Next Generation Palm Development Tools

Gerardo A. Dada, Sr. Wireless Industry Marketing, Metrowerks

gdada@metrowerks.com

Learn about the new tools available to develop applications for Palm OS® handhelds

metrowerks

Agenda

- New Challenges, New tools
- RAD Tools
- Enterprise Applications
- Java 2 Platform Micro Edition™
- ARM processors

metrowerks

Why New Tools?

- Innovative Palm OS-based handhelds with new exciting features
- More powerful OS creates exciting opportunities for a new generation of applications
  - Enterprise Applications
  - Wireless
- Java creates new opportunities
  - More devices, bigger market for your applications
  - J2ME middleware

Agenda

- New Challenges, New tools
- RAD Tools
- Enterprise Applications
- Java 2 Platform Micro Edition™
- ARM processors

metrowerks

Rapid Application Development

- Leverage BASIC language programming skills
- Good for creating simple applications
- Complementary to C++ development tools
- Usually require significant runtime
- Slower than C++ applications
- Limited application scope

Metrowerks RAD Tools

- Edit resources without leaving IDE
- C++ code generation from resources
- Support Object Library for Palm OS®
- Supports custom controls
- Reduces time-to-market while preserving C++ speed/size advantage
- Available in CodeWarrior for Palm OS **V9**

Agenda

- New Challenges, New tools
- RAD Tools
- Enterprise Applications
- Java 2 Platform Micro Edition™
- ARM processors

Requirements for Enterprise Applications

- Mobilize information - productivity
- Secure information exchange
- Integration with existing systems
  - Databases (Oracle, MS SQL, Sybase)
  - Mail (MS Exchange)
  - Applications (CRM, SFA, etc)
  - XML
- Authentication

Models for Mobilizing Data

- Thin Client (WML)
- Cradle Sync - Conduit
- Database Gateways
- On-device DBMS + Synchronization

Over a LAN or WAN

- Bluetooth / 802.11 wireless networks
- Cellular 2.5G / 3G

CodeWarrior Enterprise Tools

CodeWarrior for Palm OS, Enterprise Edition V8

- Windows x86 tools for conduit development
- Database Wizards
- Integration with forthcoming Palm, Inc.’s Data Access Server
- iAnywhere UltraLite
- C++ Library / Object Framework
- Support for additional SDK

Agenda

- New Challenges, New tools
- RAD Tools
- Enterprise Applications
- Java 2 Platform Micro Edition™
- ARM processors

metrowerks

J2ME™ is becoming a standard

- PDAs, SmartPhones and in-betweens
  - Hundreds of Millions of Devices in 2003
- Leverage standards in Middleware and additional APIs
  - Location APIs, Gaming APIs, JMS, etc.
- There are Challenges for Java™
  - Execution Speed
  - Access to Palm OS® APIs and device features

CodeWarrior for Java™

- First Development tool to support J2ME™, Personal Java™
- The same CodeWarrior IDE you use for C++ Palm development
- Support for most SDKs and VMs
- Partnerships with Insignia, Esmertec, Kada
- The leading IDE for Wireless Java development

Agenda

- New Challenges, New tools
- RAD Tools
- Enterprise Applications
- Java 2 Platform Micro Edition™
- ARM processors

metrowerks

CodeWarrior for ARM

- Embedded ARM development tools
  - Official tool for the DragonBall MX1 ARM
  - Support for Intel Xscale
  - ARM Ltd's ARM developer Suite
- Metrowerks is a Motorola company, strong experience in embedded processors
- ARM Migration Toolkit – Check our booth
- New tools in the future

Thank You!
