Palm OS Developer Certification

Making the Cut

Leading companies want top Palm OS® developers. And they will pay good money to create innovative Palm OS applications. You have the know-how and the ideas to fill their need. But how to distinguish yourself from the pack of wannabes and amateurs?

Maybe you had a good interview, but a nervous hiring manager wants to see some credentials. Or perhaps your resume rocks but is getting drowned out by the noise of unqualified competitors. You can quiet the crowd and get through the front door by flashing a simple, yet powerful piece of paper: Palm OS Certified Developer.

The Certified Developer Program from PalmSource, Inc. constitutes the only official, objective way to demonstrate your qualifications in a sometimes doubting world. By passing a challenging exam that covers the spectrum of Palm OS application development, you can prove your professional bona fides. Hiring companies can rest assured that the Palm OS Certified Developer logo marks the bearer as an elite application developer who knows Palm OS development inside out.

Developer Certification in Action!

Benefits of Certification

Palm OS Developer certification provides benefits to both the hiring company and the certified developer. For a certification success story, see "Palm OS Certified Developers from Copera."

For The Hiring Company

The enterprise that hires a Palm OS Certified Developer can anticipate several key advantages:

- A knowledgeable professional with highly advanced skills in Palm OS application development.
- A developer who brings to the table an established relationship with PalmSource, Inc.
- Reduced support costs and liability because your application(s) will be developed correctly.
- Shorter development cycles because you have hired the necessary expertise.
- Simpler hiring process--you can skip the uncertified resumes altogether.

For The Developer

Upon passing the certification exam, you'll receive the Welcome Kit in the mail. You will be the proud owner of the following:

- A Palm OS Certified Developer diploma.

- The right to use the Palm OS Certified Developer logo.
- Listing on the Palmos.com web site so that your status is a matter of record on the official web site of PalmSource, Inc.
- Palm OS Developer Certification valid for Palm OS 5, version 5.1 and earlier. Your certification has no expiration date.
- Six months free Gold membership in MobileCoders' database.
- Palm OS Certified Developer listing in the Palm OS custom developer locator.

Preparing for the Palm OS Certification Exam

The best way to prepare for the Palm OS Certification Exam is to design, write, debug, and optimize Palm OS applications and conduits. However, there are steps you can take to prepare if you are still acquiring practical experience. The following links will lead you to web pages that discuss suggested methods to prepare for the exam, provide information about the exam and the certification process, and allow you to take a sample exam.

- General Preparation
- Sample Exam
- Required Skills
- Frequently Asked Questions

The exam assumes knowledge of C or C++ but does not require specific knowledge of a particular development environment (e.g., CodeWarrior or PRC Tools).

Registration

The Palm OS Certified Developer exam is offered in the U.S. and in Canada. Individuals in the U.S. and in Canada may register for the certification exam by emailing dev.certification@palmsource.com. Candidates who register for the first time receive an email confirmation within 24 hours to begin the scheduling process. The cost to take the exam is $175 USD.

Obtaining Results

Immediately following completion of the exam, you'll receive your score and confirmation of your results.

Obtaining Your Gold Listing in MobileCoders

Palm OS Certified Developers receive six months free Gold membership in the MobileCoders handheld developer locator. To receive your membership, complete a developer profile and fax your certification welcome letter to (832)201-7403. If you are already listed in MobileCoders, you don't need to complete another profile. Your profile will be activated with the Palm OS Certified Developer logo and Gold features within forty-eight hours of submission. Questions or comments can be sent to palmsource@mobilecoders.com.

Retaking an Exam

If a candidate fails the exam on the first attempt, they must wait 1 week before retaking the exam. If the candidate fails after the second attempt, they must wait 3 months before retaking

the exam. Any candidate who is requesting to take the exam a fourth time must have the request approved by Palm, Inc.
