Mobile and Wireless Enterprise Solutions: Realizing ROI

Mike Paola, Group Product Manager, iAnywhere Solutions

Presentation Goals

- Outline challenges faced by businesses looking to “mobilize” their enterprise applications
- Discuss solutions and draw on real-life customer examples and ROI results.

Agenda

- Who is iAnywhere Solutions?
- Mobile and Wireless Landscape
- Overcoming m-Business Challenges
- Case Studies: Achieving ROI Today
- Summary

Agenda

- Who is iAnywhere Solutions?
- Mobile and Wireless Landscape
- Overcoming m-Business Challenges
- Case Studies: Achieving ROI Today
- Summary

Who is iAnywhere Solutions?

- World-leading provider of mobile and wireless solutions for the enterprise
  - 68% mobile database market share*
- One-stop source for developing and deploying m-Business solutions
- Uniquely offers proven “always available” mobile and wireless technology platform
- Subsidiary of Sybase, Inc.

*Colleen Graham, “2000 DBMS Market Size, Trends and Forecast”, Gartner Dataquest

Did you know?

- **iAnywhere Solutions has over …**
  - 6 million deployed technology licenses
  - 600 application partners
  - 10,000 corporate customers

- **iAnywhere Solutions customers top the Fortune 500 list:**
  - 100% of Securities Companies, Medical Products & Equipment Companies, and Network Companies
  - 5 of the top 5 Commercial Banks and Computer Services Companies
  - 4 of the top 5 Pharmaceutical Companies, Telco Companies and Aerospace Companies

Agenda

- Who is iAnywhere Solutions?
- Mobile and Wireless Landscape
- Overcoming m-Business Challenges
- Case Studies: Achieving ROI Today
- Summary

M-Business Trends: Devices

> “By 2003/04, we expect nearly 50% of corporate knowledge workers to have notebook computers as their primary computing devices Furthermore, we expect more than 75% of knowledge workers to be mobile at least 25% of the time”

Entering the Mobile Millennium, Meta Group

M-Business Trends: Potential User Base

> “There will be 1.3 billion wireless data subscribers by 2004, up from 170 million now. What’s more, it is projected that 244 billion wireless messages will be sent per month in 2004, much higher than the current 3 billion.”

Cahners InStat Group, “Wireless Data/Internet Market Gains Momentum: Five Year Subscriber Forecast”, August 2000

M-Business Trends: Potential User Base

> “ Currently, less than 5% of corporate applications are enabled for wireless/mobile users. Market demands will push this to 15-20% by 2002/03 and nearly 50% by 2004/05.”

Jack Gold, Meta Group

M-Business Drivers

- Increased productivity and flexibility
  - Can reduce costs by driving better efficiencies
  - Empowers employees to work better and increase their value
- Improved customer service
  - Introduces new ways to have ‘always available’ relationships
  - Push data to consumers
- Experience provides competitive advantage
  - Gain important and early intelligence on customer acceptance, price, value proposition, etc.

Emerging Mobile Application Areas

- Business
  - Sales force automation
  - Insurance adjustor
  - Dispatch, track and trace
  - Inspection, compliance
  - Warehouse, pick and pack
  - Retail, POS
  - Hospitality
  - Healthcare
  - Defense
- Consumer
  - Stock trading
  - Remote banking
  - Mobile portfolio management
  - Directory and location services
  - Self-service kiosks
  - Infotainment

Expectations of Users

- Data access at all times
  - Application is always available
- Enterprise Integration
  - Access to various kinds of corporate data
- Increased productivity
  - More efficient data entry
- Technology “just works”
  - Transparent to user

m-Business Challenges

- Data communications concerns
  - Low bandwidth networks means slow applications
  - Limited battery life for wireless transmissions
  - Unreliable and costly wireless coverage
- Complexity
  - Diverse wireless network infrastructure
  - Delivery of application to multiple device types
  - Numerous emerging standards
- Security
- Manageability of deployed applications

Agenda

- Who is iAnywhere Solutions?
- Mobile and Wireless Landscape
- Overcoming m-Business Challenges
- Case Studies: Achieving ROI Today
- Summary

What are our customers doing today to overcome these challenges in the development of mobile and wireless applications?

Addressing Data Communications Concerns

- Mobile data store and data synchronization
  - Less data transferred
  - Work offline / synchronize later
  - Connect when necessary
- Problems Addressed
  - Faster response / lower cost
  - Work anywhere, anytime
  - Dependability

Mobile Data Store Key Benefits

- Always have access to your data
  - Make an informed business decision
  - Capture business information when it occurs
- High-performance data access
- Guaranteed transactional reliability for your mission critical data
- Strong encryption prevents unauthorized access to data

Data Synchronization Key Benefits

- Integration with Enterprise
- Bi-directional
- Security
  - Built-in authentication
  - 128-bit encryption of communication stream
- Support for subsetting / partitioning of data
- Scalable to thousands of remote users
- Conflict detection and resolution
- Error handling

Other Smart Client Characteristics

- Messaging
  - Push important data to mobile devices
  - Store and forward message queuing
  - Guaranteed message delivery
- Rich User Experience
  - Contains business logic
  - Sophisticated user interface
- Support for a variety of platforms / devices

Thin Client Characteristics

- Browser-based applications
  - No deployment required
  - Dynamic content
- Multiple devices
  - Many different browsers
  - Different markup languages
- Integrated business logic
  - Logic remains on server platform

Addressing Wireless Complexity

- Wireless Application Framework
  - Based on open standards (e.g. J2EE)
  - Reduced development complexity
  - Target multiple devices and content types
    - HDML, WML, HTML, CHTML, VoiceXML
    - Identify type of device and micro-browser
    - Display content appropriate for each device
- Leverage existing assets
  - Enterprise Database Systems
  - Business Applications
  - Messaging systems

Addressing Deployment Management Issues

- Centralized device management and application distribution
- Automated software distribution
  - Installations, upgrades, routine tasks, packages
  - Remote command execution
- Inventory tracking
  - Hardware, system, software, custom
  - Asset management, software license metering
- Application self-healing and repair

Agenda

- Who is iAnywhere Solutions?
- Mobile and Wireless Landscape
- Overcoming m-Business Challenges
- Case Studies: Achieving ROI Today
- Summary

Mobile and Wireless ROI

- Mobile and wireless computing is helping companies **increase revenues** and **reduce costs** by:
  - Increasing productivity and efficiency
  - Improving customer service and loyalty
  - Gaining rapid access to information

Mobile and Wireless ROI

> “ The benefits that mobile systems provide to enterprises and end users productivity, flexibility, connectivity, timeliness, etc. can generate a positive return on investment in less than six months.”

GIGA Information Group

Military Sealift Command

Challenges

- Improve efficiency and consistency of inspection data collection
- Make inspection results more readily available
- Reduce costs of inspections
- Overcome resistance to change

Military Sealift Command

Inventory Management

- Fast, flexible, easy-to-learn portable application allowing MSC to manage inspections and inventory collection on its ships
- Palm-based solution created by Sybase Professional Services

Military Sealift Command

Return on Investment

- "Snapshot" reduced inspection man-hours by 50%
- Data latency reduced from one year to 48 hours allowing more frequent inspections
- Transcription errors dramatically reduced by 15%
- Lowered cost of equipment and saved almost $2000 per device

Proctor and Gamble, Millstone Coffee

Challenges

- Improve reliability of handheld devices
- Integration with back-end mainframe system
- Minimize connection times (data transfer)

MILLSTONE

P&G

Proctor and Gamble, Millstone Coffee

Route Management

- Handheld application enables drivers to capture detailed sales and marketing data at store level
- Store data locally and transmit nightly to company headquarters
- Deployed 450 Symbol handhelds using Palm operating system
- Extending solution to other P&G brands, including Folger's coffee

Proctor and Gamble, Millstone Coffee

Return on Investment

- 30% annual return on investment
- Reduced connect time from 10-20 minutes to 2 minutes per handheld, saving $428,000 per year
- System reliability saves $3,000/mth
- Save 5-10 minutes per stop (x12 stops = 2 hours)
- Improved data capture, data updates and management
- Increased customer satisfaction

Foremost Insurance

Challenges

- Decrease time spent for support staff reporting
- Improve order processing time
- Reduce distribution expenses
- Empower sales reps with timely information

FOREMOST INSURANCE GROUP

OnCONTACT SOFTWARE
sales • marketing • customer service

Foremost Insurance

Client Management Software Application

- CRM application automates sales, marketing, and service areas
- Provides immediate and complete access to customer base
- Deployed on laptop/Palm devices

FOREMOST INSURANCE GROUP

OnCONTACT SOFTWARE
sales • marketing • customer service

Foremost Insurance

Return on Investment

- Expects to see savings of $1.2M by end of next year
- Automated support saving $908,300
- Eliminated word processing, faxing, and postage fees, saving $109,440
- Trimmed travel and auto related expenses of $94,000
- Increased sales

Jose Cuervo

Challenges

- Improve efficiency of competitive information data collection
- Create easy-to-use application
- Integration with back-end database system

Jose Cuervo

Jose Cuervo

Inventory Management

- Field application used to gather current inventory, sales and competitive information
- 150 Symbol devices deployed in Mexico
- Bi-directional synchronization (wireless WAN)

Jose Cuervo

Jose Cuervo

Return on Investment

- Inventory, sales and competitive information now available on a daily basis
- 30% increase in sales resulting from daily competitive analysis
- 35% increase in productivity of field representatives

Jose Cuervo

Agenda

- Who is iAnywhere Solutions?
- Mobile and Wireless Landscape
- Overcoming m-Business Challenges
- Case Studies: Achieving ROI Today
- Summary

Summary

- Tremendous growth in mobile and wireless
- Mobile and wireless computing is helping companies increase revenues and reduce costs…
- … but this does not come without various challenges
- Understand how to overcome these challenges to ensure successful deployments…
- … and to achieve ROI !
