# Wireless Changes Everything!

**It's not just about phones.**

**It's about connecting *ALL* devices to the network**

**Benefits for all of us**

- Wireless download and purchase of apps
  - More sales of applications
  - Much easier sales of upgrades
- Over the air synchronization
  - Never lose data
- New services and content
  - Location-based
  - Automatic alerts and updates

Copyright © 2003 PalmSource, Inc. All rights reserved.

# Wide Area Wireless

## CDMA/GSM/GPRS

- Global popularity of mobile phones
- Combinations of voice and data
  - SMS
  - MMS
  - IM
  - Database access
  - Email
- Services
  - Customized by the operator in hardware and software
  - Web-based

Copyright © 2003 PalmSource, Inc. All rights reserved.

# Local Area Wireless

**LAN: 802.11 and follow-ons**

- LAN: 802.11 and follow-ons
- Fast data access in business environments
- Sniffing and seamless movement between WAN and LAN
- Growth of hotspots varies by country
  - 580,000 hotspots in North America by 2007 (TeleAnalytics)
  - 75 million hotspot users worldwide in 2008 (Gartner)

**Bluetooth**

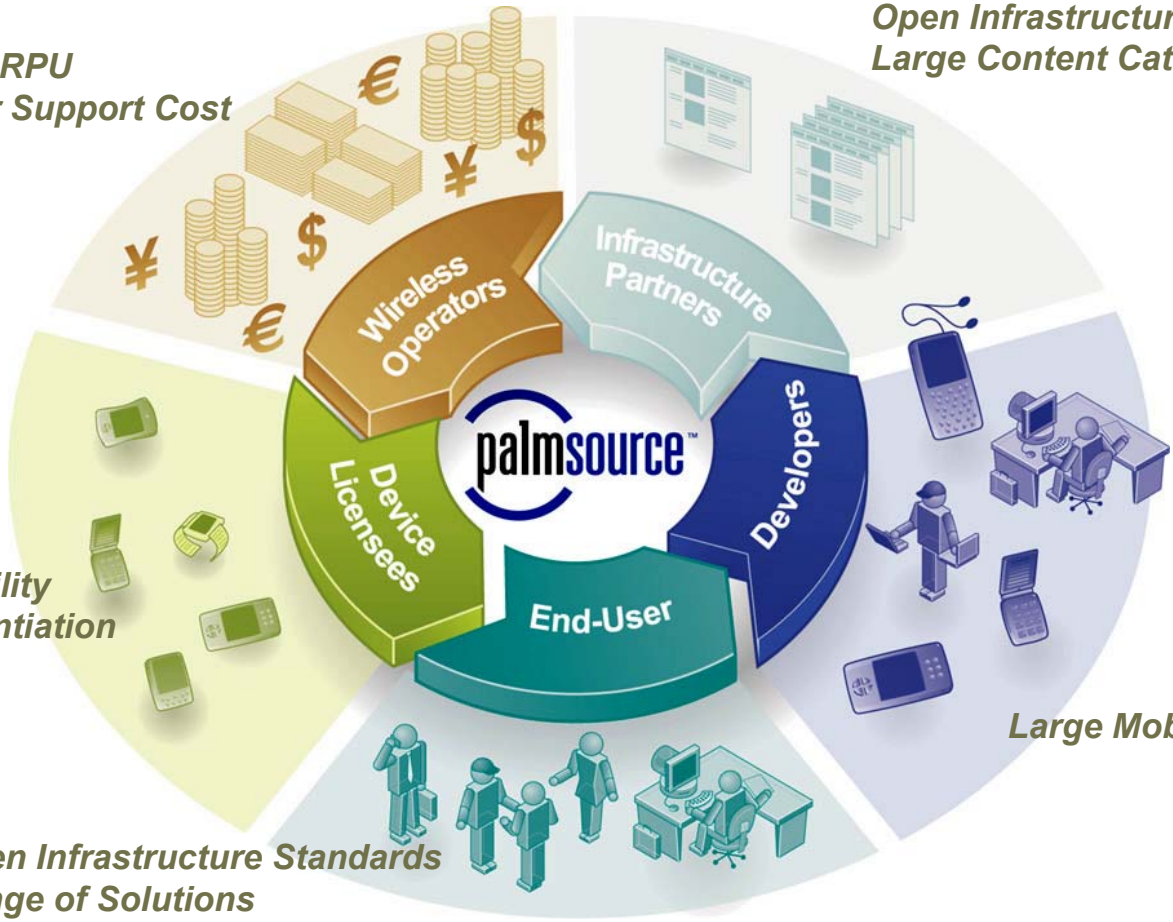

- Connecting to phones
- Faster, more flexible beaming
- Multiplayer gaming
- Wireless accessories

# Palm OS 6 Summary

**Palm OS 6 is the key ingredient of the world's best smart mobile devices**

- Robust multiprocessing, multithreaded OS
- Strong protection and security
- Modular communications architecture
- High performance graphics and multimedia engine
- Integrated telephony foundation
- Application compatibility and interoperability with earlier versions of Palm OS

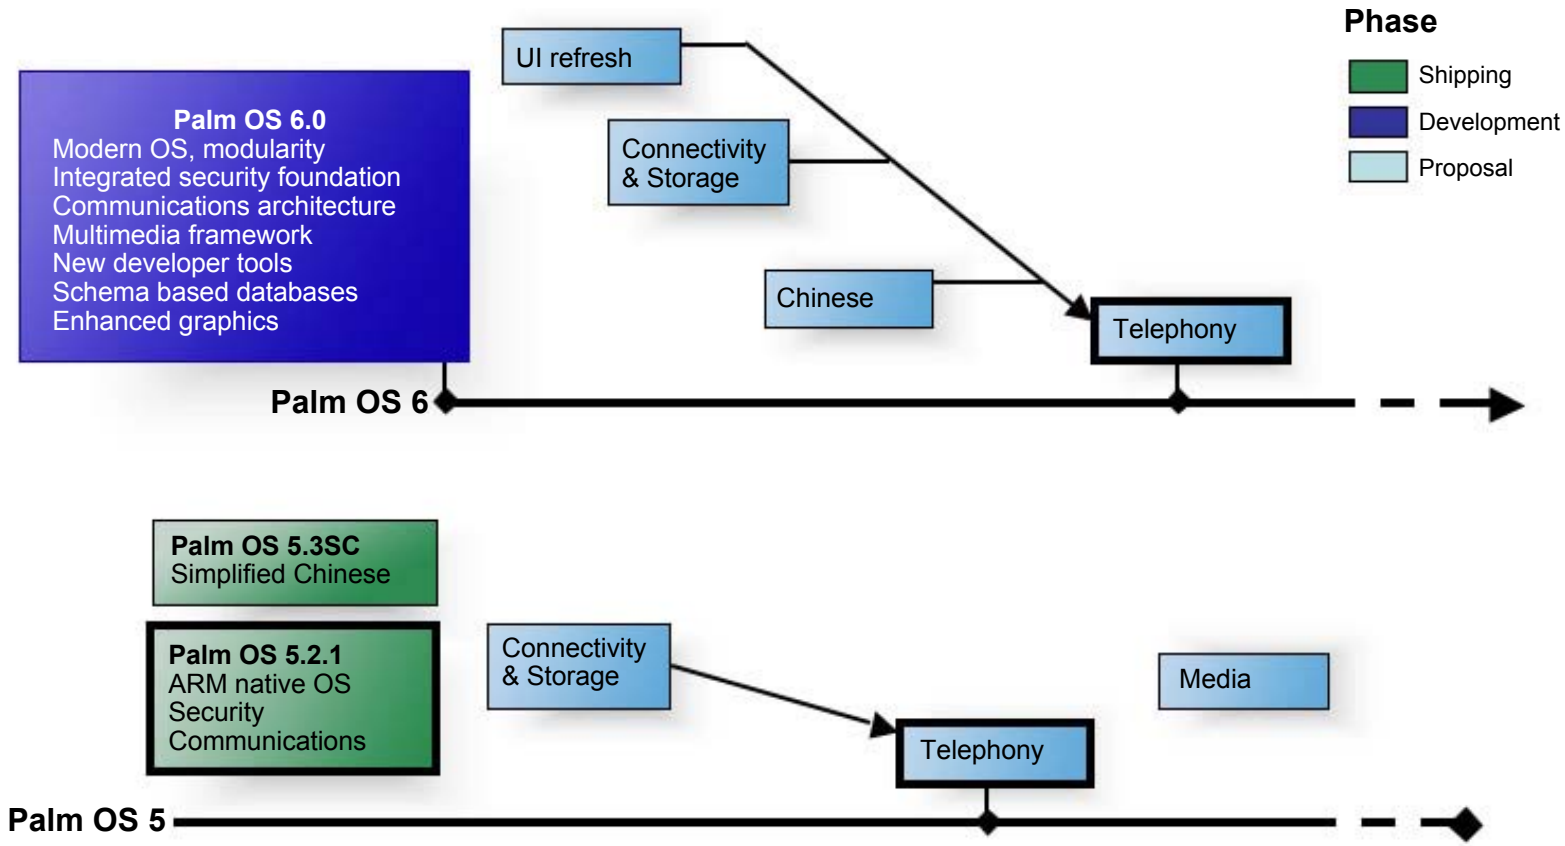

Copyright © 2003 PalmSource, Inc. All rights reserved.

# Palm OS 6 Architecture

# PalmSource Platform Roadmap

Copyright © 2003 PalmSource, Inc. All rights reserved.

# Managing Diversity

**Hardware diversity is a strength and a challenge**

- Licensees pushing the platform can create API fragmentation

**PalmSource is dedicated to managing diversity**

1. Work with licensees to define APIs up front
2. Provide shim layers where appropriate
3. Document licensees' public SDKs on the PalmSource Web site
4. Provide a "how to" kit to make it easier to produce compatible products

Copyright © 2003 PalmSource, Inc. All rights reserved.

# Managing APIs

## Already unified

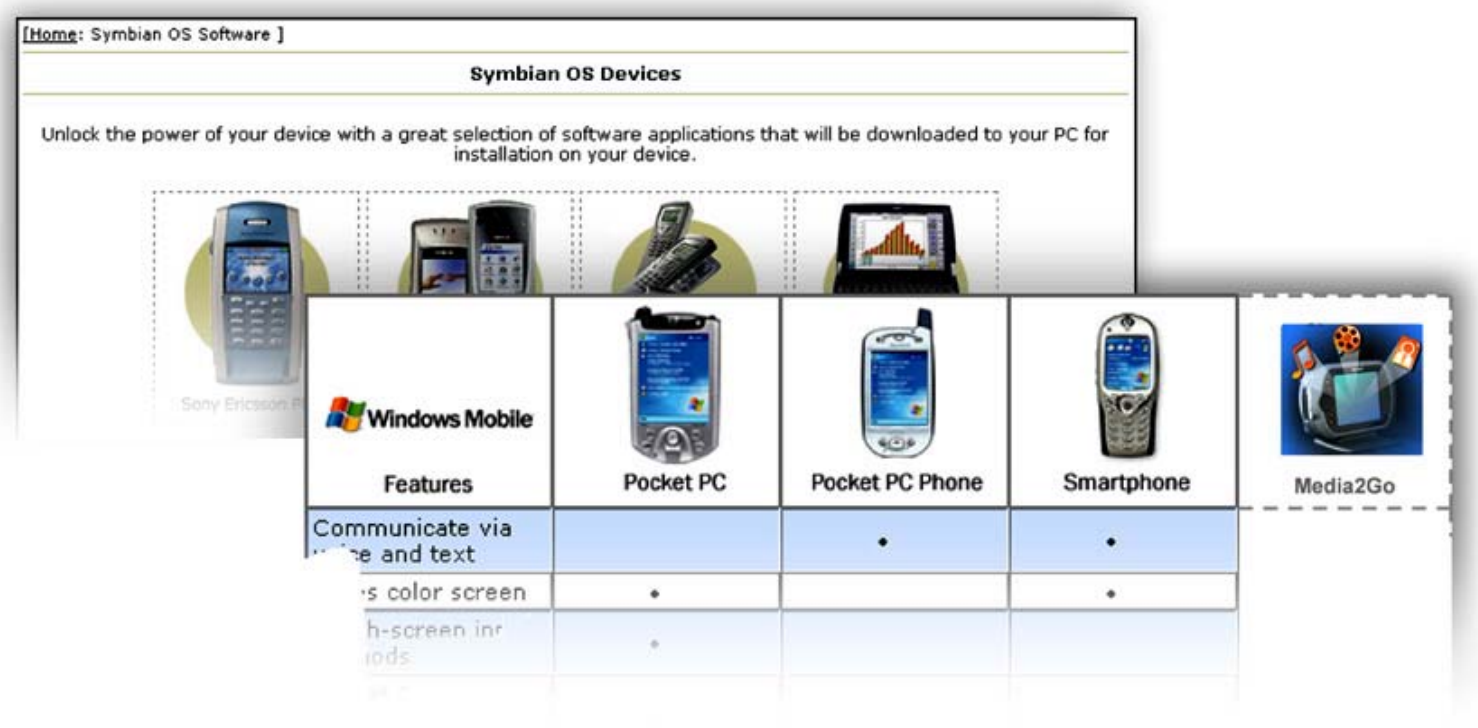

- Dynamic Input Area APIs (“Collapsible Graffiti®”)
- High density APIs (“Hi-Resolution”)

## Unification in progress

- Alternative input methods
- One-handed navigation (5-way, etc.)
- Screen rotation
- Networking
- Extended storage methods

# Palm OS: One Platform vs. Many

Copyright © 2003 PalmSource, Inc. All rights reserved.

# What's New: Developer Tools

**Fast ARM Solutions Toolkit (FAST)**

- New ARM debugger and integration with CodeWarrior
- Build high-performance applications for OS5
- Well-behaved applications for compatibility with OS6
- Beta now available in Seeding Area. GM with OS6.

**Your Choice – New Development Environments**

- Build Web services with IBM Web Services Toolkit
- Program in Visual Basic with AppForge (Palm OS 3.1 through 6.0)
- Program in C/C++ with Borland C++BuilderX
- Significant new tools investments, starting this year

# Value Proposition to Operators

**Palm Powered smartphone**

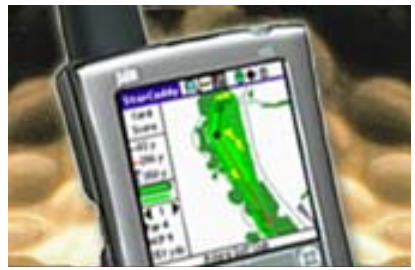

- Increases average revenue and average margin per subscriber!
- Lowers operational costs and churn
- Delivers best-of-breed user experience

**The Palm OS platform delivers:**

- Ease of use
- Low total cost of ownership
- Large base of developers and applications
- Device diversity and innovation
- Operator-specific customization opportunities

Copyright © 2003 PalmSource, Inc. All rights reserved.

# Emerging Wireless Applications

## StarCaddy (LinksPoint)

GPS: Gives the exact distances on a golf course so you can choose the best club

## HanDBase (DDH Software Inc.)

iR/BT: Peer-to-peer synchronization of HanDBase data between Palm Powered devices

## iAnywhere (Sybase)

WiFi: Avantgo—download Web content to a Palm Powered device

WiFi: Administration and management of mobile apps and devices

WiFi: Databases and always-available access to email and other corporate information

WiFi: Mobile Sales, Mobile Pharma, Mobile Inspection—vertical solutions out of the box
