Symbol's Mobility Advantage

Agenda

- Symbol basics
- Who are our customers and at problems are they trying to solve
- Understanding Symbol's mobility advantage
- Symbol's Palm
- Developer communication

Scanning Product Line

Designs

- Hand-held
- Hands-free
- Wearable
- OEM Engines

Data Types

- 1D bar codes
- 2D bar codes
- RSS/Composite
- Imaging

Communications

- Cabled real-time
- Cordless real-time
- Batch memory

Wireless Networking Systems

Integrated systems solution

- Infrastructure
  - Access points/ports
  - PC cards
  - Adapter cards
  - Client bridges
  - Wireless switch
- Devices
  - Symbol mobile computers
  - Symbol NetVision® Phone
  - Third-party mobile computers
- Software Tools
  - Host connectivity and emulation
  - Network management
  - AirBEAM ®

Mobile Computing Product Line

Designs
- Hand-held
- Wearable
- Workstation

Data Entry
- Keyboard
- Pen-based
- Scanning
- RF/ID

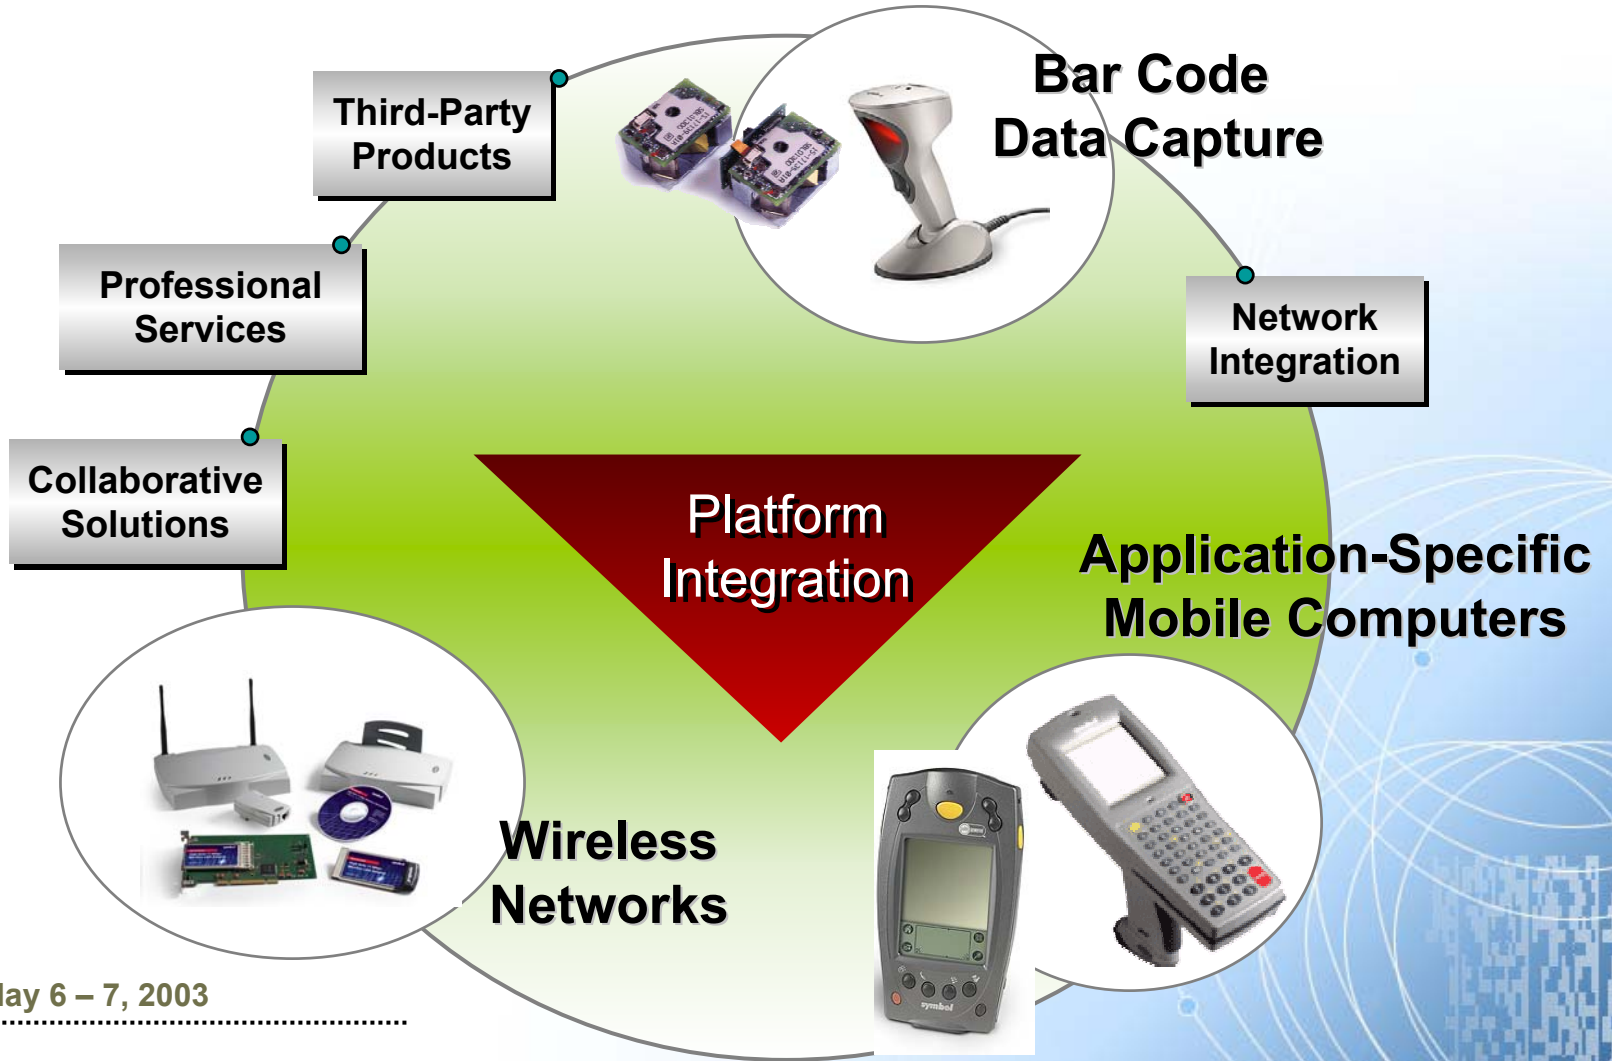

- **Platforms**
  - Palm OS
  - Pocket PC
  - Windows CE
  - Windows NT
  - DOS
  - Emulation

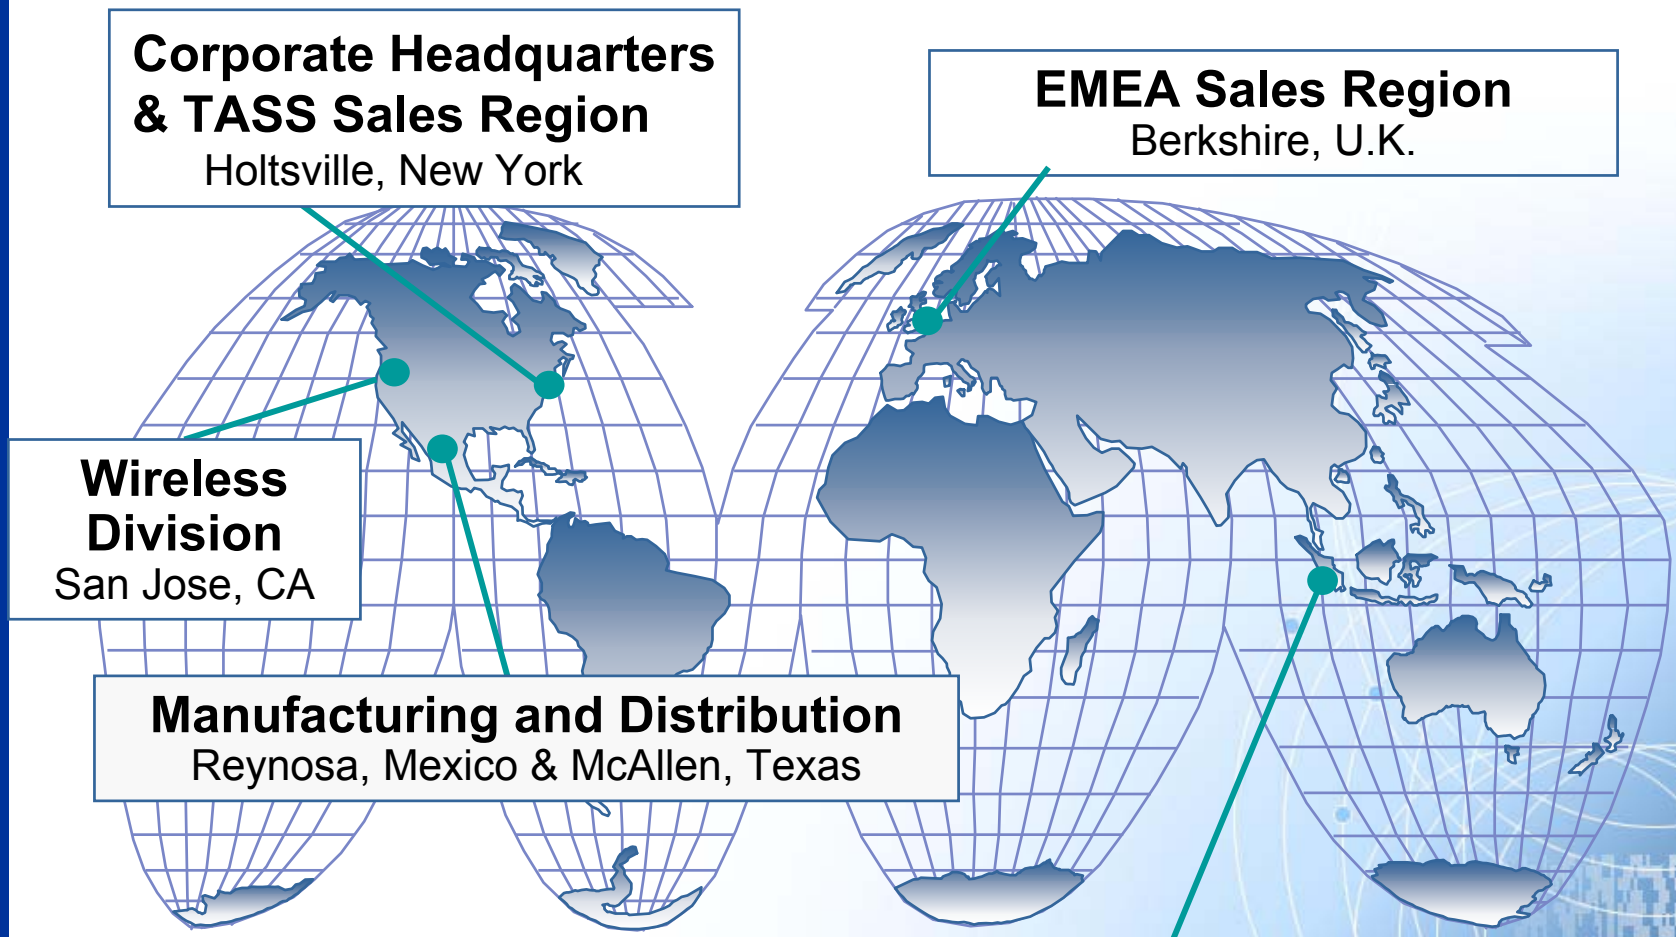

Core Competencies

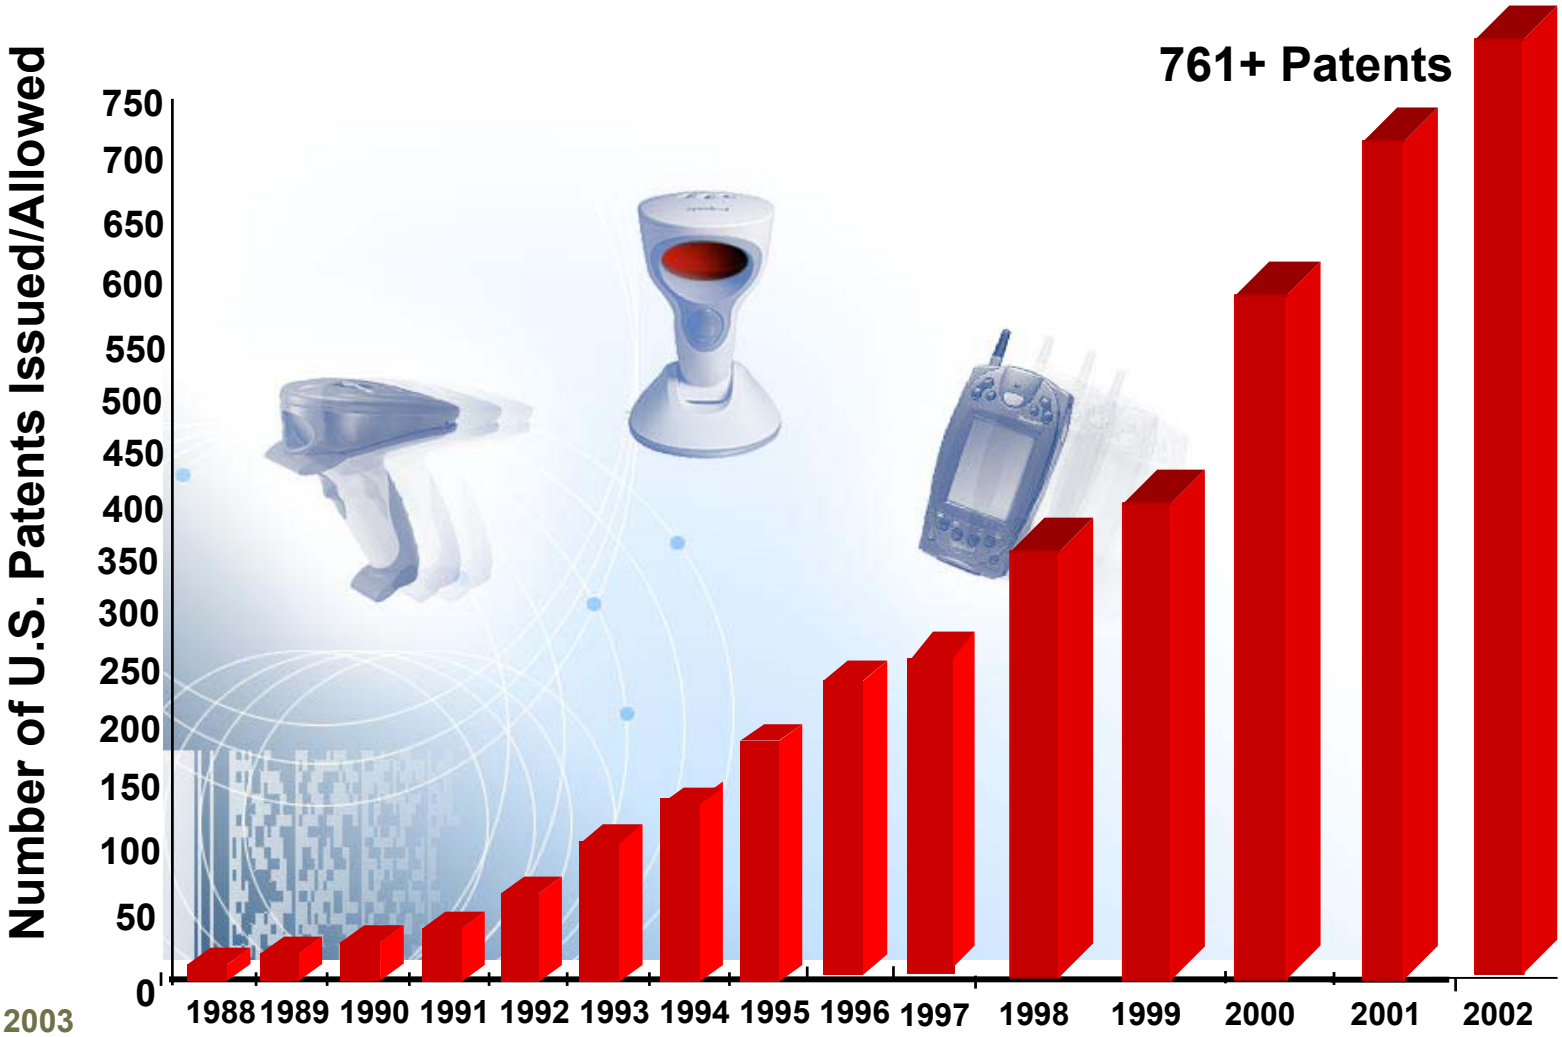

Synergistic Enterprise Solutions

Major Operations

U.S. Patent Portfolio

Symbol's Mission

Mission

"To be the world's preferred supplier of innovative data capture, management and communications products, services and solutions, while being acknowledged by our customers, Associates, shareholders, partners and suppliers as a high-value, high-integrity company."

Agenda

Symbol basics

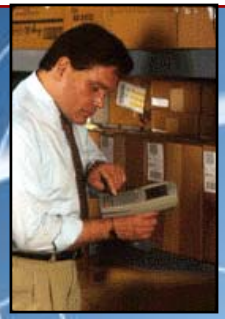

Who are our customers and what problems are they trying to solve

Understanding Symbol's mobility advantage

Symbol's Palm

Developer communication

Our customers are vertical businesses

Core Vertical Markets

Retail
Warehousing/Distribution
Transportation/Logistics
Manufacturing
Healthcare

MILLSTONE

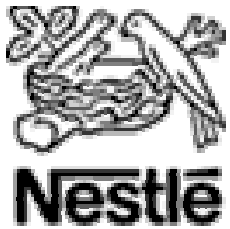

Deutsche Post

Deutsche
Telekom

SEARS

STAPLES

Office DEPOT
Taking Care of Business

Nestlé

verizon

Roche

Pitney Bowes

Ford Motor Company

McKessonHBOC

Every year, Millstone Coffee sells 40 million pounds of roasted beans to 13,000 stores across the country.

Millstone has 300+ SPT 1700 batch terminals with iAnywhere's mobile database SQL Anywhere Studio and an in-house developed route-accounting application.

Delivery drivers are able to use the handheld devices to track inventory, generate invoices and capture detailed sales and marketing data at each store.

Since the fall of 2000, Millstone has recouped about 50 percent of the initial expense and has reduced the end-of-day synchronization time from 20 minutes to 2 minutes per handheld, a $428,000 savings! The mobile application also reduces the time spent at each stop by 5 to 10 minutes, saving about 1 hour per driver per day.

USGA

More than 50,000 golfers and families, visitors, support staff and U.S. Open volunteers poured through the gates at the Bethpage State Park .

Seven entry gates, but not one person was on line for more than a minute - even during the heavy morning time period when 10,000 people an hour moved through the busiest stations.

Symbol wireless Palm handhelds were used for admission at remote gate areas and also as backup at every other gate at the Open.

In addition Symbol's Palm was used in a variety of security purposes:

- **Real-time attendance accountability**
- **Controlling access to various internal sites**
- **Detecting counterfit tickets and badges**
- **Terminal alerting gate entry personnel that the ticket/badge was reported as either lost or stolen**

These are customers who care about mobility

Increased Productivity & Efficiency

Better Customer Service & Responsiveness

More Accurate and Timely Business Processes – and therefore better decisions

Enablement of new applications and initiatives to remain / become competitive

Mobility attributes that are key to end users

- **Is the ergonomic designed for the intended application**
- **Human input/output**
- **How long will my battery last**
- **Is my network connection always available when and where I roam**
- **Throughput fast and immediate**
- **Security, ease of use, manageability**

Agenda

Symbol basics

Who are our customers and what problems are they trying to solve

Understanding Symbol's mobility advantage

Symbol's Palm

Developer communication

Symbol's solution to the mobility question

It's not one solution or feature that wins the day

Expectations and needs vary by customer

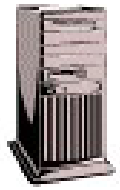

All will have to choose their own Mobility definition

Our business focus is therefore to be "customer specific" from the device through the network and into the applications

Making all the pieces work better together is what we strive to do

Providing the "secret sauce" continuously is our mobile differentiation

Providing the Mobile Solution

Network Management
Mobile Management
Application Management
Security services

Mobility Ingredients

QOS – Voice & Data
Power Over Ethernet
Device Services
Radio Services

Pre-emptive Roaming
Load Balancing
Power Management
Security *with mobility*

The Mobile Solution

Mobility ingredients from Symbol

Pre-emptive Roaming Support

- Roam before signal degradation effects required QoS

Automatic TX Power Control

- Prevent mobile devices from interfering with adjacent cells

Load Balancing

- Uneven AP loads affect performance

Mobile Device Management

- Ability to maintain, diagnose, and upgrade down to mobile device level

Clear Channel Detection

- Minimizes installation channel conflict problem

Kerberos Security

- Security without compromising roaming performance

Agenda

- Symbol basics
- Who are our customers and what problems are they trying to solve
- Understanding Symbol's mobility advantage
- Symbol's Palm
- Developer communication

Symbol's Palm

- **Hardened plastics**
- **Integrated data capture**
- **Integrated wireless 802.11b or WWAN**
- **Water resistant**
- **User accessible rechargeable battery**
- **8 ROM / 16 RAM**
- **DB 33 mhz**

Some add-on mobility options

- 1-Slot Serial Cradle
- 1-Slot Modem Cradle
- 4-Slot Ethernet Cradle
- 4-Slot Serial Cradle
- 4-Slot Charging Cradle
- Vehicle Cradle
- Snap-On Magstripe Reader
- Snap-On Trigger Handle
- Snap-On Modem
- Snap-On Keypad
- Serial/Charging Cable
- DEX Interface Cable
- Auto Charge Cable

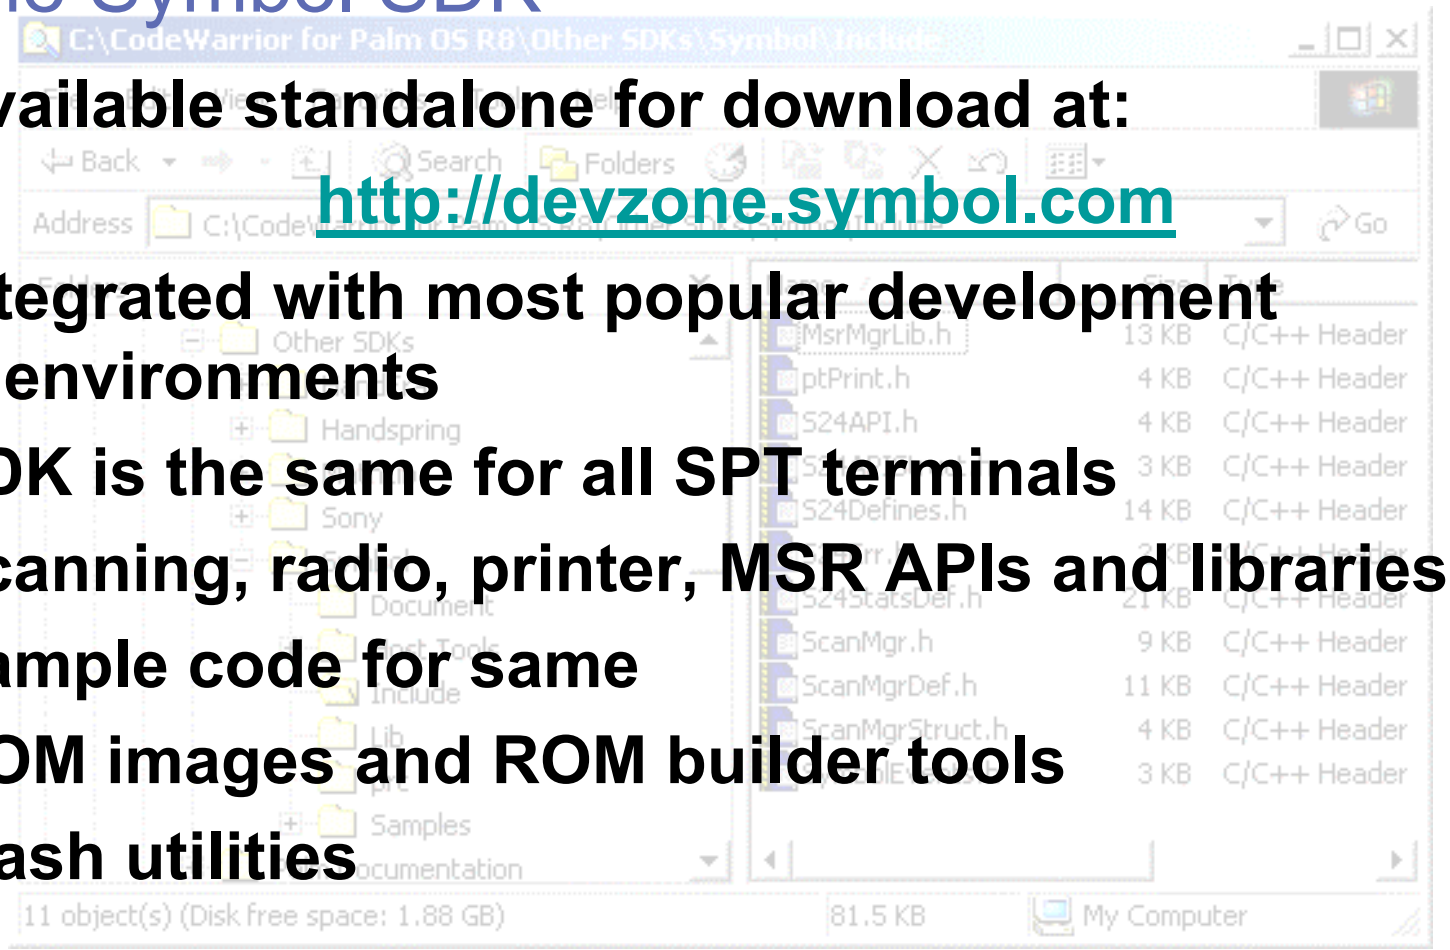

A peek of what's in development

- ARM architecture
- Updated, smaller form factor
- Still durable and rugged design
- Integrated data and image capture
- Batch, WLAN and BT
- 320x240 display
- PDA and numeric key version
- Early 2004

The Symbol SDK

Available standalone for download at:

http://devzone.symbol.com

Integrated with most popular development environments

SDK is the same for all SPT terminals

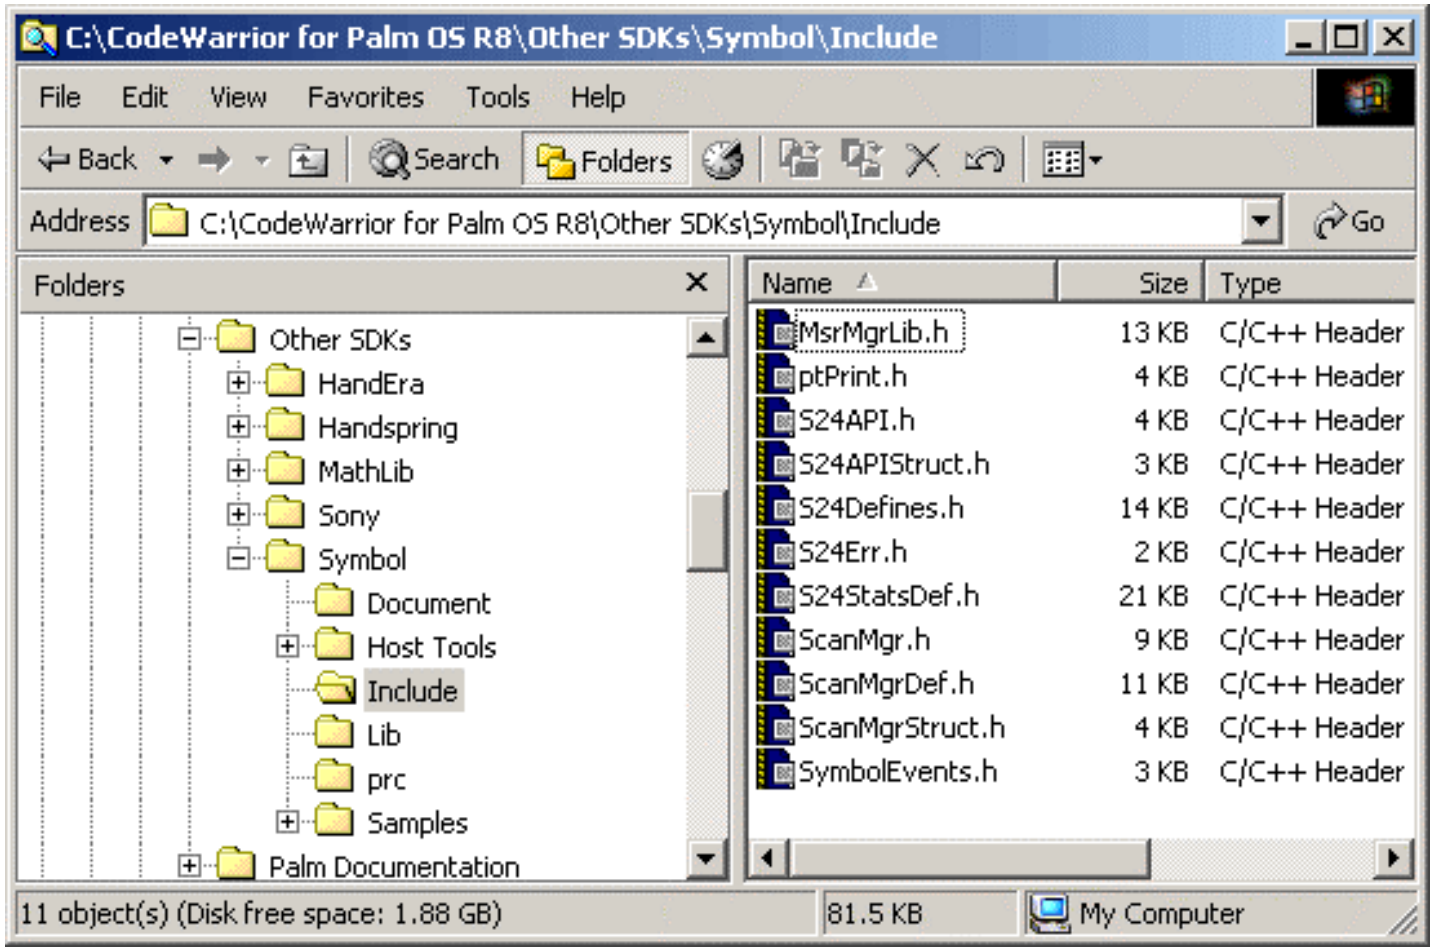

Scanning, radio, printer, MSR APIs and libraries

Sample code for same

ROM images and ROM builder tools

Flash utilities
