Treo™ 600

The Treo™ 600 by palmOne is a small, easy to use smartphone with a built-in backlit QWERTY keyboard. It seamlessly combines a full-featured mobile phone and Palm OS® organizer with wireless communication applications like email, messaging and web browsing, and even a digital camera—to simplify both your business and personal life.

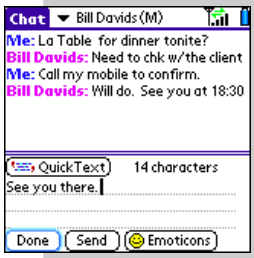

It's a smarter phone Now you can use just one device—instead of many—to get it all done. Everything is totally integrated, so you can talk on the phone while checking your calendar, or quickly look up a contact and either call or send a text message. What's more, Treo 600 is a quad-band GSM™/GPRS world phone that supports high-speed connectivity for wireless communications.

It's indispensable Treo 600's built-in backlit QWERTY keyboard makes entering text and accessing information fast and familiar. It's great for messaging and a must-have for email. But don't let its small size fool you. Dome-shaped keys and large text make it incredibly accurate too. And, for one-handed action, the central five-way navigation button lets you scroll through applications, menus and lists without ever touching the screen.

It's the key to being organized…and connected Treo 600 is a powerful Palm OS organizer that lets you keep all your business and personal information in one place. It includes everything you need to stay organized—Calendar, Contacts, To Do List, Memo Pad, and more. Plus, with wireless connectivity you can send and receive email, SMS text messages, and MMS, and browse the web so you're always in touch.

It's a digital camera and more Take a picture, view it on your color screen or send it via MMS or email. It's that easy. Want to customize your Treo? Just use the SD/MMC expansion slot to add memory, software applications or content. Because Treo 600 runs the popular Palm OS, there are literally thousands of applications you can download and use. You can even add functionality via SD I/O (input/output).

palm POWERED

palmOne

Full-featured world phone

- Call management features include large number dial pad, speed dial, six-way calling, call history, caller ID and call waiting.
- Quickly find and dial anyone in your contacts list by typing the first initial and the first few letters of the last name.
- Hold it to your ear, plug-in an earbud or consider the speakerphone for hands-free use.

Powerful Palm OS® organizer

- Includes all the classic applications for organizing your business and personal information in one place.
- Runs the popular Palm OS so it's easy to use, you can beam information between other Palm Powered™ devices, and there are over 17,000 Palm OS applications available for adding functionality.[1]
- Use the included USB HotSync® cable to transfer all the data from your current Palm OS device to your new Treo with ease—plus, instantly back up, update and exchange information between your Treo and desktop computer.

Wireless email and messaging[2]

- Take advantage of faster GPRS networks with real-time access and a persistent data connection.
- Send and receive email from your corporate and personal email accounts[3] so you can stay in touch while on the go.
- Send and receive SMS text messages with threaded instant messaging-like feature.
- Snap and send photos instantly to email addresses and other mobile phones with the camera and MMS (Multimedia Messaging Service).
- Use links in messages to dial phone numbers, launch web pages and send messages.

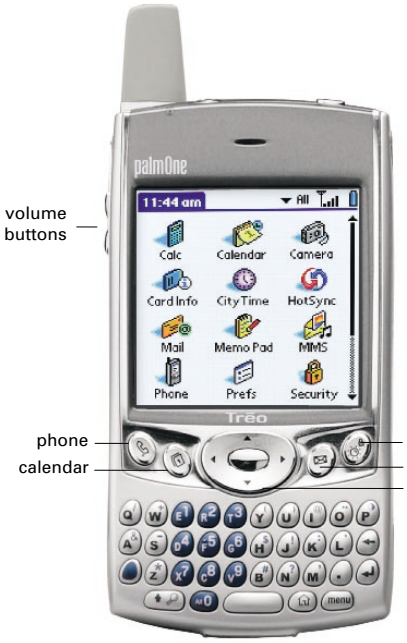

Web access[2]

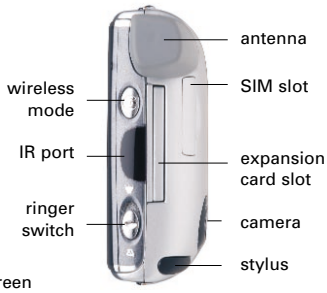

- Connect to the Internet with the built-in Blazer® Web Browser and access virtually any web site—not just those optimized for wireless devices.
- Blazer supports multiple web and wireless standards: HTML 4.0, XHTML Basic and Mobile Profile, WML 1.3, cHTML, a variety of image formats and JavaScript.
- Blazer optimizes web pages for the Treo 600, making them easier to read and navigate.
- Use Blazer to download ring tones, pictures, applications and more, directly to your handset.
- Surf safely with 128-bit SSL encryption to ensure that visiting any site with your Treo is as secure as browsing from your desktop.

Plus, it's a camera and more

- Use the built-in camera to take pictures, show them off on the bright color screen and send them on to others via MMS.
- Includes an SD/MMC expansion slot, which supports industry-standard cards and input/output capability. Use expansion cards to add content and memory (expansion cards sold separately).
- Customize your Treo: create a wallpaper image, add new ring tones, assign unique ring tones by caller, create quick launch favorites of phone numbers, SMS numbers and applications, download applications, and more.
