

# PalmSource®

## Conference and Expo

# Wireless Vs WireLine Palm Solutions

## Voice, Messaging & Data Integration Opportunities

Christian Kazamias, cc2GO Wireless Technologies

To review the Voice, Messaging, Content & Navigation Data Integration Opportunities available to Palm Developer / Enterprise Community

# Agenda

- Voice / Data Market Overview
- Available Mobile Technologies & Palm based Hardware / Options
- Wireless Integration Opportunities
- Available Tools and Products

cc2GO

# Voice / Data Market Overview

## What are the Global Influences for Mobile Communication Technologies ?

cc2GO

# Voice / Data Market Overview

**Europe / Asia Pacific**

- Voice and Data Market Focus
  - Content has Messaging / Data focus
    - Myriad of available content
    - Delivered by a range of mediums / services
      - SMS (Push / Pull – Store and Forward medium)
      - Packet based (Instant Delivery Medium)
      - Dialup (Pull services)
      - Other Messaging Delivery services (Instant or Push Delivery)
  - Voice integration with SMS / WAP matured
    - Mobile Phone used for telephony / Messaging and Data

cc2GO

# Voice / Data Market Overview

**USA and Americas**

- Segmented Voice and Data Markets
  - Content has Data-centric focus
    - Myriad of available content (Enterprise/End-users)
    - Delivered by a range of Palm based and other mediums / services
      - Packet based (Instant Delivery
      - Dialup (Pull services)
      - Messaging Delivery services (Instant or Push Delivery)
  - Voice Telephony integration emerging
    - Mobile Cell-Phone primarily used for telephony

cc2GO

# Palm based Voice / Data

## Palm based Voice, Messaging and Data Integration Options

cc2GO

# Palm based Voice / Data Solutions

- **Cradles / Cable / Plug-In Palm Accessories**
  - Wired / Wireless Options and connectivity
- **Integrated Palm based Devices**
  - Wired / Wireless Options and connectivity
- **Mobile Architecture Distributed Devices**
  - Wireless Options with Wired Inter-connectivity

cc2GO

# Palm OS® Voice / Data Solutions

## Cradle based Accessories

May include any / all of the following :

- Single Purpose or Multi-functional cradles
  - Voice Telephony / Messaging
  - Dial-up Services i.e. modems
    - Inbuilt Messaging and / or content access
  - Navigation
    - GPS
  - Audio / Voice Systems
    - Interactive Voice / Audio
  - Expandability Options
    - Storage
    - Input / Output devices

cc2GO

# Palm based Voice / Data Solutions

## Cable / Module Plug-In based Accessories

May include any / all of the following :

- Single Purpose or Multi-functional cradles
  - Voice Telephony / Messaging
  - Modems (Voice / Messaging / Data)
  - Network Adaptors
  - Audio/Voice system
  - Navigation
  - Storage
  - Expandability Options
    - Storage
    - Input / Output devices

cc2GO

# Palm based Voice / Data Solutions

## Integrated Devices

May include any / all of the following :

- Multi-functional systems
  - Voice Telephony / Messaging
  - Dial-up Services i.e. modems
    - Inbuilt Messaging
  - Navigation
    - GPS
  - Expandability Options
    - Storage
    - Input / Output devices

cc2GO

# Distributed Wireless Connectivity

## Mobile Architecture Distributed (MAD) Devices

The beginning of a New Era in Wireless Connectivity

cc2GO

# Distributed Wireless Connectivity

## Mobile Architecture Distributed (MAD) Devices

- Wireless Interconnectivity of shared data and resources
  - Based on Wireless Standards (Bluetooth / IR /WLAN)
    Wireless Devices* may include :
    - Palm based Devices
    - Mobile Phones and Telephony Devices
    - Navigation GPS Devices
    - Wireless Headset
    - Wireless Display Terminals i.e. (Fossil Watch)

    * Implies Bluetooth, WLAN and / or Infrared enabled connectivity

# Distributed Wireless Connectivity

## Mobile Architecture Distributed (MAD) Devices

PALM Software Enables Shared Data/Access

- Handheld / Phone Address Book Sharing
- Always Available interconnectivity between devices

For Example :

- Phone answered via wireless headset and Phone or Watch display
- Contact details displayed on Palm enabled MAD Device
- Relative Contact references / details are linked and retrieved for improved productivity

cc2GO

# Distributed Wireless Connectivity

## Mobile Architecture Distributed (MAD) Devices

Wireless Bluetooth GPS Navigation Hardware and SDK

- Enables Location based Services with Wireless GPS
  - Bluetooth enabled Wireless GPS
  - Available Navigation Tools and Libraries (SDK)
  -
- Wireless GPS Designed for Enterprise Vertical and Consumer markets

cc2GO

# Wireless Integration Opportunities

## Telephony Developers

cc2GO

**Opportunities to Link advanced Call Management and direct launching from Content or Messaging**

# Distributed Wireless Connectivity

## Mobile Architecture Distributed (MAD) Devices

Suite of Palm based Mobile Telephony Software Libraries

- Palm Telephony / Messaging Integrated tools
  - Phone Dialer and Library (including E-PhoneCards)
  - Integrated Messaging and Libraries
    - Email/SMS/Fax/Chat
  - Advanced Call Management Software and Library
  - Availability of MAD Telephony / GPS Devices
    Palm OS Libraries and SDK for fast integration and development of Telephony and Messaging

cc2GO

# Wireless Integration Opportunities

## Content Developers

cc2GO

Opportunities to Link to Voice and Messaging

# Distributed Wireless Connectivity

## Mobile Architecture Distributed (MAD) Devices

Suite of Palm based Mobile Browsing Software tools

Palm Integrated Content Browser Tools

- Multi-search Browsing
  - Web / WAP / WCA
- Libraries to link retrieved Content to Messaging and Telephony applications
- Availability of MAD Telephony /GPS Devices and Palm OS Libraries / SDK for fast integration and development of Integrated Content access and Telephony / Messaging Integration

cc2GO

# Wireless Integration Opportunities

**Location Based Services Developers**

cc2GO

Opportunities to Link Voice and Messaging to Mobile Data

# Distributed Wireless Connectivity

## Mobile Architecture Distributed (MAD) Devices

Suite of Palm based Mobile GPS Tracking Software tools

Palm GPS Navigation Tools

- Libraries to access Real-time GPS Data
  - Stored and accessible directly or via Palm Tables
  - Integrated with Telephony and other Location data
- Availability of MAD Telephony / GPS Device Palm OS Libraries / SDK for fast integration and development of Integrated Content access and Telephony / Messaging Integration

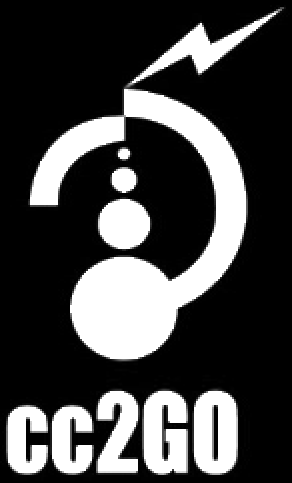

cc2GO

# Summary

- Reviewed Global Markets for Voice and Data
  - USA Data-centric focus, ripe for Voice Integration
- Introduction to next generation hardware and accessories
  - Wireless Bluetooth Connectivity
  - Wireless GPS
- Introduction to MAD Devices and associated software tools and libraries
  - Integration with emerging Wireless Technologies

cc2GO

# Q&A Time

**Any Questions ?**

# Wireless Demonstrations

- Wireless Telephony Integration
  - Palm device wirelessly connected to Mobile Phone
- Wireless Data Integration
  - Wireless retrieval of phone number from telephone pages in a Web Clipping and dialing it automatically
- Wireless Navigation
  - Retrieval of Wireless Data and connectivity to a map

# PalmSource®

## Conference and Expo
