Lessons

- **To get noticed you need to excite people**
  - But deliver, don't oversell yourself
  - Keep up with new innovations
- **Be professional**
  - Build credibility: make sure your work is legitimate
- **Learn how people use handheld devices**
  - Unlike PC software, you've got seconds not hours to impress
- **PalmSource, OS licensees and other developers are approachable**
  - Developer forums, the Palm Entrepreneurs Forum, Conferences

SnapperMail by Snapperfish

SnapperMail™

Who are we?

- Makers of a “phat” email client
- 9 months development, 9 months release
- High growth, team of 5.

snapperfish

Product Design

"How we cooked up Snapper"

Take a good look around

- New Technologies: 2.5/3G, WiFi, bandwidth to burn
- What kind of emailer would people want in the future?
- What does the competition shape up like?
- Read the OS documentation (Exchange Manager)
- Talk to PalmSource, think about future OS trends

The importance of UI

- Outside in vs inside out
- Put the UI department in charge

Key Partnerships

Don't go it alone

- Design a good API - open standards, beneficial to partners
- Write a good SDK, one that helps them implement easily
- Developmental Partners - "Lite" apps.
  (HandZipper, JpegWatch, Diddlebug, Quickoffice)
- Strategic marketing alliances
  "hitchhiking on a fast car", Quickoffice
- Wanna join in?

Marketing

We use Cost Effective Marketing

- PR is priceless
- Cross promos, cross bundling

Where to from here?
