Rapid Development of Applications with Back-end Data Integration

Dana Book – Pencel Corporation

Building complete mobile solutions that interact with corporate data systems.

Agenda

- Mobile Enterprise Applications
- Introduction to Kinectivity
- Build & Deploy an Application
- Kinectivity Features

Mobile Enterprise Applications

- Data centric
- Anywhere, anytime access
- Focused on specific field processes

Agenda

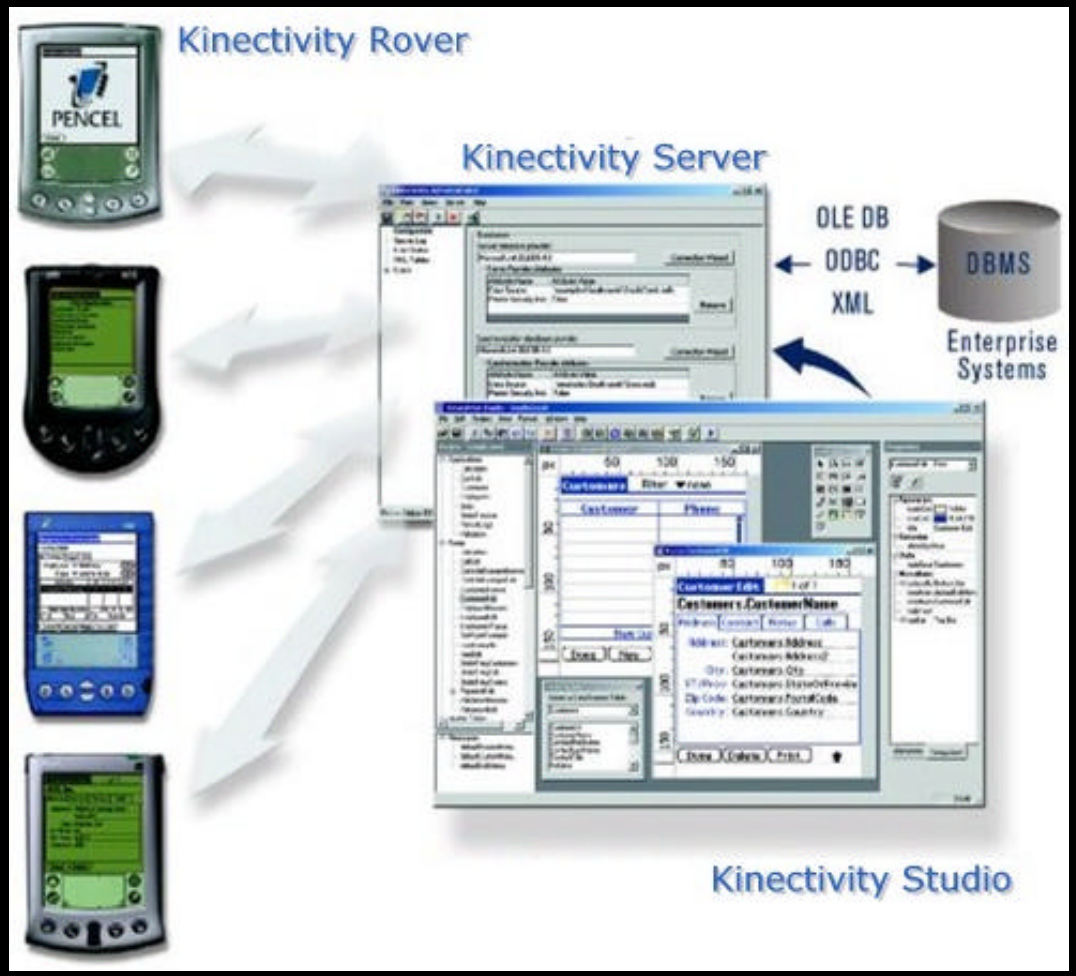

- Mobile Enterprise Applications
- Introduction to Kinectivity
- Build & Deploy an Application
- Kinectivity Features

Introduction to Kinectivity

- Development Environment for Mobile Data Applications
- Configurable component approach
- Tables, forms, synchronization rules…one environment
- Kinectivity:
  - Kinectivity Server
  - Kinectivity Rover
  - Kinectivity Studio

Introduction to Kinectivity

Agenda

- Mobile Enterprise Applications
- Introduction to Kinectivity
- Build & Deploy an Application
- Kinectivity Features

Agenda

- Mobile Enterprise Applications
- Introduction to Kinectivity
- Build & Deploy an Application
- Kinectivity Features

Kinectivity Features

- Integrated Data & Synch Engine
- Application Distribution & Deployment
- RoverScript
  - Based on JavaScript
- Custom controls
- Data Integration
  - OLE DB
  - ODBC
  - XML
- Wireless-ready

Kinectivity Features

Database Features

- Related tables
- Joins: inner & outer
- Primary key generation
- Indexing, hashing and record sorts
- Data types including decimal, currency, bytes, GUID, etc.
- Database triggers
- Referential integrity, cascading deletes & entity integrity

Kinectivity Features

UI Features

- Unique controls
  - tab control
  - selector trigger
  - image control
  - expandable / scrollable edit box
- Filters
  - user-definable
  - quick

Kinectivity Features

Subscriptions

- Multiple subscriptions for different user classes
- Conflict resolutions
- Transactions
- Filters and correlated queries
