The Future

And what we're doing about it

Before review by Legal

After review by Legal

Most important points

The future is differentiated devices and personalized software

The mobile device market is like the markets for cars and clothing

- In fact, there is no mobile device market

Plain PDAs and plain mobile phones will both be consumed

Agenda

Importance of Diversity

Today

- Handhelds
- Mobile phones

Tomorrow

palmsource

In 2000...

Eierlegende Wollmilchsau

POWERED

2003: The light begins to dawn...

Example 1

- Smartphone
- Camera phone

Example 2

- Fun Fanatics
- Wireless Workers
- Utility Users

Others

- “You just have to have a much more focused idea of the ‘cool stuff’ you want to run, and it's surprisingly different things to different people.” -- Heikki N.

- "On the hardware size, we'd love to see different form factors... I think there is a lot of room for people to go and do unnatural things.” -- Ed S.

Information

- Calendar, address, notes, reference documents, etc
- The handheld is a brain supplement
  - Doctors, lawyers, students

Communication

- E-mail, voice, voice mail, SMS, etc.
- Keep in touch with others
- Salespeople

Full life

- Be useful, but also have fun
  - Music, video, e-reading, games
- Not a tool, a lifestyle choice
- Young people

Just getting started

Communicator

Phone, e-mail, IM, SMS, browsing, etc.

Entertainer

Music, browsing, games, e-books, photos, etc.

Note-taker

Note-taking, ink, search

Info archive

Reference documents, e-mail archive, textbooks, business docs...

Payment tool

E-wallet, expense management, expense reports.

Controller

Easily program & control devices

Perspectives

Entertainer

- It's all about age

Mini-tablet

- Students and older professionals

Communicator

- Across the board; it's a mindset

Current

- Info Archive
- Communicator

New

- Payment tool
- Note taker

Agenda

Importance of Diversity

Today

- Handhelds
- Mobile phones

Tomorrow

Handhelds

1. **Pretty good, thanks**
2. **Not an impulse gift purchase**
3. **New categories emerging**
   - Entertainment, education, industrial
4. **Europe is the best**
   - Vive la France!
5. **Don’t believe everything the analysts say**

Awesome hardware

palm POWERED

Awesome reviews

"The UX50 has raised the bar for all PDAs... It's not cheap, but being in a class by yourself lets you command a premium."

PC Magazine

"The first words that come to mind when playing with the Palm Zire 71 are cool, neat and fun."

PDA Buyers Guide

"We found the iQue to be a robust and powerful mapping solution."

Infosync.no

"Tapwave's Zodiac has the words "handheld hit" written all over it, which is something we've never said about any single handheld computer. If nothing else, it's going to inject some new life into a product niche that until very recently had just started to look boring and short on new ideas. Tapwave shows there's still plenty of life left in the Palm platform."

Forbes

"PalmSource... has given its licensees great latitude for customization and has worked closely with them to enable...innovations .... The result, even in a very difficult market, has been a burst of creativity in Palm-based products, including the Treo, the iQue, and the forthcoming Tapwave Zodiac game player."

BusinessWeek

Agenda

Importance of Diversity

Today

- Handhelds
- Mobile phones

Tomorrow

The phone world starts to emerge

Communicators

Business use

E-mail is the main usage

Moderate interest in add-in software

Low unit sales, but intense usage

Professional Smartphones

Used at work and at home by business professionals

Wide selection of add-in software

Includes most current handheld users

Moderate unit sales, but high software sales

Consumer Camera Phones

Personal use by consumers

Impulse buy (low price)

Little interest in software beyond games

Customer unaware of OS

High unit sales, but low software sales

Professional smartphones

CDMA

GSM

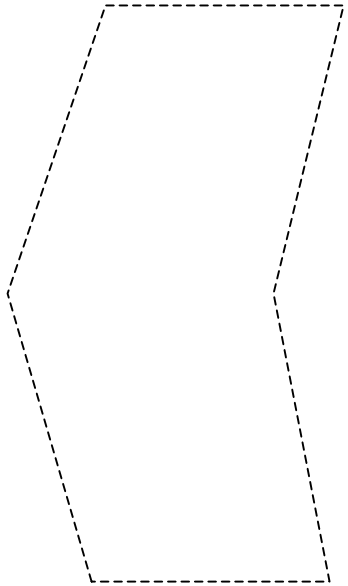

The situation improves...

Welcome

POWERED

Coverage: Treo 600

Best of Show, mobile devices

CeBit USA

"Handspring seems poised to reset the standard for integrated data/voice devices yet again."

PC Magazine

"Most folks use phones primarily for voice calls .... But for those who want more, especially business users, the Treo 600 sets a new standard."

Business Week

"It's a great phone, an excellent mobile e-mail terminal and a full-fledged Palm-compatible PDA. I prefer it to any RIM BlackBerry model I have tested, and it blows away any of the PDA/phones based on Microsoft's Pocket PC operating system."

Wall Street Journal

"Handspring designers have got a lot of things right. Although many of the improvements are incremental, perception is everything and this is the first Handspring that looks like a phone, and does so without alienating loyal Palm users.... While we would hesitate to draw conclusions from first impressions ... Handspring is finally a contender"

The Register

Agenda

Importance of Diversity

Today

- Handhelds
- Mobile phones

Tomorrow

Hardware's not enough

We see a few segments because that's all you can measure

Every user is different; everyone is their own market

Therefore, software is critical

Stories from the users...

Midwest Wool Scanners Pty. Ltd. Case Study

Baa Baa AppForge, Have You Any Wool?
Sheep shearing isn't usually thought of as a high-technology process. Thanks to AppForge and the innovative applications of an Australian entrepreneur, now it is.

David O'Donnell, sole director of Midwest Wool Scanners Pty Ltd., based in Geraldton, Western Australia, sought to streamline his wool testing and analysis services during the annual sheep shearing and sales process. He chose AppForge MobileVB™ as the development platform in which to create his new applications.

Yes, Sir, Yes, Sir, Three Bags Full

O'Donnell and his company provide Australian sheep producers with on-site testing and analysis of their wool (or fleece). "Basically, we take each fleece as it is shorn, identify it, sample it, test it and then use the results to line up the fleeces into similar categories or "lines", ready for sale," said O'Donnell. "We also use the results of the wool testing to select certain genetic traits to improve the overall flock."

Writing

Steven R.

I think I am the first person to have written a novel entirely on a Palm handheld. It is my second book and is being published by a major publisher, Doubleday, in July. The book was written on a Palm IIIc using Wordsmith, and submitted to the publisher electronically.

Dog breeding

Reed P.

My wife and I are very actively involved with purebred dogs. Our Palm powered devices have enabled us to track our personal kennel records for each of our dogs, and keep appointments for them straight.

We also provide assistance for our local breed rescue organizations, county 4H dog project and kennel club. The Palm devices enable us to maintain records of which animals we are assisting (breed rescue), lesson plans for children's dog training classes (4H), and maintain a mobile database for handling referrals for members of the public who are looking to find reputable breeders of purebred dogs.

Construction

Richard K.

We are in the poured concrete wall industry. We run multiple 4 and 5 man crews to pour footings,walls, and foundations for residential and commercial construction projects. Now our formen hot sync every morning and get the customers name and number, their truck load sheets and material list (with the help of DocsToGo)and a three day schedule of where they will be working. Our biggest addition is the ability to get full and detailed job times and tasks with the help of a Palm program called Data-Maxx. The formen now punch all crew members in under the job name which they are working on and what phase of the job they doing. It is basically a mobile time clock with job tracking capabilities.

Mountain climbing

Mich'l S.

In high mountains, survival often depends on being able to wait out a storm. While climbing Mount McKinley, for example, I spent eight days at 17,200‘ (~6,000m), waiting for the weather to clear. Have you ever spent eight days in a sleeping bag?

However, I had my Handspring Visor with me, and was armed with thousands of pages of literature, loaded onto the Visor in .pdb format. Other people on the mountain had brought small paperbacks, and bartered chapters with each other. I had fifty times as much with me, but it weighed essentially nothing. Hemmingway, Umberto Eco, Arthur Koestler, and others, kept me sane. Plus I had Handmark's Scrabble on the Visor, which my tentmates and I played for hours. What a lifesaver!

Aviation

Tom K.

I'm a Mission Pilot with the Civil Air Patrol. Installed on my Palm device are several aviation application including the Airplane Owners and Pilots Association (AOPA) airport directory. It contains virtually all information about thousands of airports across the US. On a January 11 night flight over northeastern Oklahoma, we heard a pilot call over the radio that he was having difficulty finding his destination airport in the darkness. He was alone and his charts were inadequate, out of date or missing. I pulled my Palm i705 out of my flight suit, turned on its internal light, opened the AOPA eDirectory and found information on the airport that this pilot was flying to. Within 60 seconds, my radio call advised the lost pilot of the airport's location, frequencies, hours of operation and instructions for turning on runway lights and rotating beacon from his aircraft.

Religion

Daniel S

I am a Lutheran Pastor. My wife purchased a Palm IIIx. It immediately became my Personal Digital "Assistant"-- reminding me of appointments, helping me keep track of my members, keeping me on top of things that need to be done, emailing correspondence and writing sermons & Bible Studies while sitting in a hospital waiting room or when away from my desktop, using Hymn, Scripture Reading, and Worship databases which I have created to help me prepare for upcoming worship services as well as keep a record of them, always having a copy of the NIV Bible for my personal use as well as when someone comes to me and asks: "Where in the Bible is the verse that talks about...?", locating where my members live coupled with GPS directions when I need to visit them, tracking my auto usage and expenses for IRS purposes, and waking me up on Sunday mornings.

Kayaking

William Schulze

A handheld computer for kayaking? Have you ever forgotten your tide table? Wanted to go for a moonlight paddle, but didn't know when the moon would be full or what time it would rise? Have you ever needed to know when the sun sets to ensure making landfall before dark? Needed an alarm clock to wake up early to beat the wind? How about books to read or games to play or a word processor to write with when stuck in a tent waiting for a break in the weather? How about getting all of these things in a six-ounce package?

Casino worker

Greg H.

As a Surveillance Tech for a major casino, I have to keep track of thousands of bits of info. Camera locations, serial numbers, enclosure types, power locations, what video is being recorded where, etc. The list seems endless. Before my Palm, looking up this info required me to leave my jobsite and look it up on a PC. Then either write or print it for reference. Now, no matter where I am I can retrieve EVERY LAST BIT OF INFO THAT I MAY NEED!!! My Palm has allowed me to do my job three times as efficent. In fact, the director of my department was so impressed that he has approved the purchase of a new Palm m505 for our departments on-site work.

Forestry

Qiang S.

Palm Timber Cruising system (PTC) is designed to automate cumbersome cruising data colection & data analysis process, to eliminate input errors, and to improve forester's efficiency.

PTC has many forestry statistical formulas built in. Accordingly, it supports on the fly cruising information analysis. PTC also helps us with forestry certification program which becomes more and more important in the industry.

Health

Doug M.

I had a mild heart attack, and started a Cardiac Rehab program in January. I was also diagnosed with Type II diabetes.

I use my Palm for managing my diabetes using the DiabetesPilot software (tracks blood sugar, meals, medicines, and exercise), and I've created a spreadsheet (using Documents To Go) to log all of my Rehab efforts (BP, pulse, exercise levels on the various machines) so that I can graph them to track my progress. I use the Voice Memo to record my doctor's instructions. I use Mobile DB to record all of my bloodwork/testing results. I use Memo to write down the questions I have for my doctors and therapists, and of course, DateBook to keep up with the various appointments. I even have approx. ten games to choose from while I wait in the doctor's office!

Healing

As a busy physician my Clie NZ-90 goes everywhere I do. I have close to one hundred pounds of medical reference books on a memory stick. The camera is indispensable for capturing unusual patient findings and wound care.

Losing weight

I have a Palm IIIc. In 2001 I installed the dietlog, exerciselog and weightlog programs to the Palm. To this date I have lost 115 lbs and I'm healthier than I have ever been.

Real estate

Tania P.

My real estate business has made a huge leap into the 21st Century with Internet based applications. Because of this technology and my Palm Powered PDA, I hope to continue my business from the deck of our sailboat traveling around the world as my husband retires this fall. With new satellite capabilities to email, I will be able to use my Palm to refer business from my customer base to colleagues while traveling across oceans.

Beer brewing

Michael W

I am a homebrewer with the software out there today I am able to track everything about the brewing process. I have won many first place ribbons being able to calculate what to do and exactly when to do it with my palm. I am truly a satisfied palmbrewer.

Heavy drinking

Martin D

I'm a cocktail aficionado. I have maintained various databases of cocktail recipes on my computer and the Web. The quantity of information about different recipes and ingredients is overwhelming: far too much to commit to memory. So, I wanted a device that I could tote the data around on when I visited bars or friend's homes....

I still attract attention at bars when I flip the handheld open and start looking up recipes, which is good, because the attention helps me evangelize the cocktail craft. Often, I've just handed the entire unit over to the bartender to refer to while preparing my drink, and on several occasions, I've even beamed my entire database to another patron who has their own Palm.

Infrastructure

PalmSource software store

ZeroSixty Tesser

- Software business infrastructure, subscriptions, reg code generation & management
- Jason Cain

Funambol

- Sync portal, automatic updates of apps and content
