - Palm negotiated pricing for clamshell production
  - Palm negotiated pricing for packout services
- Programming and labeling services from select third party vendors
- Palm mechanicals and tool for clamshell packaging
  - Ensures compatibility on retail shelves

Promotion Phase: Uniformity in Retail

- DFPH guidelines standardize and call out Palm™ handheld compatible solutions to buyers and on shelf, including:
  - Color palette recommendations
  - Standardize logo and violator placement
  - Package insert mechanical files

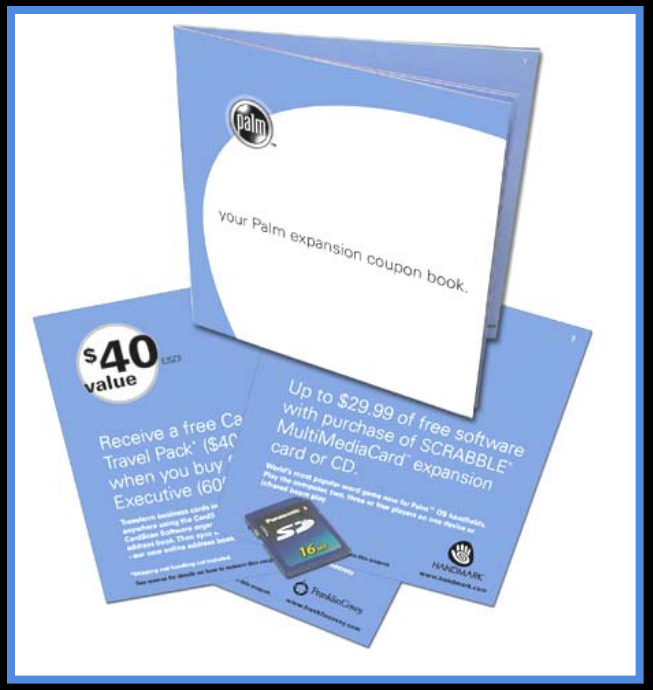

Promotion Phase: Retail Opportunities

- Buyer contact information
- Events
  - Retail Vision channel event
  - Demo Days
- Inclusion in Palm Sell-In Guide
  - Quarterly channel marketing tool
- Palm Sales assistance
  - CompUSA consignment program
  - Store-within-a-store placement

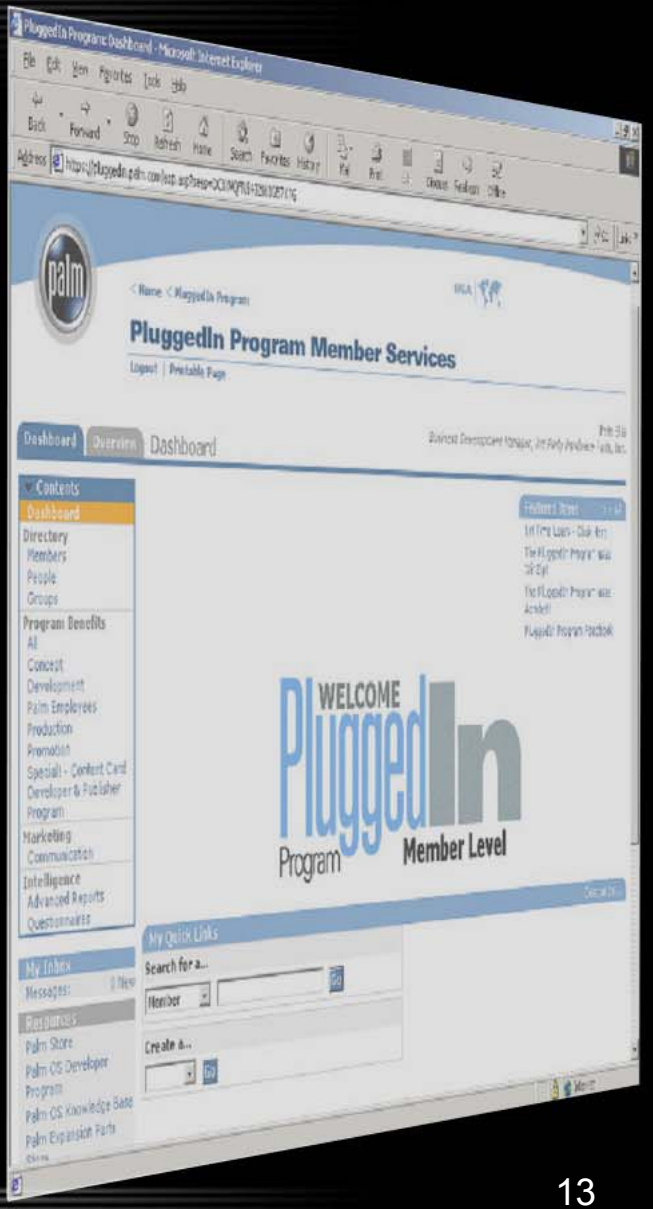

Promotion Phase: DFPH Marketing Benefits

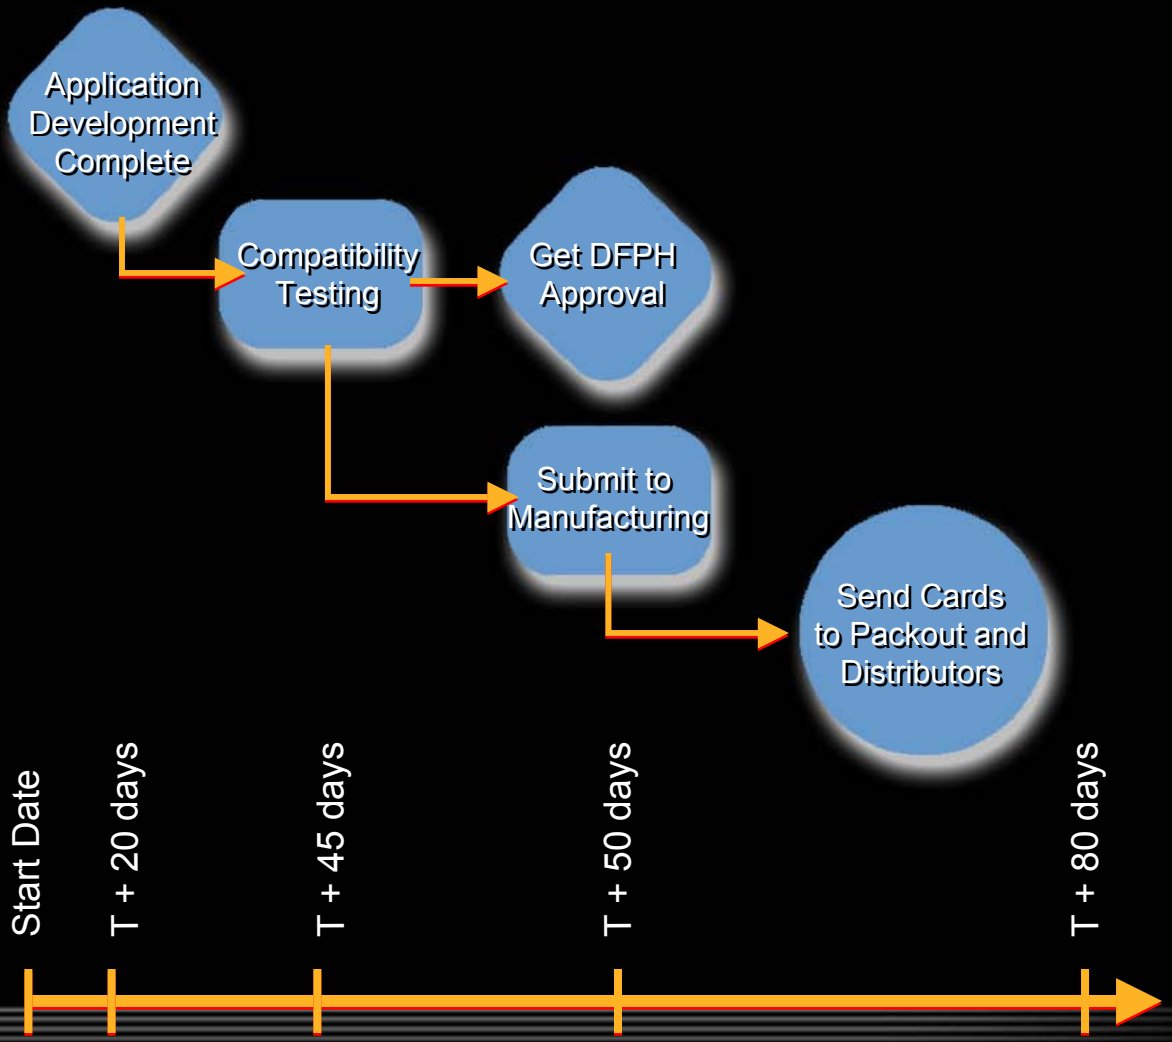

- DFPH Marketing Benefits
  - Inclusion in Palm Store
  - Placement in Palm advertising
    - Requires DFPH
  - Quarterly marketing programs
    - Require DFPH
    - Examples:
      - Fall 2001 In-Box Coupon Book with free 16MB expansion card
      - Spring 2002 Full-page national print ad with eight expansion developers
  - Major International trade shows

7 Steps to Develop Content Cards

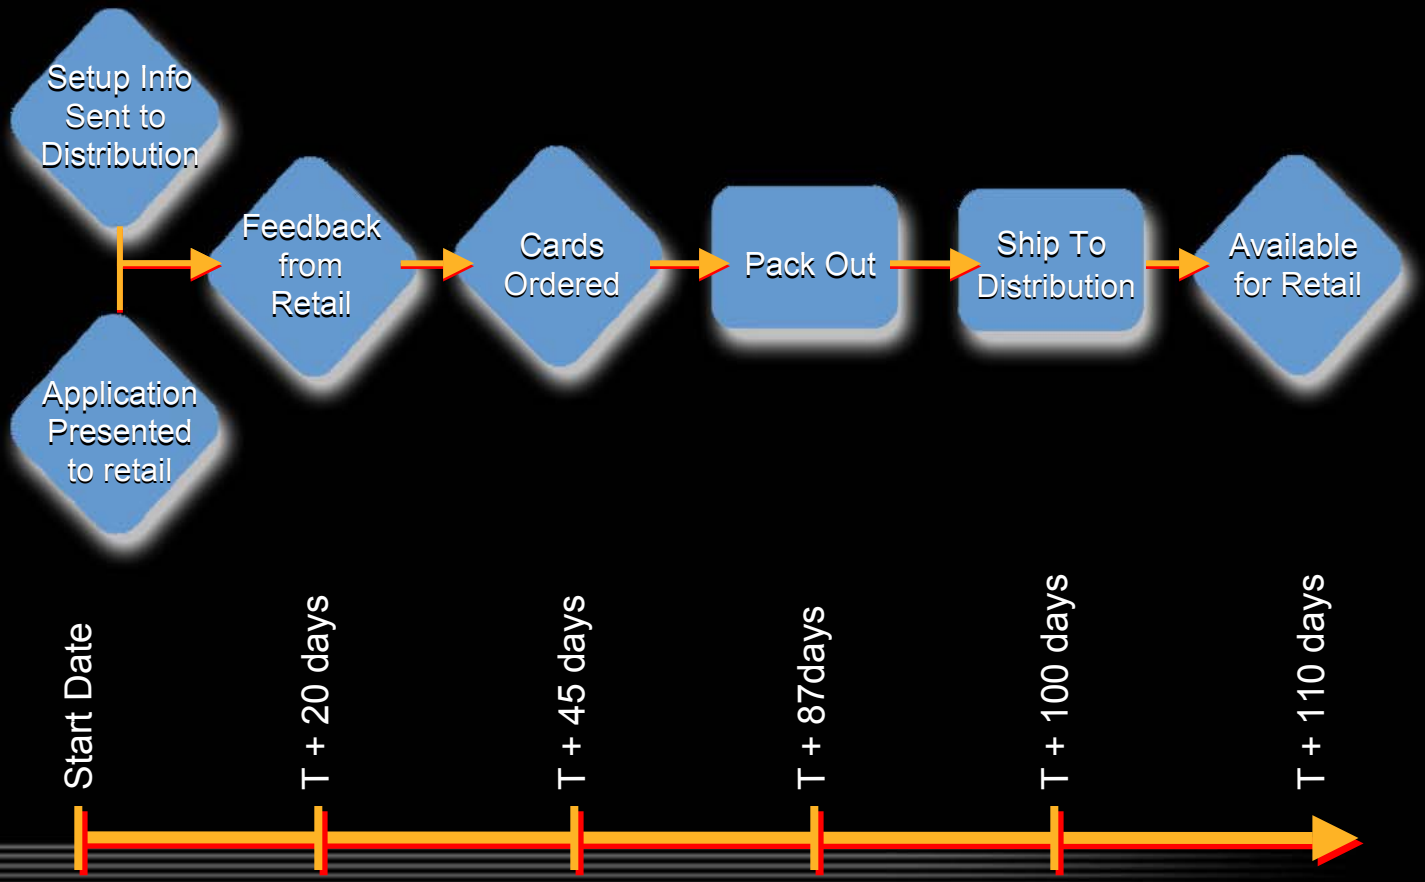

1. Sign up for PluggedIn Program
2. Education
3. Development
4. Testing
5. Manufacturing
6. Packaging
7. Ship to distribution

Milestones to Manufacturing (timeline)

Milestones to Retail (timeline)

U.S. Retail Shelf Reset Dates

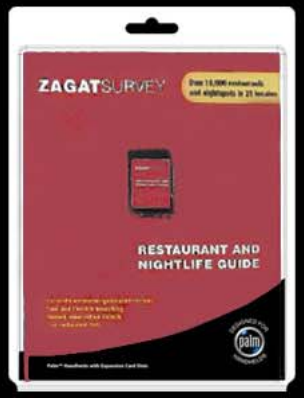

Deadline for Product & Setup Info to Distributor	On-Shelf Date
June/July 2002	*Back To School & Holiday Season*
January 2003	*Post Holiday*
February/March 2003	*Dads and Grads*

Who has Manufactured on Expansion Media?

- Handmark Scrabble
- Pocket Express Entertainment Pack
- Franklin Electronic Publishers King James Bible
- Franklin Covey Reference Shelf
- Landware Zagat's Guide
- Franklin Electronic Publishers Physician's Desk Reference

Expansion Cards in the Enterprise

- When to use expansion cards
  - Data size is greater than 8MB
    - Ex: Company sales guide, company address book, etc.
  - Portability
    - Carry large amounts of data in small form factor
    - Ex: Technical manuals or company procedures
  - Dual expansion
    - Utilize Universal Connector peripheral and expansion media at same time
    - Ex: Camera on universal connector, save images to card
  - Distribution of software or content to employees in field

Developing Cards for the Enterprise

- Process
  - Once application or content is complete (.prc and .pdb complete), approximately 30 days to manufacture
  - Similar to process for commercial cards except:
    - No need for DFPH testing
    - No need to package
    - No need for commercial distribution
- Costs
  - Varies depending on card capacity, volumes, etc.
