PalmSource in the Enterprise Market

Presented By:
Charlie Tritschler
VP of Product Marketing

palm™ POWERED

Agenda

We are there today

- PalmSource presence in the Enterprise

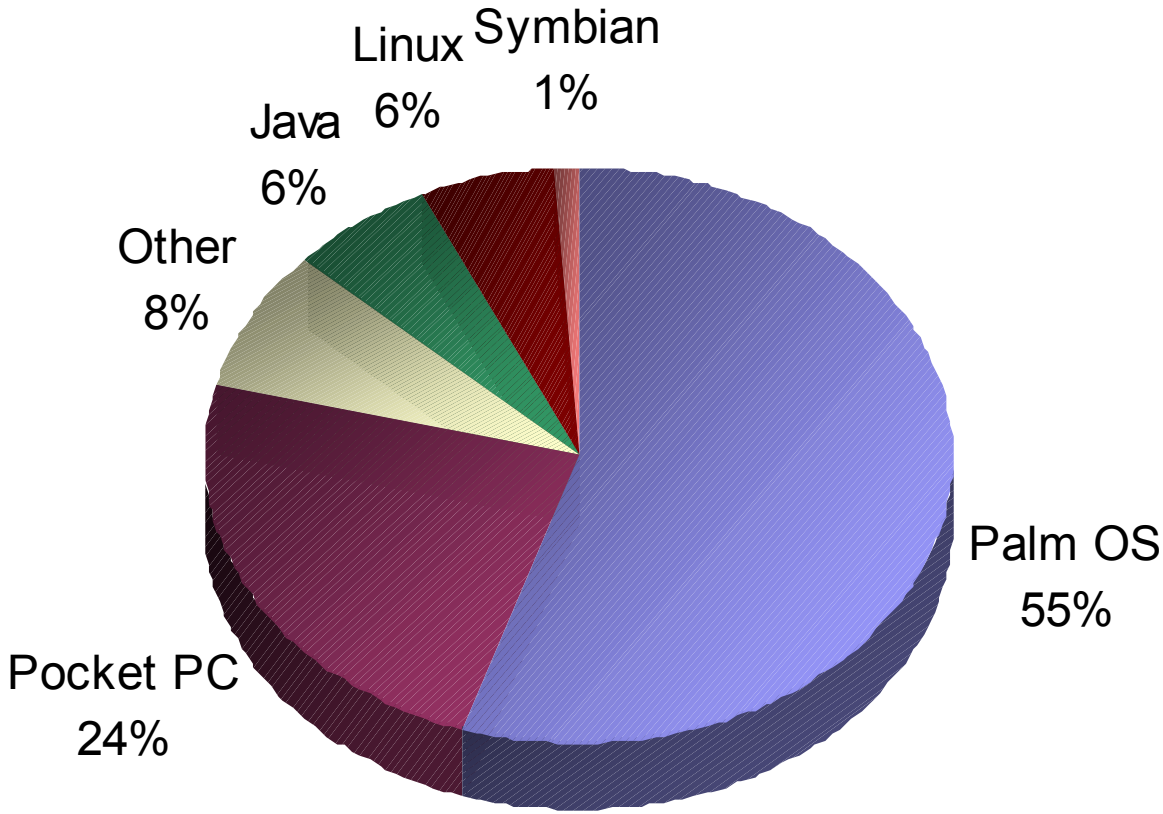

We can do it today

- PalmSource platform technology

We want to help you succeed

- Palm OS Business Solutions Program

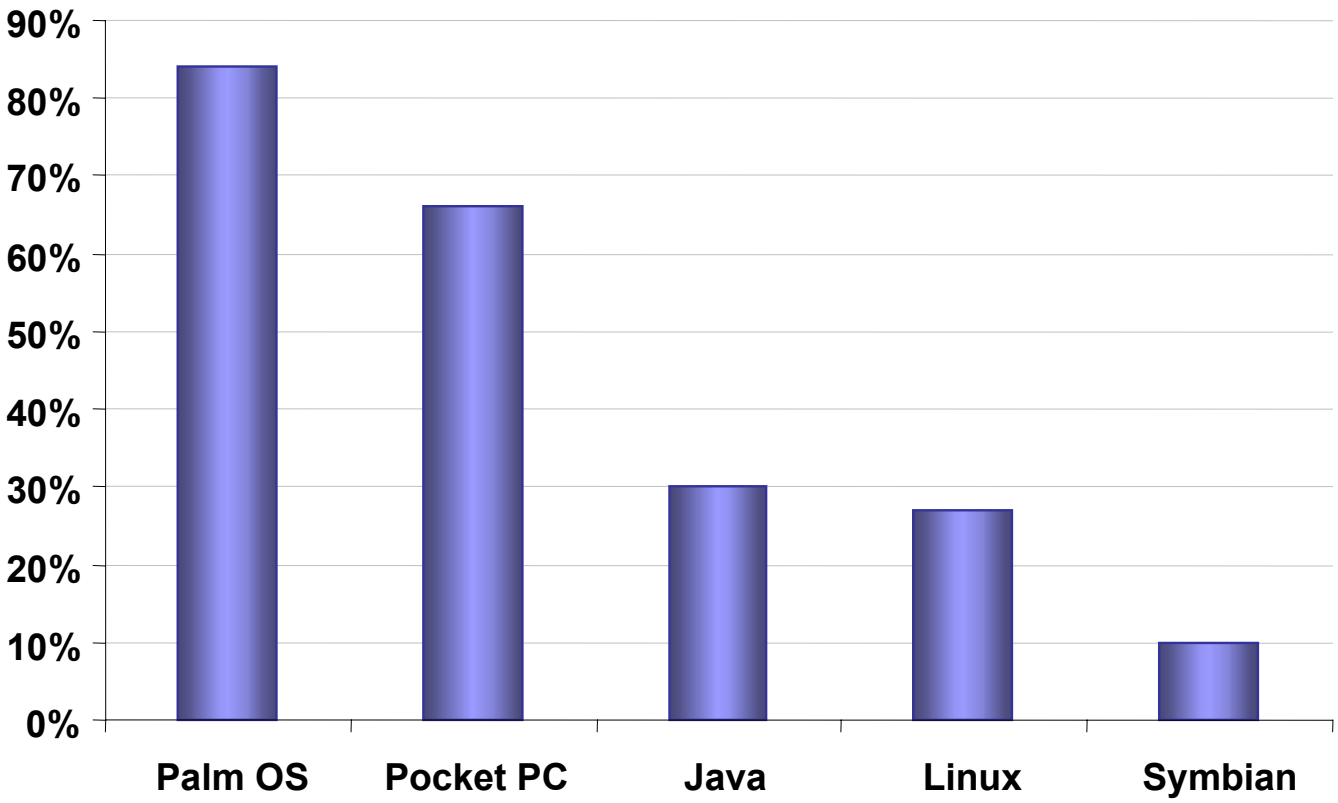

Palm OS Captures 55% of Enterprise Sales

Purchases initiated by enterprise management

PalmSource, Jan 2003

Palm OS Is on 83% of Enterprise Handheld Standards Lists

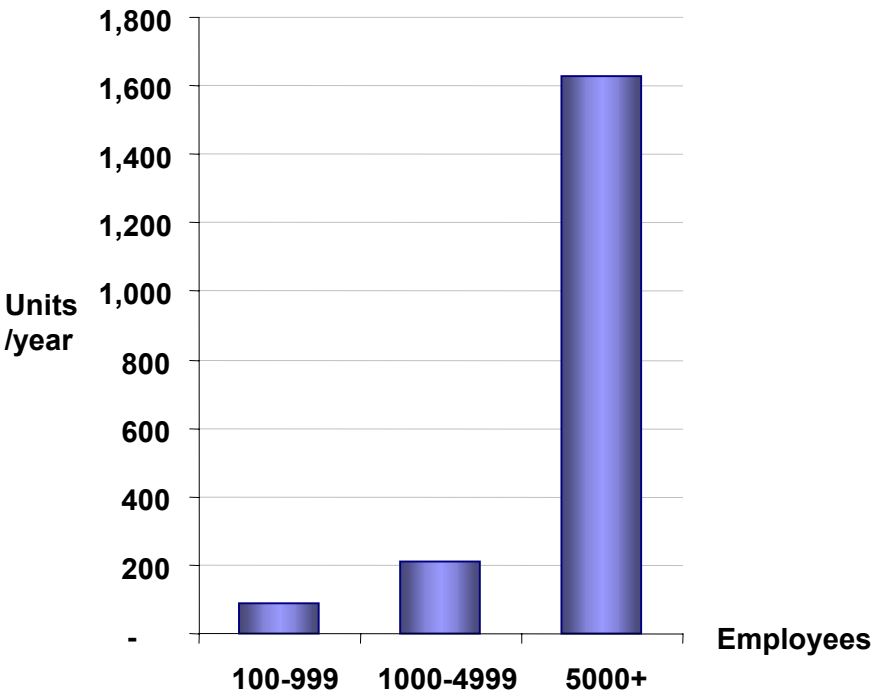

Note: 69% of enterprises have handheld standards lists

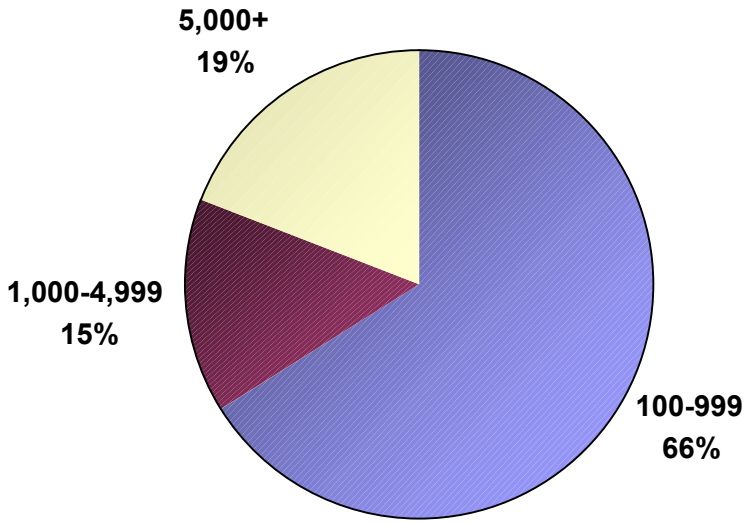

PalmSource, Jan 2003

Most of the Tops-down Buying Happens in Smaller Companies

Although average purchase size is higher in large companies...

...there are so many small companies that they dominate total purchasing

Share of total tops-down purchases, by company size

PalmSource, Jan 2003

The Enterprise Is in Transition

IT Managers need to secure and control mobile devices more than ever before

- On-device security and secure connection to corporate network are the two major challenges

Enterprises are embracing the age of wireless

- WAN, WLAN, HotSpots, home networks, Bluetooth,…

Mobile applications have gone far beyond the PIM

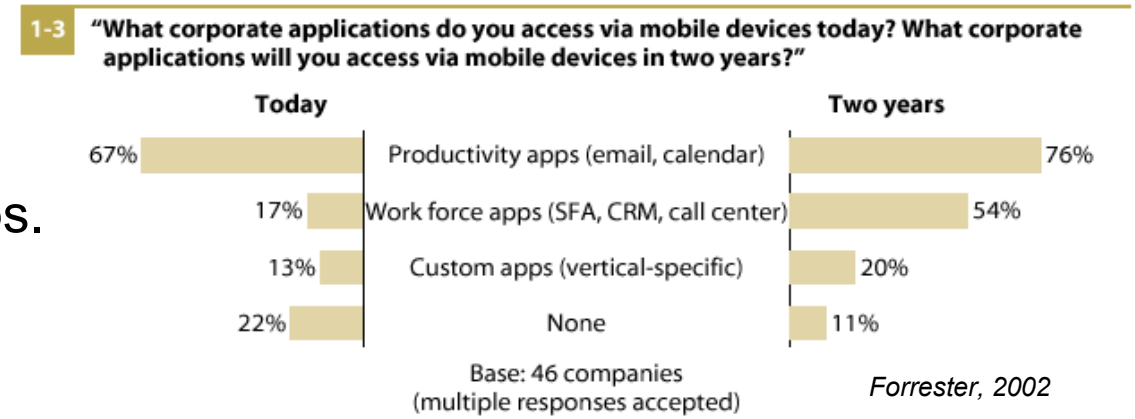

The Enterprise Is in Transition (cont.)

Forrester, 2002

IT is getting more serious about implementing mobility…

…and in the sophistication they require from the apps.

Forrester, 2002

Agenda

We are there today

- PalmSource presence in the Enterprise

We can do it today

- PalmSource platform technology

We want to help you succeed

- Palm OS Business Solutions Program

Enterprise Product Strategy – What We Are Saying to Enterprise Customers

A practical approach to security

- Your data and networks are secure but can be easily accessed
- Support the most ubiquitous security standards

Robust server integration

- Deliver an open, standards-based architecture for delivering web based services to the device
- Simplify server integration through synchronization metaphor

Open, flexible wireless messaging

- Full integration with messaging standards – email, IM, SMS,…
- Integration with Exchange, Lotus and Groupwise
- Transport and network agnostic

The Top 8 Requirements of IT Staffs

Feature	Important to what % of IT
Ease of Support	87%
Data Security	83%
Office Compatibility	80%
Server Integration	78%
Wireless Capabilities	73%
Exchange/Outlook Compatibility	71%
Price	68%
Mobile Email	67%

PalmSource, Jan 2003

Need for Robust and Bulletproof Solutions

Feature	Important to what % of IT
Ease of Support	87%
Data Security	83%
Office Compatibility	80%
Server Integration	78%
Wireless Capabilities	73%
Exchange/Outlook Compatibility	71%
Price	68%
Mobile Email	67%

- ✓ On device data security
- ✓ Secure connection to network through VPN or SSL
- ✓ Secure remote control of devices
- ✓ Embrace industry standards

PalmSource, Jan 2003

Palm OS Security Platform

RSA SECURITY

Today - Palm OS security foundations

- System-level authorization and authentication
- System-wide strong encryption
  - Cryptography Manager with RC4, SHA-1, RSA Verify
- Network encryption through SSL v3.0
- Support for signed code
- Unique device identification

Future Directions

- Increased support for software and hardware cryptography
- FIPS 140-2 certification
- Encrypted databases
- Authentication tokens

Using Palm OS Data Security Features

Cryptography Provider Manager (CPM)

- Cryptographic foundation for OS 5 exposed to developers
- Designed for developers with little or no cryptographic knowledge
  - API to perform high-level security operations
- Covers the most common cryptographic operations
  - Commands to encrypt/decrypt data
  - Message digest
  - Public key encrypt/verify
- Cryptographic interface forward compatible in next generation OS's

SSL

- Mimics NetLib API already familiar to you

The Top 8 Requirements of IT Staffs

Feature	Important to what % of IT

Data Security	83%
Office Compatibility	80%
Server Integration	78%
Wireless Capabilities	73%
Exchange/Outlook Compatibility	71%
Price	68%
Mobile Email	67%

PalmSource, Jan 2003

Need for Smoothest Connectivity to Servers

Feature	Important to what % of IT
Ease of Support	87%
Data Security	83%
Office Compatibility	80%
Server Integration	78%
Wireless Capabilities	73%
Exchange/Outlook Compatibility	71%
Price	68%
Mobile Email	67%

- ✓Standards-based proxy-less browser
- ✓Secure connection to corporate network through VPN or SSL
- ✓Embrace standards protocols
- ✓Easy to use data access

PalmSource, Jan 2003

Palm OS Integration Platform

Today

- Integration with major Enterprise backend systems
  - Custom client on handheld – IBM, Oracle, SAP,…
  - Full HTML proxy-less browser

Roadmap

- Explore web services: SOAP, XML, HTTP/HTTPS, .NET
- Provide deeper OS integration for Enterprise
  - Network printing
  - Richer Java integration
  - Location based services

Palm OS 5 Browser

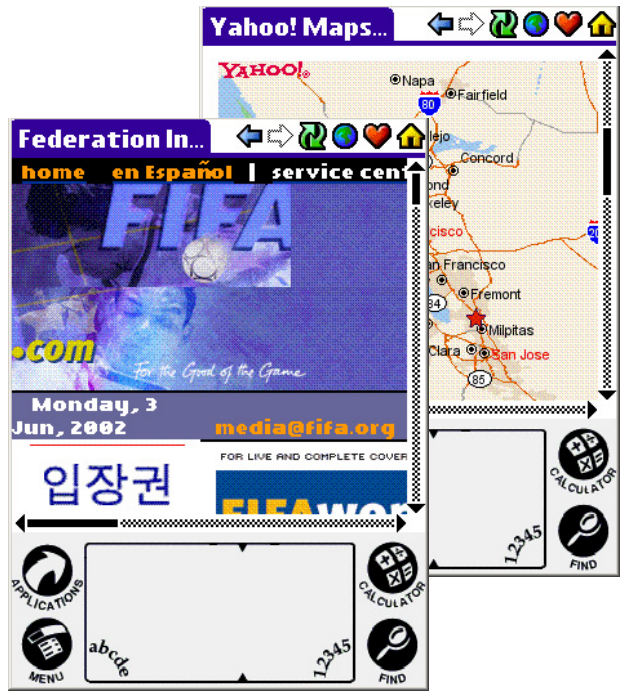

ACCESS

Native ARM application

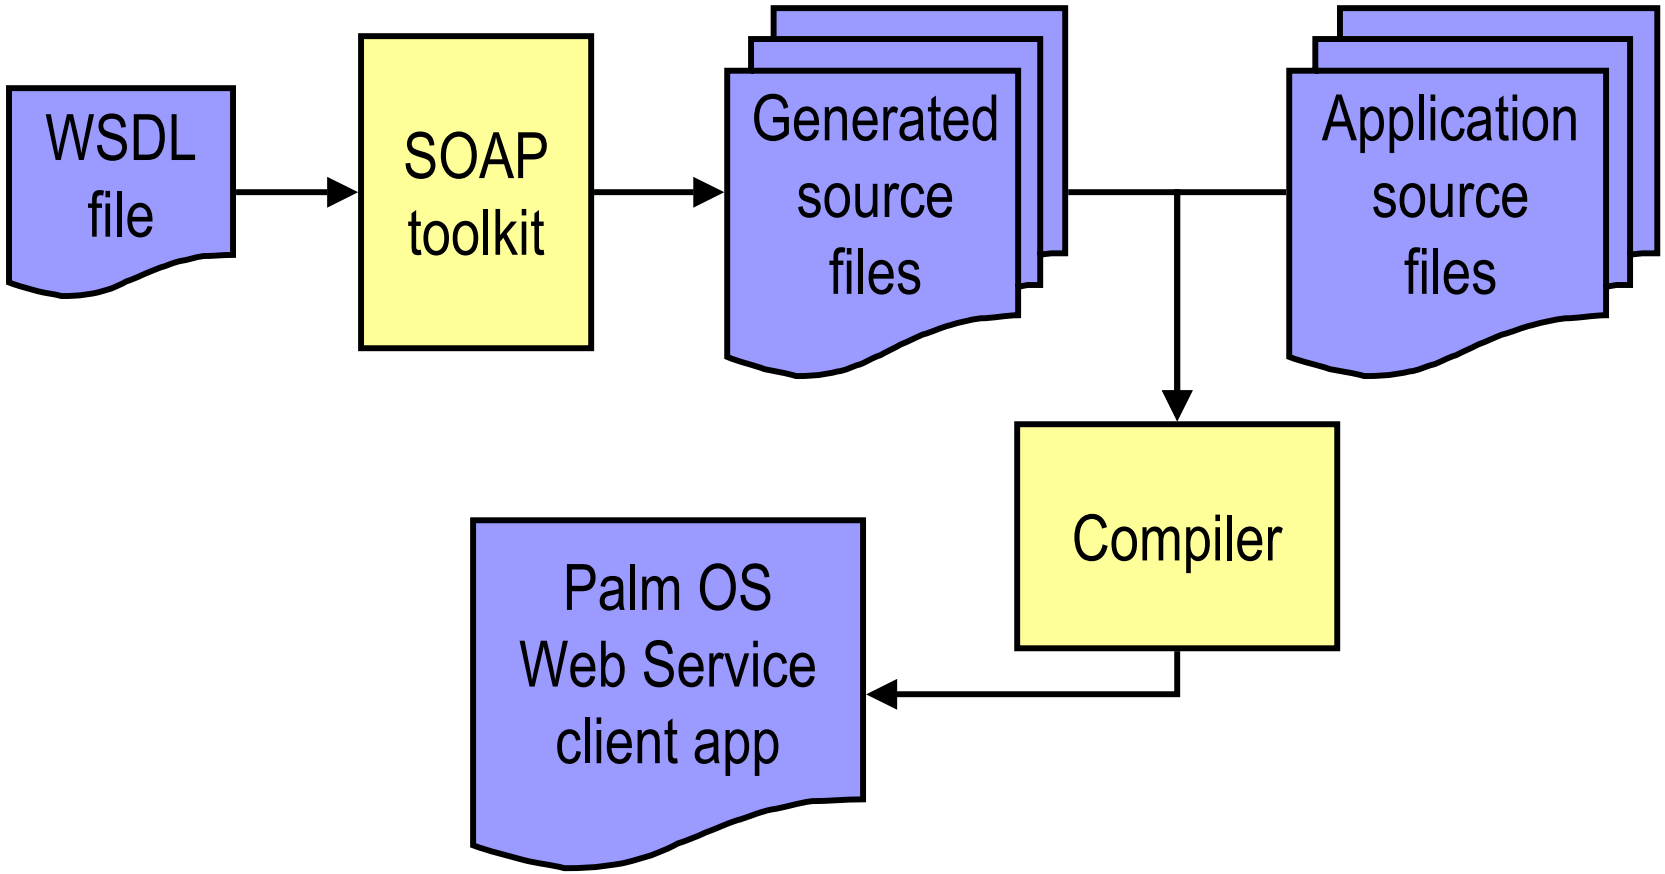

End-to-end security via SSL 3.0

Standards-based web browsing

- No proxy server necessary
- HTML 4.01, HTTP 1.1, XHTML 1.0, CSS1, partial support for CSS2, DOM 1, partial support for DOM2
- iMode (cHTML), (ECMA) JavaScript 1.5, DHTML, GIF, JPEG,
- Tables, Frames, Bookmarks

Web Services – Development Process

Web Services – Sample Applications

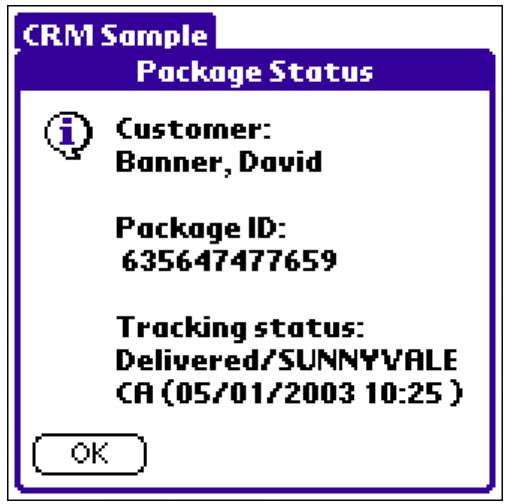

Web Site Data

Server Functionality

Enterprise Backend Integration

Demos

Web Services – Simple Code

All the code required for FedEx Package Tracking

```
soap = soap_new();
soap->namespaces = namespaces;

soap_call_tns__getStatus(soap,
        serviceURL, actionURI,
        trackingID, &result);
displayResult(result._return_);

soap_end(soap);
free(soap);
```

PalmSource Enterprise Product Strategy

A practical approach to security

Robust server integration

Open, flexible wireless messaging
